

Clean Water State Revolving Fund **ANNUAL REPORT**

STATE FISCAL YEAR 2009/2010 (July 1, 2009 - June 30, 2010)

OUR VISION

A sustainable California made possible by clean water and water availability for both human uses and environmental resource protection

OUR MISSION

To preserve, enhance, and restore the quality of California's water resources, and ensure their proper allocation and efficient use, for the benefit of present and future generations

About the State and Regional Water Boards

The State Water Resources Control Board (State Water Board) was created in 1967. The mission of the State Water Board is to ensure the state's water quality and to balance its beneficial uses. Its comprehensive authority over allocation, planning, and enforcement enables the State Water Board to protect California's water quality.

The State Water Board consists of five, full-time salaried Members, each filling a different specialty position. Each board member is appointed to a four-year term by the Governor and confirmed by the Senate.

There are nine Regional Water Quality Control Boards (Regional Water Boards). The mission of the Regional Water Boards is to develop and enforce water quality objectives and implement plans that protect the beneficial uses of the state's waters, recognizing local differences in climate, topography, geology, and hydrology.

Each Regional Water Board has nine, part-time Members also appointed by the Governor and confirmed by the Senate. Regional Water Boards develop "basin plans" for their hydrologic areas, issue waste discharge permits, take enforcement action against violators, and monitor water quality.

I. INTRODUCTION

This report is the State Water Board's comprehensive Annual Report for its Clean Water State Revolving Fund (CWSRF) program for the period July 1, 2009 through June 30, 2010. This period corresponds with State Fiscal Year (SFY) 09/10. This report describes how the State Water Board met the objectives identified in the SFY 09/10 Intended Use Plan (IUP) and reflects the actual use of the funds available to the CWSRF.

II. PROGRAM SUMMARY

The federal Clean Water Act (CWA) provides states the opportunity to establish a CWSRF Program to help each state achieve the goal of clean water. The CWSRF is capitalized with federal and state funds. The CWSRF provides affordable financing for 1) construction of publicly owned treatment works (POTW), 2) elimination of non-point sources (NPS) of pollution, and 3) development and implementation of plans to protect important estuaries. Further information about the Program can be found at the State Water Board's – Grants and Loans web site at

http://www.waterboards.ca.gov/water_issues/programs/grants_loans/.

The CWSRF has protected and promoted the health, safety, and welfare of Californians since 1989. Many CWSRF financing recipients use their financing to eliminate water quality violations and the associated enforcement actions by the Regional Water Boards. Every project financed by the CWSRF is directly related to improving water quality and/or public health.

The revolving nature of the CWSRF Program creates asset and revenue growth. As of June 30, 2010, the total available to the CWSRF for financial assistance was \$5.352 billion (including funds from the American Recovery and Reinvestment Act of 2009 (ARRA)). Approximately 100 percent of all available funds were committed to projects through an executed financing agreement (binding commitment), and about 86 percent of all available funds were disbursed to financing recipients as of June 30, 2010. Program activity from inception to fiscal year ending June 30, 2010 is shown in Table 1 below. A list of all active and completed CWSRF agreements is provided in Exhibit B.

Table 1: Program Activity ¹ Since Inception	
Activity	Life of Program
Number of Financing Agreements	535
Value of All Financing Agreements	\$5.337 billion ²
Disbursements Processed	\$4.589 billion ²
Balance of Financing Agreements	\$748 million ²

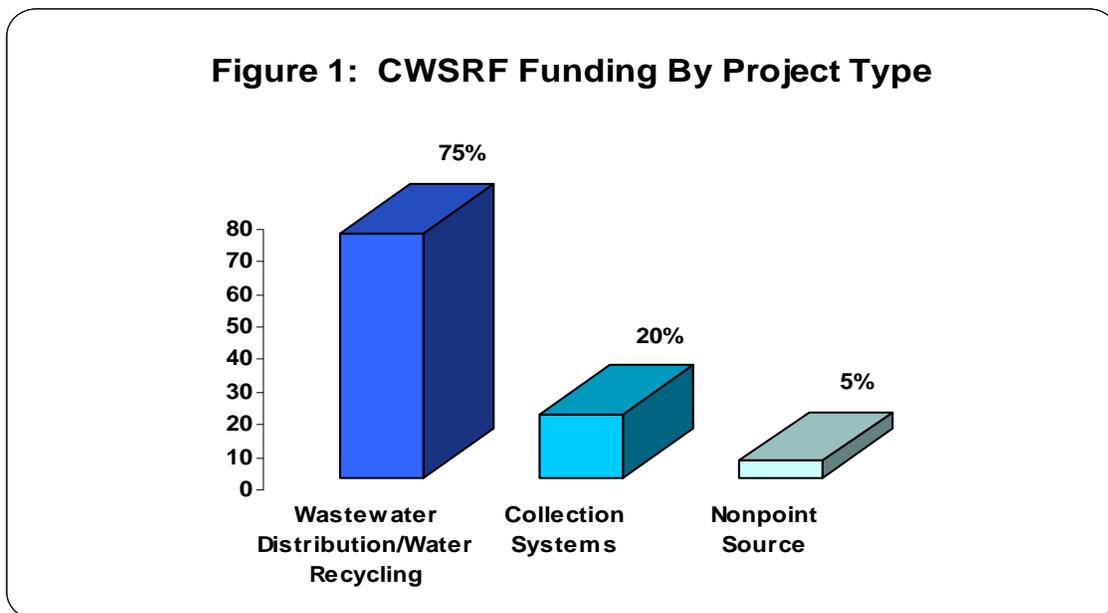

¹ Program activity includes matching funds provided by financing recipients.

² Amount includes ARRA funds.

The outstanding balance of the existing financing agreements will be disbursed over the next one to three years depending on the construction schedules of the projects financed. The CWSRF Program will use assets not restricted for other purposes and new capital contributions to fulfill these commitments. These funds include repayments, federal grants, state matching funds, and investment earnings.

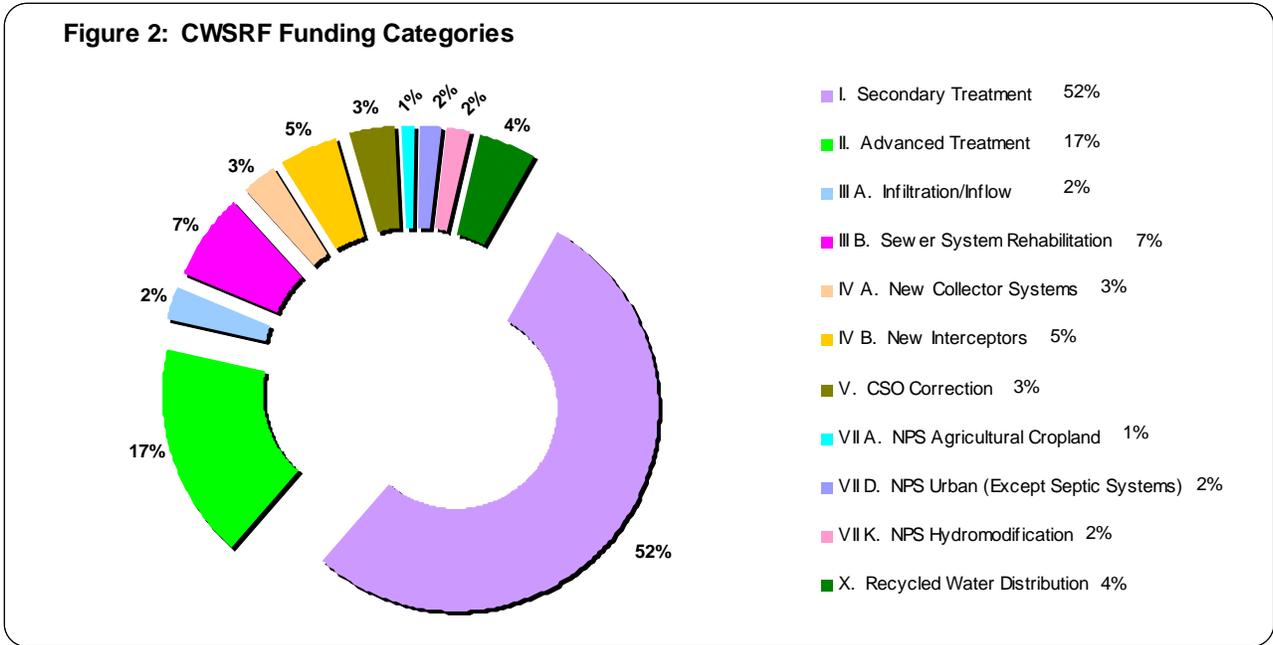

The State Water Board operates the CWSRF Program on a cash flow basis. The State Water Board staff is continually developing, reviewing, and approving applications for new projects. New projects will be financed with uncommitted funds as well as additional revenue or contributions expected in future years. The CWSRF can also leverage its revenue if necessary to finance projects. State Water Board staff is currently working with numerous applicants to make additional commitments in SFY 10/11. The estimated value of these projects is about \$2.294 billion based on the SFY 10/11 IUP.

The CWSRF is used for a broad range of projects. Figure 1 illustrates the breakdown of funding in three main categories of projects: 1) wastewater treatment and recycling facilities, 2) wastewater collections systems, and 3) non-point source pollution prevention and reduction projects.

As seen in Figure 1, the majority of funds were used to construct and improve wastewater treatment and recycling facilities. Since inception of the program, a little over \$4.044 billion was spent on wastewater treatment and recycling. Funding for wastewater collection systems is the second largest use of CWSRF funds. Approximately \$1.057 billion was spent on collection systems. The State Water Board is also a leader in using CWSRF funds for non-point source (NPS) projects. Although this is currently the smallest overall use of the CWSRF, about \$278 million was spent on NPS projects.

Figure 2 (below) provides a further breakdown of the three main categories of projects. The top six categories, accounting for approximately 91 percent of the funds used, are all infrastructure categories. This demonstrates the CWSRF’s importance to maintaining California’s water quality infrastructure.

Please note the categories listed below were funded, but are not shown in Figure 2, because each category was less than 1 percent:

- VI – Storm Sewers
- VII B. – NPS Agricultural Animals
- VII C. – NPS Silviculture
- VII L. – NPS Septic Systems

III. PROGRAM GOALS AND FINANCIAL RESULTS

A. Short-Term Goals

The State Water Board established the following short-term goals in the IUP for SFY 09/10 (dated October 6, 2009). This section discusses the results of the CWSRF Program's efforts to meet those goals.

1. Prepare and review cash management reports

Timing disbursements to receipts requires careful and regular oversight of the cash flow. State Water Board staff reviews management reports at its finance/audit committee meetings that summarize the current financial condition of the CWSRF.

State Water Board staff also routinely monitors cash flow as part of the financing approval process. The effect of the estimated disbursements of each project on the program's overall cash flow is analyzed before the project is approved for financing.

2. Continue regular finance/audit committee meetings

State Water Board staff conducted finance/audit committee meetings on November 19, 2009, February 24, 2010, April 14, 2010, and June 25, 2010. Standing topics at these meetings included:

- Reviewing cash flow of projects under contract, three and six month cash flow projections, and cash flow needs for upcoming projects.
- Comparing actual performance with target performance measures.
- Reviewing audit issues, program control issues, and plan for upcoming audits.

3. Complete training with Northbridge Environmental Management Consultant's, Inc.

State Water Board staff completed its financial management skills training with Northbridge in July 2009 using funds from the 2008 Capitalization Grant.

4. Contract with a professional financial advisor

The CWSRF contracted with a professional financial advisor, Public Financial Management, Inc., in May 2010 to provide specialized expertise in financial planning and management, such as, planning for future revenue bond sales, implementing alternative forms of financing, refining cash flow forecasting, and developing a debt management policy.

5. Accept additional capitalization grants

The federal fiscal year (FFY) 2009 Capitalization Grant application was submitted May 1, 2009. The grant for \$48.7 million was awarded on September 9, 2009. The State Water Board will provide the necessary state match through excess state bond and local match contributions to the Program.

6. Apply for additional capitalization grants

The FFY 2010 Grant is \$146 million. The Grant application was submitted to US EPA on March 19, 2010. The grant was awarded on August 27, 2010. The State Water Board will provide the necessary state match through excess state bond and local match contributions to the Program.

7. Complete the funding of projects to meet ARRA requirements and goals

ARRA projects were selected to maximize job creation and economic benefit. All ARRA funds were committed to projects that were under construction or had an executed construction contract by February 17, 2010. Sixty-five percent of ARRA was used for additional subsidization in the form of principal forgiveness. Twenty-eight percent of ARRA funds were committed to green infrastructure, water or energy efficiency improvements, or other environmentally innovative activities.

8. Prepare Annual Report and Audit for SFY 09/10

Audited financial statements dated September 30, 2010, were received from the independent audit firm of Clifton-Gunderson LLP on October 12, 2010. This report completes the Annual Report requirement for SFY 09/10.

9. Complete Standard Operating Procedures Manual

Work on the Standard Operating Procedures Manual was suspended due to the workload demands from ARRA and furloughs of state employees starting in February 2009. The State Water Board staff will reassess the timing of this activity in SFY 10/11.

10. Provide funds for projects that support the Water Boards' priorities and ARRA objectives

Section IV and Exhibit D provide further details about the projects funded by the CWSRF program in SFY 09/10.

11. Develop SFY 10/11 IUP and 10/11 Project Priority List

Business planning for the CWSRF is a regular process. State Water Board staff worked closely with the Division of Water Quality (DWQ), the Regional Water Boards, and stakeholders to ensure that the highest priorities were identified in the SFY 10/11 IUP. The State Water Board adopted the SFY 10/11 Project Priority List on June 15, 2010, and adopted the SFY 10/11 IUP on

August 3, 2010. The SFY 10/11 IUP and Priority List will guide the marketing and assistance efforts of the CWSRF in SFY 10/11.

12. Complete quadrennial Clean Watersheds Needs Survey (CWNS)

The CWNS provides basic information about the market for CWSRF financing. The State Water Board completed its input of data for the 2008 CWNS on March 20, 2009. US EPA published the results of the 2008 CWNS on June 2, 2010. The published results can be view at <http://water.epa.gov/scitech/datait/databases/cwns/upload/cwns2008rtc.pdf>.

13. Provide 20 percent of CWSRF funds in the form of Extended Term Financing (ETF)

ETF helps make financing more affordable for small, disadvantaged communities by reducing debt service by approximately 25 percent. The Board provided 28 percent of its CWSRF financing during SFY 09/10 in the form of ETF.

14. Application Process Improvements

During SFY 09/10 there were minimal process changes due to Legal, Credit Review, and Environmental changes during the year. Revising and updating of the Application were delayed due to higher priority work.

15. Adopt Regulations for the CWSRF Program to replace current Policies

Work on the regulations was suspended due to the workload demands from ARRA and furloughs of state employees starting in February 2009. The State Water Board staff will reassess the timing of this activity in SFY 10/11.

16. Stakeholder Advisory Group (SAG)

The purpose of the SAG is to provide stakeholders an opportunity to advise CWSRF program staff in the following areas: setting program funding priorities, performance measures, and changes to the program to maintain and enhance water quality; operational improvements and development of program regulations; implementation of lower interest rate and extended term financing; marketing, business development, and financial forecasting.

State Water Board staff conducted two meetings with SAG by conference calls on October 22, 2009 and April 20, 2010. The agenda discussion items primarily focused on the ARRA success and the SFY 09/10 IUP.

17. Marketing and Outreach

The CWSRF staff participated in five California Financing Coordinating Committee (CFCC) funding fairs during SFY 09/10 from February 2010 to

May 2010. The funding fairs provide members of the public and infrastructure development professionals current information on funding options available for different project types.

Public and Regional Water Board workshops were conducted during April and May 2010 to provide training and information on the program's financial status, policy changes, project eligibility, and ARRA updates.

The State Water Board staff created a new web site dedicated to the CWSRF ARRA funding and activities. This web site included general information for the public, specific information for ARRA recipients, and detailed reports allowing interested parties to track the CWSRF ARRA funds.

B. Long-Term Goals

In its SFY 09/10 IUP, California identified the following long-term goals. This section discusses the results of the CWSRF Program's efforts to meet these goals.

1. Maximize cash flow management

Ideally disbursements should match receipts for the CWSRF Program, less a minimum balance comprised of restricted assets and cash (\$25 million minimum cash balance), to get the most water quality benefit from the funds available to the CWSRF Program. Historically, applicants do not request disbursements as quickly as originally planned. This lag can cause cash to increase in the CWSRF account.

The State Water Board during SFY 09/10 made commitments equal to 100 percent of available funds to compensate for the gap between planned and actual disbursements. Staff monitored fund balance trends through its management reports and finance meetings to ensure that fund balances are not increasing and that sufficient funds are available to fulfill disbursement requests.

Staff also continued to monitor project disbursement levels relative to the elapsed construction time, and periodically reviewed projects to ensure that final disbursements are made no later than six months after completion of construction to ensure that funds are disbursed in a timely manner.

2. Effectively use revenue and new capital

The CWSRF has sizeable revenue that can be leveraged to fund more projects at current costs and address California tremendous water quality needs. The program did not need additional capital this year because of the ARRA Grant received at the end SFY 08/09. The cash flow model is being closely monitored to see if additional capital will be needed to fund future projects.

3. Maintain financial integrity

The State Water Board continued to bolster its credit review procedures this year to ensure that loans are repaid on time and in full. The State Water Board analyzes each applicant's financial capabilities and may impose special conditions on applicants to lower default risk. Recipients may be required to provide ongoing financial information after loan closing or to educate the public if there was significant disapproval during the public rate setting process. State Water Board staff also maintains a watch list of current financing recipients and potential applicants that show signs of financial weakness.

The Program also contracted with an outside financial advisor to provide independent, professional financial advice to program staff.

Financial statements were prepared by the State Water Board staff and audited by an independent auditor. A copy of the audited financial statements is included as Exhibit A to this Annual Report. The audit indicated that the financial statements disclosed no instances of noncompliance or other matters that are required to be reported under the Government Auditing Standards.

4. To achieve statewide compliance with water quality objectives and maximize the environmental benefits from CWSRF funded projects

The State Water Board continued its efforts to set and enforce water quality objectives. The State Water Board provided financial assistance from the CWSRF to correct both point and non-point source pollution problems to help meet these objectives. The environmental benefits of the projects financed by the CWSRF during SFY 09/10 are summarized in Section IV of this report.

5. Assist with the State Water Board's [Plan For California's Nonpoint Source Pollution Control Program](#) and estuary **Comprehensive Conservation and Management Plans**

The State Water Board took advantage of the ARRA grant funds received in SFY 08/09 to fund in SFY 09/10 a number of non-point source, storm water, and estuary projects that could not afford a CWSRF loan. Section IV and Exhibit D provide further detail about these projects.

6. To bring POTW into compliance with federal and state requirements

The State Water Board continued to provide funds in SFY 09/10 to municipalities to help them achieve compliance with federal and state waste discharge requirements. Eighty-six percent of funds committed in SFY 09/10 went to improve POTW compliance with federal and state requirements.

7. Provide good service with a special emphasis on Disadvantaged Communities (DACs)

The State Water Board adopted Resolution No. 2008-0048 (Resolution) which promotes strategies to assist small and/or DACs with wastewater needs. The resolution references the Small Community Wastewater Strategy, which provides an overview of the problems faced by Small Disadvantaged Communities (SDACs) and proposed solutions to address those problems. The State Water Board executed a contract with Rural Community Assistance Corporation (RCAC) on December 28, 2009, to provide technical training to SDACs statewide. This assistance will help improve SDACs compliance and ensure that funds available through the State Water Board are used as effectively as possible in implementing practical, cost effective wastewater projects that will be adequately maintained over the long term. State Water Board staff is preparing a Request for Proposal (RFP) to provide technical assistance to small and/or DACs that will help communities to prepare more viable and competitive funding applications, and will help ensure that the State Water Board is able to administer funding in a timely manner.

8. Develop clear, flexible, and innovative application procedures

Development of a transparent and uniform application with instruction booklet was delayed during the first half of SFY 09/10 due to the workload demands from ARRA and furloughs of state employees. The staff resumed development of the Clean Water State Revolving Fund/Small Community Wastewater Grant/Water Recycling Application Package in January 2010. These efforts are ongoing.

9. Ensure staff is well trained and ready to help communities resolve technical and financial issues

The CWSRF management conducted monthly staff meetings to ensure that staff received up-to-date information about the current policies and procedures affecting the CWSRF program. In addition, staff received training sessions regarding ARRA topics and pertinent financing documents.

C. Operating Agreement and Capitalization Grant Conditions

The State Water Board agreed to a number of conditions in the Operating Agreement and the Grant Agreements. These conditions were met as described below.

1. Assistance Activity

A total of \$615 million was financed in SFY 09/10. Approximately 95 percent went to sewers, collection systems, or wastewater recycling; five percent went to NPS projects.

In SFY 09/10, 104 of the 226 projects listed in the IUP were funded (see Exhibit D for funding by needs category).

High demand for water quality improvement funding in California requires the State Water Board to fund projects on a ready-to-proceed basis and substitute projects as needed. The reason(s) projects in the IUP do not get funded is typically one or more of the following:

- Changes of needs or scope
- Application requires additional studies, more documentation, and/or more hearings
- Changes in design
- Delays in the bidding process
- Financed with other (non-CWSRF) financing
- Application withdrawn
- Funded as part of another CWSRF financing agreement

2. Eligible Categories of Projects and Financing Terms

The State Water Board provided funding for all eligible categories of projects. The types of assistance include installment sales agreements and purchase of debt for the construction of treatment works or implementation of non-point source or estuary projects.

Principal forgiveness was provided to those applicants that met the conditions specified by the State Water Board in the SFY 09/10 IUP and any amendments or resolutions adopted by the Board for implementing ARRA.

The State Water Board also provided planning financing during SFY 09/10. Planning financing is amortized over five years unless rolled into a construction financing agreement. Construction or implementation financing is generally amortized for periods up to 20 years, but can be amortized over as much as 30 years for SDACs. The terms associated with financial assistance vary by applicant and the date the project is approved.

The interest rate applied to financing agreements is established at the time the project is approved. The interest rate generally will be one-half the state's most recent general obligation bond rate rounded up to the nearest one-tenth of a percent. SDACs may receive lower interest rates if they are approved by the State Water Board and they are necessary to make a project affordable.

The CWSRF is over matched at this point as explained below. Therefore, the State Water Board did not offer the match financing option during SFY 09/10.

3. Provide a State Match

The State Water Board meets its match requirement by identifying state funds equal to at least 20 percent of the capitalization grant amount as detailed in Note 6, Pages 12-15 of Exhibit A. As of the end of SFY 09/10, the total capitalization grants awarded were \$2.309 billion. Of this amount, \$280 million did not require the 20 percent match because the funds were from ARRA. As of June 30, 2010, the State Water Board drew \$2.011 billion in CWSRF federal grants that required

a 20 percent match. The required match for the federal grants drawn by the State Water Board was \$402 million.

California uses a combination of state general obligation bonds repaid outside the CWSRF and funds contributed by applicants to the CWSRF to meet the 20 percent match requirement. A total of \$619 million in matching funds has been contributed to the CWSRF as seen in Table 2 of Note 6 of Exhibit A. Therefore, California contributed \$216 million more to the CWSRF than is required to match grants drawn as of June 30, 2010. (Note: The National Information Management System (NIMS) Report includes all state match contributed to the CWSRF.)

4. Binding Commitments Within One Year

The State Water Board must make binding commitments, in the form of executed financing agreements, to provide assistance in an amount equal to 120 percent of each federal quarterly payment within one year of that payment. By the end of SFY 09/10, executed binding commitments totaled \$5.337 billion (Note 4, Pages 8-11 of Exhibit A), or 231 percent of the \$2.309 billion in federal payments received as of the end of SFY 09/10.

5. Expeditious and Timely Expenditure

Numerous factors contribute to meeting this objective. The State Water Board's standard practice is to encumber federal funds before other sources of funds. The State Water Board also set a goal in its SFY 09/10 IUP to over commit available funds by 105 percent. Both factors contribute to the goal of efficiently using cash available to the Program.

Expenditure (disbursement) of CWSRF funds begins soon after a binding commitment is made. Financing recipients request disbursements to cover past planning and design costs. These requests are quickly followed by requests for disbursement of construction costs. Financing recipients can request disbursements as often as they want.

Disbursement requests are processed on a strict timeframe to ensure timely expenditure. State Water Board staff review and approve disbursement requests within seven calendar days after receipt. The request is then transmitted to the State Water Board's accounting department. The accounting department processes the request within seven calendar days after it receives it and transmits the request to the State Controller's Office (SCO). The SCO then has 10 calendar days to issue the warrant (check) to the applicant.

The State Water Board draws federal funds from the US Treasury via the Automated Standard Application for Payments (ASAP) system as warrants are issued by the SCO. Draw requests are made within one week of a warrant being issued. ASAP is a request and delivery system of federal funds developed by the Financial Management Service of the US Treasury and the Federal Reserve Bank. By using ASAP, the State Water Board is able to draw funds from the US EPA for expenditures incurred by the CWSRF in an expeditious and timely

manner. Requested funds are deposited electronically the next business day to the account(s) specified by the State Water Board.

Federal draws are requested through ASAP on a monthly basis for the prior month's administration costs.

A way to measure the expeditious and timely expenditure of funds is to compare the amount of federal funds disbursed (drawn from the US Treasury) with the total federal payments and grant awards to the State Water Board. As of June 30, 2010, \$2.106 billion in federal funds were disbursed. The CWSRF Program received \$2.309 billion in federal payments and 2.309 billion in federal grant awards. Therefore, as of June 30, 2010, 91 percent of the total federal payments were disbursed and 91 percent of the total federal grant awards were disbursed. (Note 6, Page 13, of Exhibit A).

State Water Board staff also periodically compares the rate at which applicants are requesting disbursements with the progress of construction on their projects. Applicants are given appropriate reminders if they appear to be falling behind with their projected disbursements.

6. First Use of Funds for Enforceable Requirements

California met the first-use requirement by providing financial assistance to those projects on its National Municipal Policy (NMP) list that do not meet any of the criteria under part III.B.5. (pp 11-12 of US EPA's "Initial Guidance for State Revolving Funds"). The state ensured that all listed projects are on enforceable schedules. California's program has now been expanded to other water quality needs.

7. Eligible Activities

California requires each applicant to submit a detailed application to ensure that US EPA's eligibility requirements are followed. All activities financed were eligible under Section 212, Section 319, or Section 320 of the CWA.

8. Disabled Business Enterprise (DBE) Objectives and Davis-Bacon Requirements

The State Water Board negotiated a total fair share DBE objective with the US EPA beginning Federal Fiscal Year 2007 for the CWSRF program.

The objective was 24.0 percent for minority owned business enterprises (MBE) and 6.0 percent for women owned business enterprises (WBE) participation for a combined 30.0 percent goal. The participation on CWSRF financing agreements reported by financing recipients in SFY 09/10 was 5.0 percent for MBE and 2.0 percent for WBE. The overall DBE participation was 7.0 percent; while not meeting the actual goal, we did meet 23 percent of the combined goal. Exhibit C provides a detailed analysis of DBE participation from July 1, 2009 through June 30, 2010. The State Water Board will continue to monitor participation to ensure that the positive effort process is followed by financing recipients.

All projects financed during SFY 09/10 were required to comply with Davis-Bacon prevailing wage requirements. Each financing agreement included provisions requiring applicants to follow Davis-Bacon requirements. Staff reviews reports and verifies that sub-recipients have complied with all Davis-Bacon requirements. Staff maintains tracking mechanisms to ensure that federal quarterly baseline monitoring requirements are met. Records of all documents and site inspection reports are maintained in the project files. The staff will review the quarterly site inspection reports annually to determine if the number of site inspections is satisfactory and modifications to the control activities are needed.

DFA and DAS staff meet bi-monthly to discuss financial, accounting, and control issues related to the program such as DBE and Davis Bacon.

9. Use of Capitalization Grant Administration Allowance

A portion of the CWSRF may be used for administration of the program. Up to 4.0 percent of the amount in capitalization grants awarded to the program may be used for administration. Total capitalization funds granted to date equal \$2.309 billion.

The administration cost (administrative expenses) incurred during SFY 09/10 was \$7.019 million. This included Personnel Services of \$4.102 million, Operating Expenses of \$2.908 million, and Bond Expenses of \$9 thousand (Page 2 of Exhibit A).

The cumulative total for administration cost is \$85 million. Therefore, 3.65 percent of the capitalization grants awarded to date have been incurred in administering the program leaving a balance of \$7.810 million available for future administrative expenses.

The administrative expenses for SFY 99/00 through SFY 09/10 are shown in Table 2 below.

Table 2: Administrative Expenses for SFY 1999/2000 through 2009/2010								
FFY Grant Year	Capitalization Grant Amount	4% Admin. Allowance	Actual Admin. Costs	Difference between Allowance and Expenses	Admin. Surplus	Cumulative Grant Amount including in kind	Cumulative Admin. Costs	Percent of Grant
2000	\$ 95,987,727	\$ 3,839,509	\$ 4,099,786	\$ (260,277)	\$ 10,259,772	\$ 1,329,586,055	\$ 42,923,670	3.23%
2001	\$ 95,134,446	\$ 3,805,378	\$ 4,851,968	\$ (1,046,590)	\$ 9,213,182	\$ 1,424,720,501	\$ 47,775,638	3.35%
2002	\$ 95,346,405	\$ 3,813,856	\$ 5,251,394	\$ (1,437,538)	\$ 7,775,644	\$ 1,520,066,906	\$ 53,027,032	3.49%
2003	\$ 94,726,665	\$ 3,789,067	\$ 4,168,440	\$ (379,373)	\$ 7,396,271	\$ 1,614,793,571	\$ 57,195,472	3.54%
2004	\$ 94,783,887	\$ 3,791,355	\$ 4,274,162	\$ (482,807)	\$ 6,913,464	\$ 1,709,577,458	\$ 61,469,634	3.60%
2005	\$ 82,745,541	\$ 3,309,822	\$ 4,102,135	\$ (792,313)	\$ 6,121,151	\$ 1,792,322,999	\$ 65,571,769	3.66%
2006	\$ 46,383,876	\$ 1,855,355	\$ 3,422,947	\$ (1,567,592)	\$ 4,553,559	\$ 1,838,706,875	\$ 68,994,716	3.75%
2007	\$ 92,791,710	\$ 3,711,668	\$ 4,540,867	\$ (829,199)	\$ 3,724,360	\$ 1,931,498,585	\$ 73,535,583	3.81%
2008	\$329,208,091	\$ 13,168,324	\$ 4,009,832	\$ 9,158,492	\$ 12,882,852	\$ 2,260,706,676	\$ 77,545,415	3.45%
2009	\$ 48,667,707	\$ 1,946,708	\$ 7,019,543	\$ (5,072,835)	\$ 7,810,017	\$ 2,309,374,383	\$ 84,564,958	3.65%

10. ARRA Requirements

All ARRA funds were committed to projects that were under construction or under contract as of February 17, 2010. ARRA required that a minimum of 50 percent be used to provide additional subsidy to recipients in the form of principal forgiveness, negative interest rates, or grants. The State Water Board provided additional subsidy in the form of principal forgiveness. A total of 65 percent of ARRA funds was provided as principal forgiveness. ARRA required that a minimum of 20 percent of the funds be for green projects (water efficiency, energy efficiency, green infrastructure, and environmental innovation projects). A total of 28 percent of ARRA funds were used for green projects.

11. Federal Cross-Cutters

All projects funded by the CWSRF Program must comply with certain federal laws known as “super cross-cutters.” A broader category of federal laws, the “federal cross-cutters,” apply only in an amount equal to the Capitalization Grants received by the CWSRF Program. Through September 2008, DFA demonstrated compliance with federal cross-cutters on all projects (about \$4.0 billion in financing) provided by the CWSRF Program. The CWSRF Program will receive about \$2.3 billion in grants from US EPA through the FFY 2010.

The Operating Agreement allows for two levels of environmental review for CWSRF projects. The State Water Board used its alternative environmental review process, also known as the Tier II review, for projects during SFY 09/10. The Tier II review generally follows the requirements of California Environmental Quality Act. All applicants, however, must complete and submit an “Evaluation Form for Environmental Review and Federal Coordination.” State Water Board staff conducts a Tier I review, including federal agency distribution and consultation, for projects with known or suspected effects under federal environmental cross-cutting regulations. If a project can adequately document that there will be “no effect” under federal environmental cross-cutting regulations, then a Tier II review is conducted.

D. Financial Activity

1. Financial Statements

Audited Financial Statements for the period ending June 30, 2010 are displayed in Exhibit A. Included in the exhibit are the 1) *Statements of Net Assets*, 2) *Statements of Revenues, Expenses and Changes in Net Assets*, 3) *Statements of Cash Flows*, 4) accompanying notes to the financial statements, and 5) reports required by the Single Audit Act Amendments of 1996.

The Financial Statements provide a more detailed view of the CWSRF’s financial activity for the year as well as management’s analysis of the program’s financial condition.

2. Revenues

There are four main sources of funds for the State Water Board's CWSRF based on the Financial Statements. The total contributions for SFY 09/10 were \$202 million. Contributions for the period of this report were as follows (Page 2 – Exhibit A):

- US EPS's ARRA capitalization grant – Principal Forgiveness of \$56 million
- US EPA's capitalization grant contributions of \$57 million
- US EPA's ARRA capitalization grant contributions of \$35 million
- State match revenue of \$214 thousand
- Interest income of \$52 million
- Net investment income and other contributions of \$1.8 million

3. Disbursements and Expenses

Total disbursements are based on the Financial Statements and do not include matching funds provided by financing recipients. Total disbursements for SFY 09/10 were \$398 million. Disbursements for the period of this report were made as follows (Page 3 – Exhibit A):

- Financing agreement disbursements - \$303 million
- Principal forgiveness disbursements - \$56 million
- Interest paid on revenue bonds - \$8.103 million
- Principal paid on revenue bonds - \$24 million
- Cash paid to employees and vendors - \$6.534 million
- Bond fees - \$9 thousand

4. Extended Term Financing

The State Water Board received many requests for Extended Term Financing (ETF) over the past few years. In October 2008, US EPA approved the State Water Board's request to implement ETF for DACs. The State Water Board received additional guidance from US EPA in April 2009. As defined by the State Water Board, a DAC is a community with a population of less than 20,000 persons and either 1) a community median household income (MHI) less than 80 percent of the statewide MHI or 2) a community with a sewer rate more than 4.0 percent of the community's MHI. ETF is available to DACs with a MHI less than 80 percent of the Statewide MHI if wastewater rates are 1.5 percent or more of the DAC's MHI. A community with a sewer rate more than 4.0 percent of the community's MHI may request approval of ETF from the State Water Board.

US EPA approved the State Water Board's request to implement ETF on condition that it does not decrease the CWSRF's financing level by more than 10 percent. The State Water Board estimated that providing 20 percent of its financing as ETF will not cause its overall level of financing to drop by more than 10 percent.

During SFY 09/10, nine (9) DACs received \$170,599,431 in ETF, as follows:

- Ventura County, El Rio Phase 5A - Project No. C-06-4680-110; Agreement No. 08-815-550, amended to provide \$6,868,809 in ETF;
- City of Colusa - Project No. C-06-4438-110; Agreement No. 07-828-550-0, amended to provide \$15,500,000 in ETF;
- City of Colfax - Project No. C-06-4470-110; Agreement No. 07-836-550, amended to provide \$7,485,865 in ETF;
- City of Crescent City - Project No. C-06-4699-110; Agreement No. 07-812-550-0, amended to provide \$43,814,176 in ETF;
- City of Placerville - Project No. C-06-4955-110; Agreement No. 05-802-550, amended to provide \$42,906,467 in ETF;
- City of Live Oak - Project No. C-06-5042-110; Agreement No. 09-802-550, received \$16,000,000, of which \$6,000,000 is ETF;
- Linda County Water District - Project No. C-06-5098-110; Agreement No. 09-800-550, received \$36,541,671, of which \$26,541,671 is ETF;
- Ventura County Service Area No. 34 - Project No. C-06-4680-120; Agreement No. 09-842-550, received \$13,000,000, of which \$4,563,500 is ETF;
- City of Williams - Project No. C-06-4049-110; Agreement No; 09-860-550, received \$16,918,943 in ETF.

The CWSRF provided approximately \$615 million in financing during SFY 09/10. Based on the analysis done to support its request for ETF, the CWSRF should be able to provide 20 percent of its financing, or approximately \$123 million in SFY 09/10, as ETF without reducing its overall financing level by more than 10 percent. The CWSRF provided about \$170.6 million, or 28 percent, of its SFY 09/10 financing as ETF. In SFY 09/10 five of the nine projects receiving ETF were previously approved financing agreements.

Since ETF inception in SFY 08/09, the State Water Board has provided a total of \$180.9 million in ETF to 11 projects. In a letter dated April 2009, the US EPA granted the State Water Board authority to make procedural changes to ETF implementation as outlined in the State Water Board's February 2009 request letter. Specifically, the February 2009 letter requested the ability to provide additional ETF at the onset of the ETF program in order to meet the overwhelming demand, realizing that this increase will limit amount of ETF the State Water Board will be able to provide in the future.

With the current need of DAC's, the State Water Board provided eight percent more ETF financing in SFY 09/10 than our analysis projected annually. In SFY 08/09 we only provided two percent in ETF financing. Adding the two years

together leaves us below our projected 20 percent annually. We are monitoring our funds for ETF to keep our financing level from dropping more than 10 percent.

5. Reduced Interest Rate

The March 2009 amendment to the CWSRF Policy allows a DAC with wastewater rates of 1.5 percent or more of the DAC's MHI to receive a reduced interest rate of not less than zero percent (0%) if based on the credit review results, ETF is insufficient to make the project affordable to the DAC. The State Water Board offered a reduced interest rate of zero percent (0%) to one (1) DAC in SFY 09/10, as follows:

- a. City of Williams - Project No. C-06-4049-110; Agreement No. 09-860-550, received \$16,918,943.

6. Service Charges for Administration and Small Community Grant Fund

State law allows the CWSRF to collect two service charges on loans: one to provide a backup source of revenue for administration and the other to provide revenue for wastewater grants to SDACs. The total service charge collected for administration revenue during SFY 09/10 was \$9.114 million. (See Exhibit F)

Service charge revenue up to \$50 million may be collected through 2014 to collect funds for grants to SDACs for wastewater projects. The total service charge collected for wastewater grant revenue during SFY 09/10 was \$2.755 million. (See Exhibit F)

7. Credit Risk of the CWSRF

Each financing recipient must pledge one or more dedicated sources of revenue toward payment of its CWSRF agreement. Dedicated sources of revenue can be sewer rate revenue pledges, general tax pledges, or other contractual income.

As of June 30, 2010, the CWSRF had no defaults, but had one agreement termination. The termination was necessary because the applicant, the Los Osos Community Services District, stopped construction of its project in late 2005. The State Water Board officially terminated the agreement on December 13, 2005. Since the original bad debt allowance was established for this loan, the recipient has been working with the Court and its creditors to settle claims against it. At present, the case appears to be nearing a settlement.

In 2010, the allowance for bad debt was increased by \$2.87 million to \$9.36 million. The increase was made to recognize that a loan recipient, the City of Placerville, requested that the CWSRF restructure its loan repayments due to a cash flow shortfall caused by the economic downturn. The loan recipient is in the process of adjusting sewer and tax rates to meet longer term cash flow needs, and expects to repay the loan in full.

The State Water Board continues to vigorously pursue all legal means for full recovery of the funds disbursed to these recipients.

IV. ENVIRONMENTAL BENEFITS

The contributions of the CWSRF to water quality are diverse and hard to quantify. This is not a weakness of the program, but instead indicates its strength and versatility in addressing a wide range of water quality issues. The data and graphics below summarize the environmental benefits derived from the CWSRF projects funded during SFY 09/10. The data supporting this summary has been transmitted to US EPA via the CWSRF Benefits Reporting (CBR) Database. The data indicate that the CWSRF protected or restored a wide range of beneficial water uses.

A. Projects in SFY 09/10 Will Help Achieve and Maintain CWA Goals

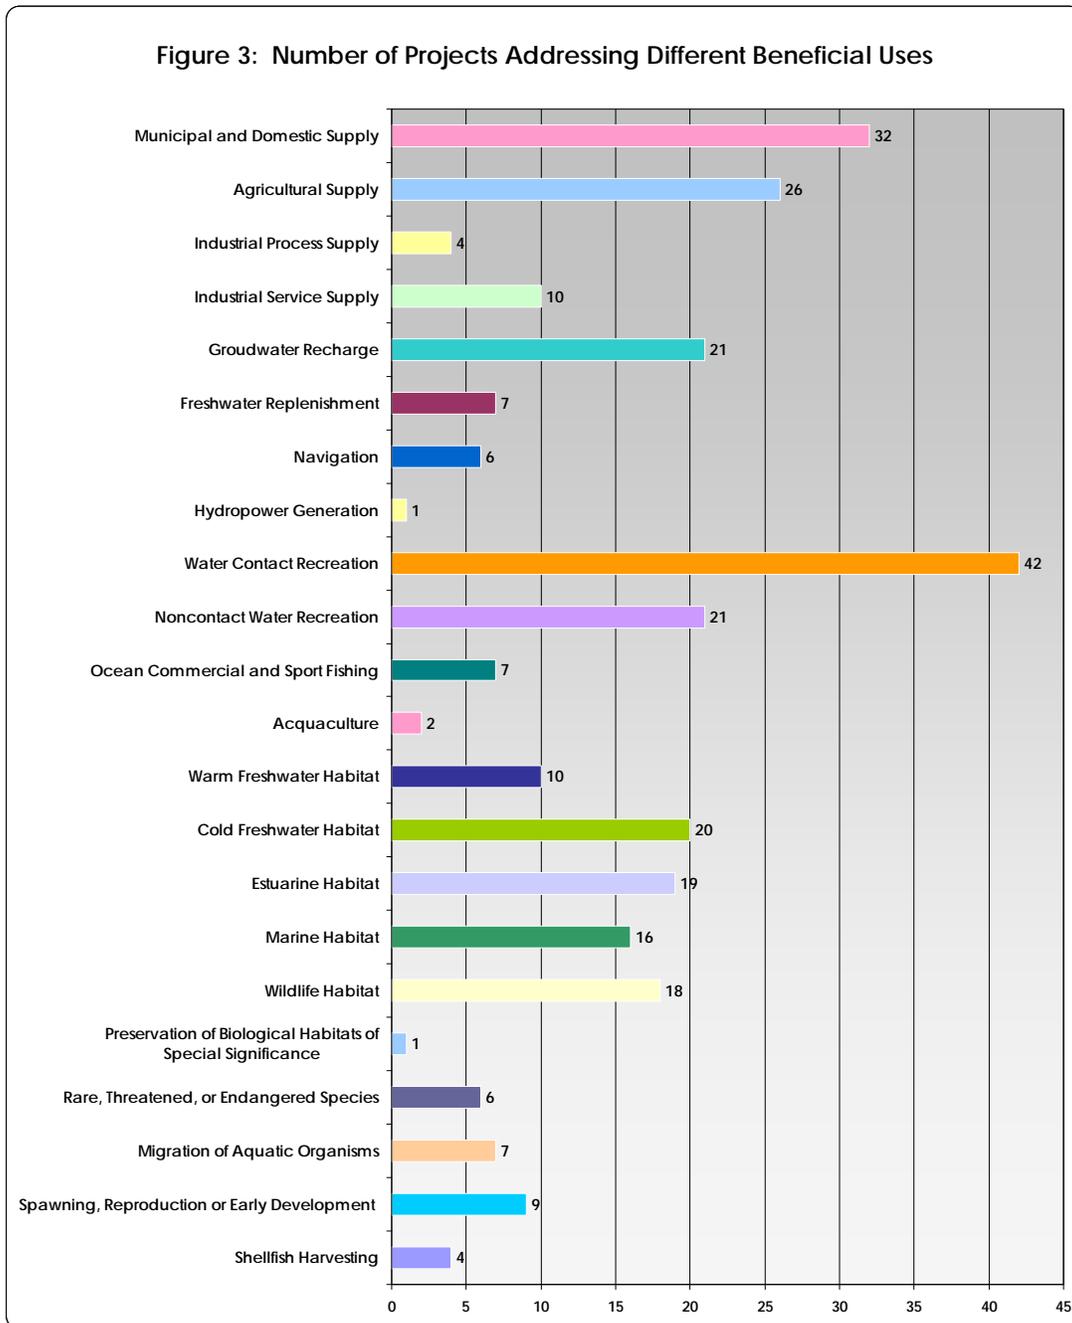

- Funded projects will treat approximately 1,116 million gallons per day (mgd) of wastewater.
- Funded projects will serve 18.5 million people statewide.
- Recipients received more than \$508 million in CWSRF subsidy (the subsidy is the amount of funds saved by recipients due to the reduced interest rate and principal forgiveness on CWSRF financing).

B. CWSRF Projects Achieve Multiple Benefits

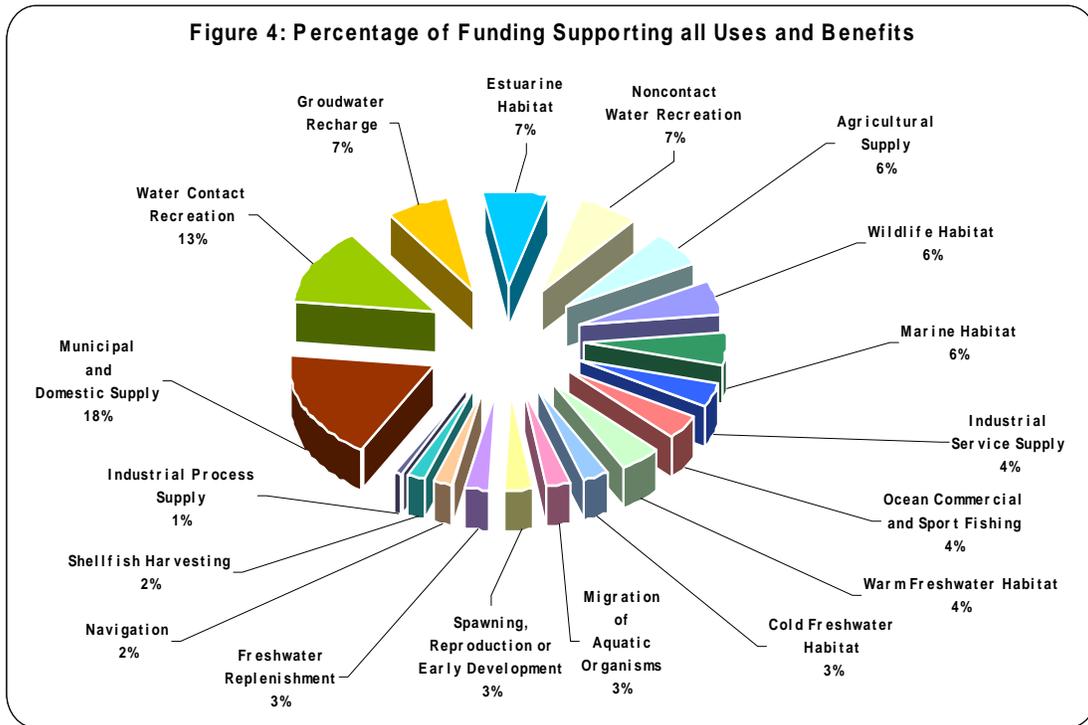

Each CWSRF project quantifiably benefits water quality in more than one way. Each project was evaluated to determine how it benefits water quality. The funding provided for each water quality area in SFY 09/10 is shown below.

- Improve water quality: \$505.6 million
- Recycle wastewater: \$266.8 million
- Protect groundwater: \$83.3 million
- Protect municipal and domestic supply: \$294.2 million
- Achieve compliance: \$325.2 million
- Protect and restore drinking water sources: \$34.3 million
- Protect and restore cold freshwater, estuarine and wildlife habitat: \$253.4 million

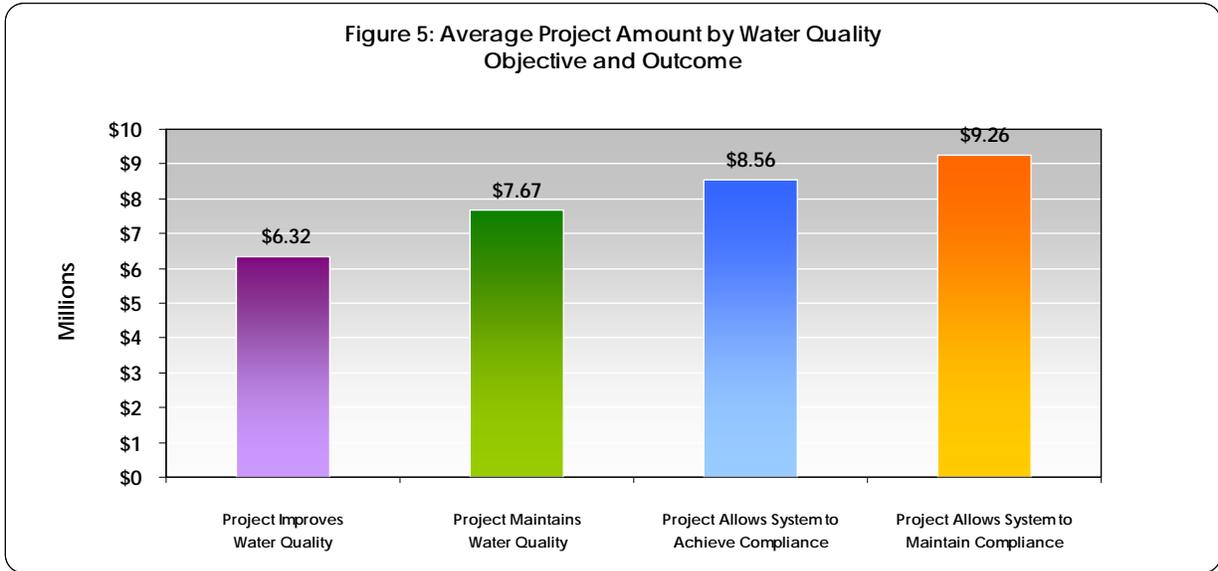

Figure 3 (below) provides a different view of the benefits provided by the CWSRF projects funded in SFY 09/10. Figure 3 shows how many projects addressed designated beneficial uses identified in state water quality control plans.

Another way to display the large breadth of environmental benefits from CWSRF projects is shown in Figure 4 (below). Figure 4 shows a breakdown of funding supporting different designated beneficial uses and other water quality benefits in comparison to all the funding provided by the CWSRF in SFY 09/10. As can be seen, the CWSRF in SFY 09/10 contributed broadly to support and protect many different environmental benefits.

Many of the water quality projects undertaken today are expensive and large. This reflects the level needed to continue to improve water quality. Figure 5 (below) shows the average project cost for different project types. The ability of the CWSRF to fund such large projects is one of its greatest strengths. Many agencies would not be able to secure such large funding levels from one provider if the CWSRF was not available.

C. Highlights of Projects Funded by CWSRF in SFY 09/10

Amador Water Agency (Amador County) received \$375,612 to expand the wastewater disposal field in the disadvantaged community of Gayla Manor.

American Rivers (Nevada County) received \$375,000 to address stormwater management in a disadvantaged community within the Yuba River watershed. This green project will reduce sediment and pollutants in the River.

Green Infrastructure Stormwater Management

Association of Bay Area Governments (Santa Clara County) received \$1,817,010 to reduce urban pollutants in San Francisco Bay.

Association of Bay Area Governments (San Francisco County) received \$5,000,000 to install trash capture devices to reduce trash in San Francisco Bay.

Association of Bay Area Governments (Contra Cost County) received \$392,000 for the El Cerritos Green Streets project. The project will build two curbside rain gardens that will reduce urban runoff into local creeks and San Francisco Bay.

California Land Stewardship Institute (Mendocino County) received \$375,542 to implement the Fish Friendly Farming Program.

California Sportfishing Protection Alliance (Napa County) received \$109,963 to implement priority watershed actions for Suisun Creek. The project brought together landowners to implement an adaptive community approach to restoration and sustainable watershed management.

Central Coast Agricultural Water Quality Coalition (Santa Cruz County) received \$430,269 to promote sustainable, grower friendly practices to address local water quality.

Central Coast Vineyard Team (San Luis Obispo) received \$138,302 to promote sustainable, grower friendly practices, to address local water quality.

City of Alameda (Alameda County) received \$750,000 to install rash racks at the City's Main Street and Webster Street Pump Stations to prevent trash from entering San Francisco Bay.

City of Anaheim (Los Angeles County) received \$230,000 to construct a system for filtering stormwater discharge into the groundwater.

City of Angels (Calaveras County) received \$3,372,800 to construct its Wastewater Improvement Project Phase III.

City of Antioch (Contra Costa County) received \$2,080,842 for the Markley Creek Remediation Project. The project removed municipal waste from the Creek after failure of landfill containment adjacent to the south bank and restored the Creek banks.

City of Big Bear (San Bernardino County) received \$1,370,686 to modify and improve Lift Station 2/2A and replace the sewer line and manholes along Tahoe Drive.

City of Brawley (Imperial County) received \$24,595,000 to expand its Wastewater Treatment Facility.

City of Burlingame (San Mateo County) received \$5,605,800 to build an emergency retention basin to accommodate peak storm flows at the wastewater treatment plant.

City of Chico (Butte County) received \$5,422,120 to replace its antiquated wastewater outfall pipeline and diffuser.

City of Colfax (Placer County) received \$3,370,830 to upgrade four sewer lift stations, eliminate of two lift stations, and replace and repair sewer lines and manholes.

City of Colfax - Upgraded lift stations.

City of Del Mar (San Diego County) received \$5,000,000 to replace a 35 year old sewer pump station.

City of Fresno (Fresno County) received \$999,468 to construct the Herndon Town and Cortland/Fountain Way Sewer System.

City of Galt (Sacramento County) received \$16,631,000 to upgrade its wastewater treatment plant with filtration system and Ultra Violet (UV) disinfection system.

City of Hermosa Beach (Los Angeles County) received \$1,265,000 to capture and treat stormwater and urban runoff in the downtown commercial corridor to keep the runoff from reaching the ocean.

City of Hughson (Stanislaus County) received \$21,485,832 to upgrade and expand its wastewater treatment plant.

City of Hughson - Wastewater Treatment Site

City of Kerman (Fresno County) received \$6,957,479 to upgrade and expand its wastewater treatment facility

City of La Mesa (San Diego County) received \$3,376,922 to replace existing sewer lines with new pipe.

City of Live Oak (Sutter County) received \$16,000,000 to upgrade its existing wastewater treatment plant.

City of Long Beach (Los Angeles County) received \$403,200 to install a full capture trash net system in the forebay.

City of Long Beach (Los Angeles County) received \$551,845 to install a Vortex Separation System (VSS) to capture trash on a large storm drain leading to the Los Angeles River.

City of Long Beach (Los Angeles County) received \$539,634 to install a Trash Separation Device in one of the City's stormwater pump station.

City of Malibu (Los Angeles County) received \$820,096 to replace Paradise Cover Stormwater Treatment System.

City of Millbrae (San Mateo County) received \$28,397,180 to renovate the City's aging wastewater treatment plant.

City of Mission Viejo (Orange County) received \$1,045,000 its green infrastructure project to restore and protect Oso Creek.

City of Oakdale (Stanislaus County) received \$13,030,000 to upgrade their wastewater treatment facility.

City of Oakland (Alameda County) received \$3,450,000 install trash capture devices and eliminate other pollutants before they enter City waterways.

City of Oakland (Alameda County) received \$1,300,000 to provide rain barrels for irrigation and reduce the effects of stormwater on local and regional water resources.

City of Palo Alto (Santa Clara County) received \$8,500,000 to upgrade the regional wastewater plant's chlorine disinfection process to a UV disinfection process.

City of Palo Alto - Replacing UV disinfection facility

City of Piedmont (Alameda County) received \$ 1,900,188 to rehabilitate a portion of its sewer collection system.

City of Plymouth (Amador County) received \$2,817,273 for its Wastewater Treatment Plant (WWTP) Improvements and Inflow/Infiltration (I/I) reduction project.

City of Plymouth - Improvement to the inflow/infiltration

City of Redding (Shasta County) received \$12,122,280 for Clear Creek wastewater treatment plan expansion and upgrade project.

City of Redondo Beach (Los Angeles County) received \$2,200,000 for a project that will divert, treat, store and reuse urban runoff for landscaping irrigation in Alta Vista Park.

City of Rio Dell (Humboldt County) received \$2,176,657 to improve the solids handling and disinfection processes at its wastewater treatment plant.

City of San Diego (San Diego County) received \$34,918,555 to improve grit processing at its Point Loma wastewater treatment plant.

City of Santa Barbara (Santa Barbara County) received \$3,441,585 for two projects. The first project will keep trash out of local creeks, estuaries, and the ocean. The second project will create a permanent rain garden to help restore and protect Upper Las Positas Creek and serve as an outdoor classroom on water quality, wetland processes, and local ecology.

City of Santa Cruz (Santa Cruz County) received \$489,308 to reduce the discharge of bacterial laden storm water from pump stations.

City of Selma (Fresno County) received \$3,918,620 to install stormwater treatment systems and detention basin facilities.

City of South Lake Tahoe (El Dorado County) received \$1,500,000 to improve its stormwater collection system to encourage further infiltration.

City of South Lake Tahoe (El Dorado County) received \$1,675,000 to retrofit an existing neighborhood to stabilize soils and prevent nutrients from entering Lake Tahoe.

City of Thousand Oaks (Venture County) received \$907,500 to install trash filters, catch basins, and clarifiers to capture contaminants before they enter the City's stormwater system and local creeks.

City of Wasco (Kern County) received \$2,000,000 to install a sludge centrifuge at its wastewater treatment plant.

City of Williams (Colusa County) received \$16,918,943 to upgrade the current wastewater treatment plant.

Community Alliance with Family Farmers Foundation (Colusa County) received \$519,780 to implement management practices to reduce the runoff of sediment and pesticides from almond orchards adjacent to the Colusa Basin Drain.

County of Napa received \$977,307 to rehabilitate the Napa River.

County of Placer received \$3,000,000 to implement the Kings Beach Watershed Improvement Project.

County of Santa Cruz received \$287,532 to reduce sediment, nutrient and pesticide NPS pollution to impaired waters in Santa Cruz County.

County of Santa Cruz Resource Conservation District received \$174,479 to work with the San Benito County Resource Conservation Districts (RCDs) to reduce sediment, nutrients, and pesticides in local waterways.

County of Santa Cruz Resource Conservation District received \$1,578,774 to implement Phase II of the Integrated Watershed Restoration Program (IWRP) for Santa Cruz County.

County of Ventura received \$13,000,000 to construct Phases 5B, 5C and 5D of the El Rio septic to sewer replacement project.

Covelo Community Services District (Mendocino County) received \$1,694,356 to upgrade its wastewater treatment plant. Covelo is a disadvantaged community.

Del Norte County Service Area No.1 (Del Norte County) received \$1,326,013 to replace outdated sewer collection lines.

Delta Diablo Sanitation District (Contra Costa County) received \$6,405,136 to construct pipeline, pump station, and a reservoir to provide 487 acre feet per year of recycled water to five users including four city parks and a golf course.

Donner Summit Public Utilities District (Nevada County) received \$1,478,000 to assist the District with evaluating and planning alternatives for a permit compliance project.

Eastern Municipal Water District (Riverside County) received \$43,546,128 for their Moreno Valley Regional Water Reclamation Facility Acid Phase Anaerobic Digester.

Fairfield-Suisun Sewer District

(Solano County) received \$11,100,000 to upgrade its chlorine disinfection system to an ultraviolet disinfection system.

Fresno Metropolitan Flood Control District

(Fresno County) received \$3,892,600 to construct stormwater conveyance and recycling facilities at 16 sites in Fresno's urban core.

Friends of the Santa Clara River

(Ventura County) received \$217,818 to remove invasive plants and reintroduce native riparian and wetland plants along the Santa Clara River.

Garberville Sanitary District (Humboldt County) received \$2,290,415 to upgrade its wastewater treatment plant.

Gateway IRWM Authority (Los Angeles County) received \$10,000,000 to help the 16 Gateway cities eliminate trash from the stormwater systems leading to the ocean.

Installed Catch Basins

Inland Empire Utilities Agency

(San Bernardino County) received \$3,493,463 for the recycled water pipeline project.

Inland Empire Utilities Agency

(San Bernardino County) received \$5,789,720 to purchase and modify the existing reservoir at the Cucamonga Valley Water Districts site and construct a new water pump station.

Inland Empire Utilities Agency

(San Bernardino County) received \$5,658,238 for the recycled water pipeline that will transport recycled water to the San Sevine groundwater recharge basin.

Inland Empire Utilities Agency

(San Bernardino County) received \$1,688,748 for the Church Street Lateral Project.

Inland Empire Utilities Agency

(San Bernardino County) received \$27,434,811 to expand the dewatering capacity at the regional wastewater plant.

Inland Empire Utilities Agency

(San Bernardino County) received \$773,045 to restore wetland that will remove viruses, bacteria, and nutrients, and will prevent stream bank erosion.

Inland Empire Utilities Agency

(San Bernardino County) received \$298,244 for the Prado Basin clean-up and restoration project.

Inland Empire Utilities Agency

(San Bernardino County) received \$1,471,491 to improve habitat and restore the riparian ecosystem along Chino Creek.

Las Gallinas Valley Sanitary District

(Marin County) received \$6,122,500 to improve the primary clarification system at its wastewater treatment plant.

Linda County Water District (Yuba County) received \$36,541,671 to upgrade its wastewater treatment plant to address new permit requirements.

Literacy for Environmental Justice

(San Francisco County) received \$350,160 to add on-site stormwater capture and reuse features at its Herons Head Park educational EcoCenter.

London Community Services District (Tulare County) received \$1,652,940 to upgrade its wastewater treatment plant to improve operation flexibility.

Construction of aeration pond

Los Angeles County Sanitation (Los Angeles County) received \$12,381,145 to rehabilitate sewers and manholes, construct eight new manholes, and remodel one existing manhole.

Los Angeles County Sanitation District (Los Angeles County) received \$70,000,000 to upgrade the Palmdale Water Reclamation Plant.

City of Los Angeles Department of Public Works (Los Angeles County) received \$1,777,838 for construction and installation of a storm drain diversion at the Sawtelle Channel.

Los Penasquitos Lagoon Foundation (San Diego County) received \$1,237,656 to construct a sedimentation basin.

Marin Resource Conservation District (Marin County) received \$620,523 to implement voluntary improvement on agricultural lands.

Pacific Coast Fish, Wildlife and Wetlands Restoration Association (Humboldt County) received \$1,417,318 to reduce erosion from logging roads in the upper basin of the Redwood Creek watershed.

Port of San Francisco (San Francisco County) received \$1,548,645 to install a system that will eliminate fish waste from San Francisco Bay and collect storm water.

Regents of the University of California, San Diego (San Diego County) received \$2,644,400 for the Storm Water Pollution Prevention Projects (4 Projects).

Santa Cruz County Sanitation District (Santa Cruz County) received \$13,707,609 to relocate sewage collection system for New Brighton State Beach State Park and Campground.

San Mateo County Resource Conservation District (San Mateo County) received \$221,984 for the Implementation Project open to all farmers in coastal San Mateo watersheds draining into the Monterey Bay National Marine Sanctuary with water quality problems.

Santa Monica Bay Restoration Foundation (Los Angeles County) received \$1,889,662 to install low impact development (LID) rain gardens adjacent to Ballona Creek. The rain gardens will capture, treat, and infiltrate stormwater runoff.

Pre-Construction View of Rain Garden location.

Tahoe Resource Conservation District (El Dorado County) received \$220,090 to treat urban stormwater and restore the underlying and adjacent wetlands providing suitable habitat.

Town of Hillsborough (San Mateo County) received \$300,000 to purchase a water filtration system to eliminate dumping flush water to storm drains and local creeks.

Trinidad Rancheria (Humboldt County) received \$1,790,107 to construct a wastewater treatment plant to replace septic tanks that are affecting beach and harbor water quality.

Union Sanitary District (Alameda County) received \$2,052,841 to rehabilitate approximately 8,200 feet of sewer line.

Upper San Gabriel Valley Municipal Water District (Los Angeles County) received \$23,600,000 to provide 29 users with recycled water. Approximately 3,700 acre-feet of water will be produced for irrigation, reducing the need for imported water.

Western Municipal Water District (Riverside County) received \$4,479,326 for the Chino II Desalted Ultimate Expansion project.

Western Riverside County Agriculture (Riverside County) received \$115,153 to implement agricultural management practices that will reduce the runoff of agricultural pollutants.

Western Shasta Resource Conservation (Shasta County) received \$102,985 to Integrated Ecosystem Improvements for Shasta County Watersheds.

Yucaipa Valley Water District (San Bernardino County) received \$9,752,100 to will construct a brine disposal pipeline from the Withhold Regional Water Recycling Facility to the current end point of the Santa Ana Regional Interceptor (SARI) brineline.

V. PROGRAM CHANGES OR IMPROVEMENTS

During SFY 09/10, the State Water Board focused most of its effort on ARRA implementation. It did, however, make a number of noteworthy changes to the CWSRF program to make it more effective.

The State Water Board and Northridge continued to enhance the Loans and Grants Tracking System (LGTS), the CWSRF program's tracking and reporting database, to better track and report CWSRF and ARRA information to state and federal oversight agencies.

State Water Board staff continued its efforts to ensure that the CWSRF's financing agreements are secure and that all payments will be made on time in full. The State Water Board uses a variety of analysis and monitoring measures to reduce the possibility of non-payment, and continues to evaluate additional steps to ensure full and timely payment of all agreements.

State Water Board contracted with Public Financial Management, Inc. (PFM) in May 2010. PFM will give the CWSRF access to additional financial expertise.

In September 2008, AB 2356 was signed into law. It required the State Water Board to take several actions to assist DACs. AB 2356 in part allowed the State Water Board to collect up to \$50 million in fees on CWSRF agreements to be used for grants to SDACs for wastewater projects. The total service charge collected for wastewater grant revenue during SFY 09/10 was \$2.755 million. (See Exhibit F).

Staff at the State Water Board continues to enhance the CWSRF Web site. Davis Bacon information was launched on the CWSRF Web site in October 2009 to provide information to applicants and stakeholders. Web links to ARRA, Davis Bacon and RCAC were incorporated to provide applicants and stakeholders quick access to updates on information about the CWSRF program and training opportunities.

State Water Board executed a contract with RCAC to provide technical training to SDACs and DACs. Training to help California's small, rural and DACs more effectively plan for their long-term technical, managerial, and financial needs were provided from February to June 2010. There was no fee to attend the workshops. Priority was given to those from small, disadvantaged wastewater systems. Classroom workshops were provided in Napa (February 23), Visalia (February 18), Ukiah (March 30-31), Fortuna (April 28), McKinleyville (April 29), El Centro (May 11-12) and West Sacramento (June 2). The following are the list of online and classroom workshops available.

Online Workshops:

- Wastewater Basic Operations
- Wastewater Math Refresher
- Roles & Responsibilities
- Budgeting
- Financial Management
- Rate Setting

Classroom Workshops:

- Board Governance: Roles & Responsibilities
- Board Governance: Brown Act & Ethics
- Wastewater Operator Certification Test Preparation
- Wastewater Math
- Infiltration & Inflows and Sewer System Management Plans
- Capital Improvement Planning, Asset Management & Funding Options
- Operation and Maintenance Practices for Small Wastewater Utilities
- Wastewater Regulations, Laws & The Clean Water Act
- Rate Setting, Prop 218 & Community Outreach

VI. FUTURE CHANGES OR IMPROVEMENTS

A number of program changes planned in SFY 09/10 were delayed due to the additional work associated with ARRA and employee furloughs. State Water Board staff intends to return to these efforts during SFY 10/11. The focus of these efforts will be to streamline and improve the application process, revamp the priority setting and project selection process, and strengthen the CWSRF program's process and management controls. The aim of these efforts will be to make the program more efficient so that it supports both stakeholders and the State Water Board's water quality objectives.

Although LGTS accurately and efficiently tracks the business requirements of the CWSRF program, there are areas for improvement. Staff is working on a Feasibility Study Report (FSR) to upgrade LGTS to provide Web access to the system. The State Water Board will continue to enhance the functionality of the system to improve its information sharing and reporting capabilities.

State Water Board staff is also developing a request for proposal to provide technical assistance to small and disadvantaged communities. Staff intends to contract with community assistance organizations that can provide hands-on technical and financial expertise to help small and disadvantaged communities address the problems of complying with water quality requirements or completing projects to address water quality problems in the community. These efforts will complement the technical training contract executed in SFY 09/10.

The State Water Board was selected in January 2010 to participate in the Pilot Technical Assistance Program sponsored by the federal Departments of Housing and Urban Development, Transportation, and EPA. The Program is part of the HUD-DOT-EPA Partnership for Sustainable Communities. California is committed to community sustainability, and has taken an active role in exploring sustainable practices – especially as it relates to water quality and water resources. The project will help the CWSRF improve its priority setting system, and build on California's history of planning and coordinating with state transportation objectives to achieve common goals.

State Water Board marketing staff will continue their outreach efforts to increase participation in workshops and annual conferences held by community decision-makers throughout the State. This effort is vital for building relationships with communities and ensuring that customer service needs are met. In addition, the staff will develop new marketing material and use the IUP and Annual Report as marketing tools to showcase successful projects and highlight ways the CWSRF can assist potential applicants.

VII. INDEX OF ACRONYMS

Commonly Used Acronyms

ARRA – American Recovery and Reinvestment Act of 2009

ASAP – Automated Standard Application of Payments

CalMuni – California Municipal Securities, Inc.

CBR – CWSRF Benefits Reporting

CWA – Clean Water Act

CWNS – Clean Watershed Needs Survey

CWSRF – Clean Water State Revolving Fund (State Water Board)

DAC – Disadvantaged Community

DWQ – Division of Water Quality

ETF – Extended Term Financing

FFY – Federal Fiscal Year

FSR – Feasibility Study Report

IUP – Intended Use Plan

LGTS – Loans and Grants Tracking System

MBE – Minority Owned Business Enterprise

MGD – Million Gallons per Day

MHI – Median Household Income

NIMS – National Information Management System

NMP – National Municipal Policy

NPS – Nonpoint Source

PMI – Pooled Money Investment Bank

POTW – Publicly Owned Treatment Works

RCAC – Rural Community Assistance Corporation

RCD - Resource Conservation Districts

Regional Water Boards - Regional Water Quality Control Boards

RFP – Request for Proposals

SAG – Stakeholders Advisory Group

SCO – State Controller's Office

SDAC – Small Disadvantaged Communities

SFY – State Fiscal Year

State Water Board – State Water Resources Control Board

WBE – Women Owned Business Enterprise

WRFP – Water Recycling Funding Program

VIII. EXHIBITS

- Exhibit A – Audited Financial Statements and Notes
- Exhibit B – Projects Approval Status Report

Exhibit C – SFY 09/10 DBE Report

Exhibit C - SFY 09/10 DBE Report

DBE Annual Report - SFY 09/10			
	MBE	WBE	Total
July - September 2009	\$42,571.00	\$67,208.00	\$109,779.00
October - December 2009	\$299,198.00	\$385,378.00	\$684,576.00
Semi-Annual ARRA April - September 2009	\$571,670.87	\$29,760.00	\$601,430.87
January - March 2010	\$257,903.00	\$397,547.00	\$655,450.00
April - June 2010	\$245,086.00	\$390,911.00	\$635,997.00
Semi-Annual ARRA October 2009 to March 2010	\$2,642,986.53	\$594,518.92	\$3,237,505.45
Semi-Annual ARRA April - September 2010	\$2,037,995.53	\$887,493.42	\$2,925,488.95
Semi-Annual CAP Grant April - September 2010	\$566,477.64	\$5,968.75	\$572,446.39
Cumulative Total Fiscal Year 2009/10	\$6,663,888.57	\$2,758,785.09	\$9,422,673.66

Percentage to Total Disbursements Fiscal Year 2009/10**	5.0	2.0	7.0
--	------------	------------	------------

**percentage of DBE participation is determined by taking the percentage of MBE and WBE as compared to the total disbursements for the fiscal year for each category (ie. ARRA, NON-ARRA)
