

Cleanup and Abatement Application Flow Chart

Program Preferences in order of priority:

1. Emergency Cleanup Projects – Public Safety
2. Projects that address Disadvantaged Communities Environmental Justice infrastructure needs
3. Cleanup and/or abatement of 2006-listed water bodies that will help to implement a Total Maximum Daily Load (TMDL)
4. Cleanup and/or abatement of non-point source legacy pollutants (i.e. Stormwater) when the source(s) of the pollution have been mitigated
5. Cleanup and/or abatement of pollution in high-use groundwater basins
6. Cleanup and/or abatement of contaminated sites when the viable responsible party has not been identified
7. Projects that promote habitat restoration through non-profit organizations that collaborate with the Regional Water Boards and encourage public outreach and education
8. Completion of a study/plan and/or monitoring addressing significant Statewide water quality problems
