6/12/07 Workshop  
Suction Dredge Mining  
Deadline: 6/22/07 Noon

Hello: I am a recreational small time gold dredge miner. This is a very PT activity/Summer hobby and with most recreational gold dredgers we enjoy the hunt. I believe we are on the helping end of the environment because every time I have sucked some gold from rivers in northern California we always find and remove the mercury found in the rivers. We also create deeper holes in the river for the fish.

800-843-2784 or 800-u4earth

Thank you
