IMPACTS

Describe Potential Water Quality Impacts:

Project activities have the potential to increase erosion and expose waters of the U.S. to pollutant sources common to construction activities. All Project impacts are considered to be of fill; there are no dredge/excavation impacts. BMPs will be installed to reduce erosion and avoid sedimentation or other degradation of water quality. For more information, see Attachment C, Supplemental Project Information Sheet, and Attachment E, Permanent and Temporary Impacts by Feature ID for TRTP Segment 11C.
