

Hi Jeanine, Phil and Russell; the table below summarizes our comments:

Page	Section	Suggested Change	Rationale
C-4	B-3	Add the following to the end: "or when the treatment is complete."	Achieves consistency with page D-35-36 "X."
C-6	Table C-1, Footnote 5	In the 3 rd sentence, change "sampling events" to "application events"	Achieves consistency with the rest of the footnote.
C-6	Table C-1, Add new footnote	Clarify that six consecutive samples can be collected over more than one year	Clarification.
C-6	Table C-1, Add new footnote.	Clarify that the language in footnote 5 applies to copper and acrolein.	Not certain that for SIP exceptions there can be a reduction in sampling if < WQO 6 in a row.

Please contact me with any questions.

Regards,
