

**AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009  
SECTION 1511 CERTIFICATION**

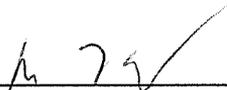

**City of South Lake Tahoe (City)  
Al Tahoe Erosion Control Project 1 (Project)  
Project No.: C-06-6109-110**

The authorized representative of the State Water Resources Control Board hereby certifies, and/or affirms that the Al Tahoe Erosion Control Project 1 (Project) has received the full review and vetting required by law and that such representative accepts responsibility that the Project is an appropriate use of taxpayer dollars. Subject to the provisions of the Financing Agreement, the following general description is provided in order to comply with Section 1511 of American Recovery and Reinvestment Act of 2009 (ARRA):

Project description: Al Tahoe Erosion Control Project 1 will upgrade the existing storm drain system in the Project area. The system now collects storm water and snow melt runoff which then pours untreated into Lake Tahoe. The area's bare earthen shoulders are a large source control problem in the Project area; eroding earthen shoulders contribute sediment (primarily fine particles) to the storm drain. In addition, these bare shoulders are severely compacted, reducing permeability. NPDES restricts the discharge of fine particles in storm water. As part of this Project the City will install a media filter system with pre-treatment vaults, replace obsolete drop inlets to provide additional pretreatment; restore infiltration capacity along road shoulders, and (funding dependent) replace or line the existing 36" CMP storm drain pipe. This Project will also provide additional infiltration in the area by installing edge treatment features in areas that would otherwise need to be connected to the storm drain system.

- Estimated total cost of the Project: two million, ninety four thousand dollars and no cents (\$2,094,000)
- Type of assistance: full principal forgiveness
- Estimated amount of ARRA funds to be used: one million, five hundred thousand dollars and no cents (\$1,500,000)
