Notes:

Sediments considered chemically "impacted" and planned for disposal within CAD cell.

ND = Not Detected at or above MDL for the particular analyte of interest

"--" = not tested

NR = not recorded

Notes:

Sediments considered chemically "impacted" and planned for disposal within CAD cell.

NT = Not Tested

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

Data Qualifiers:

B = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

NM = The matrix spike sample recovery is not within control limits. See case narrative.

Notes:

"Clean" sediments considered suitable for capping of CAD cell.

NT = Not Tested

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

Data Qualifiers:

B = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

NM = The matrix spike sample recovery is not within control limits. See case narrative.

Notes:

Sediments considered chemically "impacted" and planned for disposal within CAD cell.

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

μg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

"--" = not tested

Data Qualifiers:

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

Notes:

"Clean" sediments considered suitable for capping of CAD cell.

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

"--" = not tested

Data Qualifiers:

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL

Notes:

Sediments considered chemically "impacted" and planned for disposal within CAD cell

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

Total DDT = sum of 4,4'-DDE; 4,4'-DDD; and 4,4'-DDT

-- = not tested

Data Qualifiers:

I = The MRL/MDL has been elevated due to matrix interference (chromatographic interference for Organic).

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL

P = The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results (25% for CLP_Pesticides).

Notes:

"Clean" sediments considered suitable for capping of CAD cell

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

Total DDT = sum of 4,4'-DDE; 4,4'-DDD; and 4,4'-DDT

"--" = not tested

Data Qualifiers:

I = The MRL/MDL has been elevated due to matrix interference (chromatographic interference for Organic).

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

P = The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results (25% for CLP_Pesticides).

HSS19-48-3	0	--	--	--	--	--	--	--	--	--

Notes:

Sediments considered chemically "impacted" and planned for disposal within CAD cell.

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

"--" = not tested

Data Qualifiers:

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

P = The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results (25% for CLP_Pesticides).

Notes:

Sediments considered chemically "impacted" and planned for disposal within CAD cell.

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

"--" = not tested

Data Qualifiers:

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

Notes:

Sediments considered chemically "impacted" and planned for disposal within CAD cell.

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

Data Qualifiers:

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

B = Analyte was detected in associated method blank.

HSS19-49-2	45.4	ND	ND	28 B	ND	13 J	ND

Notes:

"Clean" sediments considered suitable for capping of CAD cell.

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

Data Qualifiers:

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

B = Analyte was detected in associated method blank.

Notes

"Clean" sediments considered suitable for capping of CAD cell.

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

-- = not tested

Total Phenols = sum of named compounds

2006 OHD Data					
TPH was not analyzed as part of this data set.					
2007 Navy Data					
TPH was not analyzed as part of this data set.					

Notes:

Sediments considered chemically "impacted" and planned for disposal within CAD cell.

ND = Not Detected at or above MDL for the particular analyte of interest

mg/kg = milligrams per kilogram/parts per million (dry weight unless noted)

µg/kg = micrograms per kilogram/parts per billion (dry weight unless noted)

-- = not tested

Data Qualifiers:

H = The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.

I = The MRL/MDL has been elevated due to matrix interference (chromatographic interference for Organic).

J = The result is an estimated concentration that is less than the MRL but greater than or equal to the MDL.

O = The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard

P = The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40 percent between the two analytical results (25% for CLP_Pesticides).

Z = The chromatographic fingerprint does not resemble a petroleum product.

Notes:

See WQ criteria tab for sources.

Koc and Kd values and sources are found on Koc/Kd sheet.

Diffusion coefficients from RAIS except for TBT - calculated using MW of TBT - see Deff & Mass Transfer tab.

Calculated as underlying bulk sediment concentration divided by Koc.

Comparison of EPA 2002 chronic values to maximum calculated sediment porewater underlying the cap.

Solubility from <http://rais.ornl.gov> (see solubility tab); for TBT, TBT oxide was used (Carl recommends).

See biodegradation tab for sources of biodegradation rates.

NOAA SQRT tables 2004
