Re: Submittal of Revised Implementation Plans for Redondo Beach, Huntington Beach, and Alamitos Generating Stations in Accordance with the State Water Resources Control Board's Resolution No. 201-0020 and Adoption of a Policy for the Use of Coastal and Estuarine Waters for Power Plant Cooling

Dear Mr. Isorena:

I am writing on behalf of AES Southland, LLC ("AES"), owner of the Redondo Beach, Huntington Beach, and Alamitos Generating Stations (the "Facilities"). On April 1, 2011, AES submitted an Implementation Plan to the State Water Resources Control Board ("Board") for each of the Facilities, in accordance with the Board's Statewide Policy and Resolution No. 201-0020 for the Use of Coastal and Estuarine Waters for Power Plant Cooling. Certain corporate proprietary information and trade secrets were redacted from the Implementation Plans previously submitted.

Some of the confidential information provided to the Board on April 1, 2011, redacted and submitted under confidential cover, can now be made public. Specifically, AES is releasing the tentative schedule of its redevelopment plans for the Facilities, including the retirement and commercial operation dates for generating units to facilitate analysis by the Board and the California Independent System Operator. Other confidential information provided on April 1, 2011, remains confidential, however, and is being submitted today under separate cover to the Executive Director, with a request for continued confidential treatment. The revised public

Mr. Philip Isorena

version of the Implementation Plans submitted herein include information that was previously redacted in the April 1, 2011 submittal.

If you have questions regarding this submittal, please contact myself or Stephen O'Kane at AES at (562) 493-7840.

Very truly yours,

John A. McKinsey
