DEVELOPING A POLICY TO
PROTECT
WETLANDS AND RIPARIAN AREAS

PHASE 1

Bill Orme, Senior Environmental Scientist,
State Water Board

Liz Haven, Asst. Deputy Director,
Surface Water Regulatory Branch, State Water Board

Dyan Whyte, Assistant Exec. Officer,
SF Bay Regional Water Board
Why We Need a New Policy

- No consistent statewide policy exists
- Water Boards are required to protect ALL “waters of the state”
- Federal protection extends only to “waters of the U.S.,” a shrinking category
- Wetlands developed as compensatory mitigation are losing functionality at an increasing rate
What is at risk without clear policy guidance?

Loss of these vulnerable wetlands / riparian areas and associated benefits
Recent State Board Actions

- Resolution No. 2008-0026 authorizing 3-phase State Board Policy project
- Resolution No. 2008-0030 “Requiring Sustainable Water Resources Management” in all “policies, guidelines, and regulatory actions”
Policy Phase 1

- Develop a definition of wetlands for California
- Develop a policy to provide protection from dredge and fill activities
- Design a wetland regulatory mechanism with a watershed focus, based on CWA 404(b)(1) Guidelines
- Design wetland assessment method(s) to monitor wetland protection and program effectiveness
Statewide Wetlands Definition

- Must accomplish mandates of Porter-Cologne and No Net Loss Policy
- Must be broad enough to encompass the state’s diverse array of wetlands
- Should be consistent, as far as possible, with other agencies’ definitions
- Should use accepted field methods to identify wetland boundaries
Policy Phase 2

- Expand the policy to protect wetlands from “all other activities impacting water quality”
- Develop new or revised definitions of beneficial uses
- Develop water quality objectives to protect beneficial uses
- Design an implementation program to achieve objectives and protect wetland functions
Policy Phase 3

- Extend the policy to protect water quality functions of riparian areas
  - Develop new definitions of beneficial uses
  - Develop water quality objectives
  - Design an implementation program to achieve water quality objectives
