Public Notice
Of Application for Water Quality Certification

Pursuant to federal law (Title 33, United States Code, Section 1341; Clean Water Act Section 401), applicants for a federal license or permit for activities which may discharge to waters of the United States must seek Water Quality Certification from the state or Indian tribe with jurisdiction. Such Certification is based on a finding that the discharge will meet water quality standards and other applicable requirements. In California, Regional Water Quality Control Boards (Regional Board) issue or deny Certification for discharges within their geographical jurisdiction. The State Water Resources Control Board has this responsibility for projects affecting waters within multiple RWQCB jurisdictions. The following information is provided in satisfaction of the public notice requirements of Section 3858, Title 23, of the California Code of Regulations, which govern the State’s Certification Program.

Applicant: Contra Costa County Transportation Authority

Applicant Contact: Susan Miller
Telephone: (925) 256-4736
Email: smiller@ccta.net

Project Name: State Route 4 (East) Widening Project for the Contra Costa Transportation Authority: Loveridge Road to State Route 160

Date of Application: 4/11/2008

Affected Regions: San Francisco Bay (Region 2) and Central Valley (Region 5)

Public Notice for Water Quality Certification and/or Waste Discharge Requirements (Dredge/Fill Projects)
State Route 4 Widening Project
Contra Costa County

A public notice for this project was originally posted on February 19, 2009. This public notice supersedes the previous notice as the project description has been expanded to include new information and an additional project segment. On June 7, 2007, the San Francisco Bay Regional Water Quality Control Board (Regional Water Board) issued a 401 water quality certification for construction of a pump station as part of the State Route 4 (SR-4) Widening Project (Project). On April 11, 2008, the Regional Water Board received an application from the Contra Costa Transportation Authority (Authority), requesting Federal Clean Water Act (CWA), section 401, Water Quality Certification to widen State Route 4 (SR-4). The proposed Project is located in the cities of Pittsburg and Antioch, Contra Costa County, California, on SR-4 starting 1.33 kilometers (0.8 mile) west of Loveridge Road to approximately 1.24 kilometers (0.7 mile) east of Hillcrest.
Avenue. The purpose of the proposed Project is to reduce existing traffic congestion, improve traffic operations, encourage High-Occupancy Vehicle (HOV) use, and accommodate future anticipated traffic demand through the year 2030.

The proposed Project would widen SR-4’s existing four lane highway to an eight lane facility with one HOV lane and three-mixed flow lanes in each direction. The Project has been designed with sufficient width in the median through the Loveridge Road Interchange to accommodate future public transit improvement plans. The highway would be designed to provide space to create ramp metering facilities and California Highway Patrol (CHP) enforcement area where feasible. Drainage facilities that cross SR-4 would have culvert extensions to accommodate the necessary widening to the highway. The Roosevelt Lane pedestrian undercrossings and the Cavallo Road undercrossings would be widened. The following five intersections will be redesigned to improve traffic flow within the community and to provide the space to widen SR-4: Loveridge Road, Somersville Road, Contra Loma Boulevard-L Street, Lone Tree Way-A Street, and Hillcrest Avenue. A sixth intersection at G Street would eliminate its westbound entrance and its eastbound highway exist ramp and would be redesigned to accommodate a new SR-4 overstructure.

The known temporary and permanent impacts to both waters of the U.S., including wetlands, and waters of the State will occur where SR-4 crosses Kirker Creek, Old Kirker Creek, and Los Medanos Wasteway. Work in waters includes replacement of a box culvert at Old Kirker Creek, in-kind replacement and extension of box culverts at Kirker Creek and the Los Medanos Wasteway, and relocation of a 36-inch sanitary sewer line crossing Old Kirker Creek. The known net permanent fill is estimated to be 0.11 acres or 691 linear feet. The known net temporary fill for water diversion activities is estimated to be 0.009 acres.

The applicant has applied for a U.S. Army Corps of Engineers’ (Corps) Individual Permit (Corps No. 2002-26746S) pursuant to Section 404 of the Clean Water Act (33 U.S.C. 1344) for the proposed Project.

The Project Water Board staff are proposing to regulate this project pursuant to Section 401 of the Clean Water Act (33 USC 1341) and/or Porter-Cologne Water Quality Control Act authority. In addition, staff will consider all comments submitted in writing and received at this office by mail during a 21-day comment period that begins on the first date of issuance of this letter and ends at 5:00 p.m. on the last day of the comment period. If you have any questions, please contact staff member Amna Hawatky at (916) 341-5483, or at ahawatky@waterboards.ca.gov, or Bill Orme at (916) 341-5464, or at borme@waterboards.ca.gov within 21 days of the posting of this notice.
