Dear Deborah Neiter;

This letter accompanies a report requesting a modification of the 303(d) list for the Los Angeles Region.

After a thorough observation of Echo Park Lake (List ID CA409.0910L), I feel that the current TMDL for trash in Echo Park Lake is insufficient to address the multitude of pollution issues in the body of water. Given the extensive human uses of the lake, including recreational boating and fishing, and the importance of the lake on the avian populations of the area, I feel that additional TMDLs for other sources of impairment, such as algal growth, should be added for this water body.

Enclosed is a complete report of my observations. I thank you for your time and for your dedication to cleaner water across the state.

Kind regards,

Stephanie L. Davenport
