

SALMON FOREVER
FINALIZED 15-MINUTE DATA

Stage, Discharge, Turbidity,
and Estimated Suspended Sediment Concentration

ISCO Station FTR
Freshwater Creek
120 Pacific Lumber Camp Road (4J070)
Freshwater - California

Hydrologic Year 1999
Period of Record: 1/13/99 18:00 to 8/1/99 00:00

RWQCB
REGION 1

MAY 14 2001

**SALMON FOREVER
FINALIZED 15-MINUTE DATA**

**Stage, Discharge, Turbidity,
and Estimated Suspended Sediment Concentration**

**Hydrologic Year 1999
Period of Record: 1/13/99 18:00 to 8/1/99 00:00**

**Compiled by
Benjamin S. Bray
For Salmon Forever
May 10, 2001**

Data Description By Column		
Column	Data Description	Abbreviation
1	Date, mm/dd/yy.	date
2	Time, hh:mm.	time
3	Data dump ID number.	dump
4	Suspended sediment sample bottle ID number.	bottle
5	Stage (water depth) in units of feet.	stg
6	Stage data quality code.	scode
7	Discharge in cubic feet per second.	discharge
8	Turbidity in nephelometric turbidity units or NTU.	turb
9	Turbidity data quality code.	tcode
10	Estimated suspended sediment concentration in milligrams per liter. HY 1999 Estimated sediment concentration was computed from a loess (locally weighted) regression of turbidity versus laboratory sediment concentration, based on all lab samples from hydrologic year 1999.	estssc
11	Water temperature in °C.	wtemp
12	Rainfall in inches.	rain

Stage and Turbidity Data Quality Codes	
ID	Description
0	Good (unadjusted)
1	Adjusted (in the case of stage data, raw data is often adjusted to agree with observer staff plate readings)
2	Interpolated; good
3	Interpolated; fair
4	Interpolated; poor

Note: Interpolations are defined as “good” if interpolation interval is small and the degree of uncertainty associated with stage or turbidity behavior over the interval is low. Interpolations are graded as “fair” or “poor” as time interval over which the interpolation is applied increases and the degree of uncertainty associated with stage or turbidity over the interpolation interval increases.
