

US EPA Energy Management Webcast Series for Water and Wastewater Utilities

Solar Energy for Water and Wastewater Utilities: Step-by-Step Project Implementation and Funding Approaches

Webcast: October 11th, 2012 from 1-2:30pm (EST)

90 Minute audio Web broadcast

Eastern: 1:00 pm – 2:30 pm

Central: 12:00 pm – 1:30 pm

Mountain: 11:00 pm – 12:30 pm

Pacific: 10:00 am – 11:30 pm

Registration

The webinar is free. Please register now at <https://www3.gotomeeting.com/register/567834686>

Description

Improving energy efficiency is an ongoing challenge for water sector utilities. This webcast will focus on solar energy and will assist utilities in understanding how solar energy can be used effectively at water and wastewater utilities. The first part of this webcast will detail the process of implementing solar energy projects at water or wastewater utilities, the various types of solar technologies available, and where they can be most appropriately used. The webcast will also highlight innovative funding approaches, including those with no up-front capital requirements, that result in long-term energy cost savings and stability. Finally, this webcast will present the case study of a successful solar installation at a small water utility in Grafton, Massachusetts.

Moderator

Jim Horne, US EPA Office of Wastewater Management

Speakers

Eric Byous, U.S. EPA Region 9

Bryan Gates, Director of Business Development, Enfinity Corporation

Matt Pearson, General Manager, Grafton Massachusetts Water District
