

Attachment C
County of San Diego, Flood Control Maintenance, RGP 53
Supplemental Project Information

Candidate, Sensitive, or Special Status Species

Sensitive Flora	Sensitive Fauna
San Diego Thorn-mint	Quino Checkerspot butterfly
Thread-leaved Bordiaea	Laguna Mountain Skipper
Cuyamaca Larkspur	Three-Spined Unarmored stickleback
Otay Tarplant	California Red-legged Frog
Parish's Meadowfoam	Arroyo Toad
Willow Monardella	Least Bell's vireo
San Bernardino Bluegrass	Southwestern Willow Flycatcher
Gambell's Water Cress	Coastal California Gnatcatcher
	Stephens' Kangaroo Rat

NEPA and/or CEQA Compliance

County of San Diego Mitigated Negative Declaration (MND); adopted by Board of Supervisors August 11, 1998, Notice of Determination (OPR file # 199090184) filed August 31, 1998. Subsequent MND adopted November 10, 1999 adding additional sites. Addendum to the Subsequent MND June 2001. Subsequent Addendum for September 2005 renewal of RGP53 adopted on March 10, 2005. The Subsequent Addendum for 2010 renewal was adopted on April 13, 2009.

Mitigation

Habitat Type	Minimum Acceptable Mitigation Ratio
Freshwater Marsh (FWM)	1:1
Southern Willow Scrub (SWS)	2:1
Mulefat Scrub (MFS)	2:1
Riparian Woodland (RW)	3:1
Disturbed Wetland (DW)	1:1
Out of Watershed Mitigation (OWS)	3:1

Describe Compensatory Mitigation for Impacts to Waters (temporary and permanent)

Permanent Impact (acres)	Habitat type	Mitigation Ratio	Mitigation (acres)
0.17	Freshwater march	1:1	0.17
0.26	Southern willow scrub	2:1	0.52
0.14	Mulefat Scrub	2:1	0.28
0.03	Riparian Woodland	3:1	0.09
0.01	Disturbed Wetlands	1:1	0.01

Proponent Provided Mitigation Information

Sweetwater River Offsite Mitigation Area (SROMA) is located in southern San Diego County within the Sweetwater Watershed, in an unincorporated area of the County, adjacent to the City of Chula Vista.
