# Cruise Report for the Surface Waters Ambient Monitoring Program (SWAMP) Bioaccumulation Screening Study in California Lakes and Reservoirs (FY 05-06) 

Sampling Dates: June 2007- March 2008

Written by: Billy Jakl<br>Maps by: Sean Mundell<br>CDFG/Marine Pollution Studies at Moss Landing Marine Laboratories<br>Updated: 04-03-08

### 1.0 Introduction

This report describes the sampling activities of the lakes and reservoirs in California for the SWAMP bioaccumulation of contaminants in fish tissue. Samples were collected for the SWAMP bioaccumulation oversight group (BOG) and State Water Quality Control Board (SWQCB) by California Department of Fish and Game (CDFG)/ Marine Pollution Studies Laboratory (MPSL) at Moss Landing Marine Laboratories (MLML). The SWQCB work was authorized via FY 05-06 in support of Work Order 06SWBG01. The work for the FY 05-06 SWAMP SWQCB collection effort is a screening study that focuses on the fishing beneficial use of lakes and reservoirs in California.

### 1.1 Cruise Report

### 1.1 Objectives

The objectives were to choose a subset of lakes and reservoirs from the more than nine thousand water bodies in California. The subset was sampled in a random order indicated by a "Sampling Sequence" (Tables 2 and 4 Quality Assurance Program Plan (QAPP) Appendices) created by the use of a generalized random tessellation stratified (GRTS) approach (USEPA's Environmental Monitoring and Assessment Program, Stevens and Olsen 2004). The GRTS approach allows for a spatially balanced random draw, which gives the lakes and reservoirs an equal probability of being selected. Two separate random draws were performed by Don Stevens to first address the popular fishing areas and second to address a statewide fishing beneficial use. The first random draw was performed on popular fishing areas chosen from the book "California Fishing" by Tom Stienstra. Two hundred sixteen popular fishing areas were identified and placed in the GRTS design to produce a list that would be sampled in order. The first one hundred sixteen popular fishing areas were sampled for fish tissue and the remaining one hundred will be sampled the following year. The second GRTS list was performed on the more than nine thousand lakes and reservoirs "Other Lakes" (Table 4 QAPP Appendices). Fifty of these lakes and reservoir were sampled for fish tissue after eliminating five hundred thirteen potential water bodies from the list (Table 1 Lake Samplabilty). Of the one hundred sixty four lakes and reservoirs sampled, thirty eight were chosen by regional water quality control board to be trend sites (4-8 lakes per region), which require more intensive analysis (Table 3 QAPP Appendices). Lake size determined the number of fish and
locations to be collected. The fish tissue would be used for specific analyses as directed by BOG and SWQCB in Work Order No. 06SWBG01 (see Section 1.3 below). Sample stations were reached by boating to a "species-specific" habitat with gill nets, hook and line and/or an electrofisher boat. Two species of fish (bottom feeder and predatory) were collected at all locations when species composition allowed for it.

### 1.3 Authorization to collect samples

All sampling personnel are MPSL staff (through San Jose State University Foundation) contracted through CDFG to conduct the sample collection activities listed herein. The funding and authorization to collect the samples described herein is contained in the State Water Resources Control Board (SWRCB) Work Order 06SWBG01, including the description of the number samples and locations necessary to be collected at each water body.

### 1.4 Station reconnaissance and selection

CDFG /MPSL conducted the pre-sample collection reconnaissance activities from a list of water bodies provided by BOG and SWQCB. After reconnaissance, one hundred sixty four water bodies were considered sampleable. Water bodies were removed from the list due to the lack of: water, fish, fresh water or access. BOG and SWQCB authorized all one hundred thirty water bodies for specific types of analyses, as well as the funding for the collection and analyses as set forth in the Work Order 06SWBG01.

### 1.5 Summary of types of samples authorized to be collected

After reconnaissance, a total of one hundred sixty two water bodies were authorized for sample collection effort, in order to assess the bioaccumulation of contaminants in fish tissue. The target species were fish that are commonly caught and consumed by anglers and are good indicators of mercury, synthetic organics and selenium bioaccumulation. Two types of species were chosen based on their ability to best indicate the above contaminates. Top predatory species (ex. largemouth bass or trout) were targeted because mercury is biomagnified in tissue. Bottom-feeders (ex. carp or catfish) were collected as a second species due to their high lipid content which
accumulate organics. Sample size was based on lake size in hectares, for more detailed information reference section "III C" of the QAPP appendices. Analysis authorization dictates tissue compositing and analysis (QA/QC requirements-preservatives, aliquoting, cooling, etc.).

Physical parameters were collected for each fish, which included: weight, total length, fork length, sex and were any abnormalities when present. A cross-section ( $\sim 10 \mathrm{~cm}$ ) of tissue (steak) was collected from behind the head and was then wrapped in aluminum foil and placed in a zipperclosure bag and stored on dry ice. Samples were stored on dry ice until handed to MPSL/DFG lab for authorized analysis, per appropriate SOP's.

Scales were collected from predatory species for age growth analysis, used in an age regression with mercury concentration. Black bass species were used for this analysis due to their high correlation of age to mercury concentration.

Otoliths were taken for both predatory and bottom species at every trend site when applicable. Otoliths were then archived for age growth analysis, which could be used in an age regression with mercury concentration.

### 1.6 Discussion

Site access and lack of water were the major problems encountered during sampling. Either access to the lake was denied or the lake was dry. Some of the boat launches required creative use of ramps, rocks, and debris.

### 1.7 Results

Out of the one hundred sixty four water bodies authorized to be sampled for fish, one hundred fiftynine were sampled and had fish tissue collected. Only five "Other Lakes" had sampling effort but no fish collected. Tables 1.8.1 and 1.8.2 are linked to the figures of each water body sampled. Scales were taken from all black bass species collected. Otoliths were also extracted and archived from both predatory and bottom species collected at trend lakes and reservoirs.

### 1.8 Description of Sample Collection Stations

Multiple CDFG/MPSL teams sampled the authorized lakes and reservoirs. Descriptions and maps of sample collection, access issues, and species sampled are divided into two tables, popular and other. Each table is linked to the description for the water bodies sampled. Trend sites are labeled with italic names in the table.
1.8.1 Table of Contents for Sample Collection in Popular Water Bodies

| Water Body Name (Code) | Page | Water Body Name (Code) | Page |
| :---: | :---: | :---: | :---: |
| Alondra Park Lake (411PAP023) | 7 | Lake Gregory (628PGL147) | 77 |

## Fish caught:

| Brown Trout |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 359 | 369 | 374 | 393 | 399 | 402 | 404 | 411 | 419 | 441 |
| Tag \# | 9048 | 9045 | 9046 | 9051 | 9052 | 9049 | 9050 | 9047 | 9053 | 9044 |

Comments: The sampling vessel was launched from the bank. A sample of brown trout (10 fish) was collected using the electorfisher boat. No bottom species were collected.

## Back to Table

## 2007 BOG Bridgeport Reservoir (630PBR199)

Latitude: 37.95301
Longitude: -122.60579
Collection Method: Electrofisher boat
Date (s) of Collection: September 12, 2007 (Trip 15)
Samplers: Billy Jakl, Steve Matenuk

## Fish caught:

| Rainbow Trout |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 340 | 432 | 585 | 629 | $>530$ |
| Tag \# | 8194 | 8193 | 8191 | 8190 | 8192 |

Comments: The sampling vessel was launched from the bank near the dam. A sample of rainbow trout ( 5 fish) was collected using the electorfisher boat. No bottom species were collected. Engine trouble cut sampling short. The site had to be revisited. The only other fish seen were: brown trout, one carp (>800) and five Sacramento suckers (<200).

Date (s) of Collection: November 7, 2007 (Trip 22)

Samplers: Dylan Service, Kyle Skaff

## Fish caught:

| Location 1: Rainbow Trout |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> (mm) | 214 | 224 | 236 | 243 | 256 |
| Tag \# | 09088 | 09086 | 09084 | 09087 | 09085 |

| Location 2: Rainbow Trout |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> (mm) | 232 | 242 | 245 | 265 | 270 |
| Tag \# | 09090 | 09093 | 09092 | 09091 | 09089 |

Comments: The sampling vessel was launched from the bank. Two locations were sampled using the electorfisher boat. A sample of rainbow trout (5 fish) was collected at each location. Location one from the first sampling effort was over the $75 \%$ size range, so the site had to be sampled again. No bottom species were collected.

Comments: The sampling vessel was launched from a concrete ramp. Three locations were sampled using the electorfisher boat. A sample of largemouth bass ( 11 fish) was collected at each location. No other fish were present.

Back to Table

## 2007 BOG Lake Cahuilla (719PLC115)

Latitude: 33.63257
Longitude: -116.27312
Collection Method: Electrofisher boat
Date (s) of Collection: October 1, 2007 (Trip 18)
Samplers: Sean Mundell, Steve Martenuk
Fish caught: No fish were collected
Comments: The sampling vessel was launched from a concrete launch ramp. No fish were collected with the electrofisher. Bass and brown bullheads were present, but the salinity of the water caused the electrofisher to fail. The boat also had some generator problems so the trip was canceled.

Collection Method: Gill Nets

Date (s) of Collection: October 30-31, 2007 (Trip 21)
Samplers: Glen Sibald, Matt Rock

## Fish caught:

| Carp |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> (mm) | 330 | 343 | 350 | 358 | 367 | 372 | 378 | 379 | 385 | 395 |  |  |  |  |

Comments: The sampling vessel was launched a concrete ramp. Two species of fish were collected using the electorfisher boat. A sample for both species was collected: largemouth bass (11 fish) and carp (10 fish). Bluegill was the only other fish present.

## Back to Table

## 2007 BOG Lake Crowley (603PCW027)

Latitude: 37.59935
Longitude: -118.74156
Collection Method: Electrofisher boat
Date (s) of Collection: July 26, 2007 (Trip 8)
Samplers: Billy Jakl, Sean Mundell

## Fish caught:

| Location 1: Rainbow Trout |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 260 | 268 | 320 | 322 | 330 | 330 | 335 |
| Tag \# | 6977 | 6978 | 6981 | 6979 | 6980 | 6982 | 6983 |

| Location 2: Rainbow Trout |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 330 | 335 | 339 | 383 | 384 | 475 |
| Tag \# | 6971 | 6972 | 6973 | 6975 | 6974 | 6976 |

Comments: The sampling vessel was launched from a concrete ramp at the entrance.
Two locations were sampled using the electorfisher boat. A sample of rainbow trout (7
fish) was collected at location one and (6 fish) at location two. Sacramento perch and brown trout were the only other fish seen. Shocking was very difficult due to the abundance of fishermen on the shore. The third location was dropped because the fishermen density was too great at the site.

| Tag \# | 8989 | 8990 | 8993 | 8991 | 8992 |

Comments: The sampling vessel was launched from a concrete ramp. Two locations were sampled using the electorfisher boat. A sample of largemouth bass (11 fish) and carp ( 5 fish) were collected at each location. No other fish were present.

## Back to Table

Latitude: 37.94689
Longitude: -122.59465
Collection Method: Electrofisher boat
Date (s) of Collection: July 05, 2007 (Trip 5)
Samplers: Bryan Frueh, John Negrey
Fish caught: No fish were collected
Comments: The sampling vessel was launched from a concrete launch ramp at the park entrance. No fish were collected using the electrofisher boat. According to Larry Norall, the lake was drained and all the fish were removed 15 years ago. The only fish seen were small sculpins and tadpoles.

## Back to Table

Latitude: 37.60298
Longitude: -119.00287
Collection Method: Electrofisher boat
Date (s) of Collection: July 25, 2007 (Trip 8)
Samplers: Billy Jakl, Sean Mundell

## Fish caught:

| Rainbow Trout |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> (mm) | 220 | 230 | 240 | 243 | 250 | 260 | 285 | 376 | 390 |
| Tag \# | 6959 | 6957 | 6958 | 6960 | 6962 | 6961 | 6963 | 6965 | 6964 |

Comments: The sampling vessel was launched from a small ramp at the entrance. A sample of rainbow trout ( 9 fish) was collected using the electorfisher boat. No bottom species were collected. Brown tout and golden trout were the only other fish seen. Shocking was very difficult due to the abundance of fishermen on the shore.

| Tag \# | 4824 | 4821 | 4823 | 4825 | 4822 |

Comments: The sampling vessel was launched from a concrete launch ramp. Two locations were sampled using the electorfisher boat. A sample of largemouth bass (13 fish), spotted bass (14 fish), bluegill (5 fish), channel catfish (5 fish) and carp (5 fish) were collected at location one. At location two, a sample of largemouth bass (10 fish), spotted bass ( 9 fish), bluegill ( 5 fish) and carp ( 5 fish) were collected. Extra fish were collected because this effort was also used in the Fish Mercury Project. The site was revisited for BOG sampling requirements.

Date (s) of Collection: August 28, 2007 (Trip 13)
Samplers: Billy Jakl, Dylan Service

## 2007 BOG O'neill Forebay (541POF104)

Latitude: 37.07624
Longitude: -121.03940
Date (s) of Collection: May 30, 2007 (FMP)
Samplers: Billy Jakl, Kyle Skaff

## Fish caught:

| Location 1: Largemouth Bass |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 284 | 299 | 379 | 407 | 450 | 462 | 498 |
| Tag \# | 6382 | 6381 | 6379 | 6380 | 6377 | 6376 | 6378 |

| Location 1: Striped Bass |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 496 | 511 | 519 | 532 | 538 | 547 | 554 | 566 | 566 |
| Tag \# | 6375 | 6369 | 6370 | 6374 | 6371 | 6366 | 6372 | 6367 | 6368 |

| Location 1: <br> Bluegill |  |
| :---: | :---: |
| TL (mm) | 172 |
| Tag \# | 6386 |

| Location 1: Tule Perch |  |  |  |
| :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 176 | 205 | 214 |
| Tag \# | 6383 | 6384 | 6385 |

| Location 1: Channel Catfish |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 423 | 435 | 468 | 504 | 525 | 530 | 562 | 589 | 589 | 688 |
| Tag \# | 6395 | 6396 | 6393 | 6392 | 6390 | 6394 | 6391 | 6387 | 6389 | 6388 |

Comments: The sampling vessel was launched from a concrete launch ramp. Five species of fish were collected using the electorfisher boat. A sample for all the species was collected: largemouth bass (7 fish), striped bass ( 9 fish), channel catfish (10 fish), bluegill (1 fish) and tule perch (3 fish). Extra fish were collected because this effort was also used in the Fish Mercury Project. The site was revisited for BOG sampling requirements.

Collection Method: Electrofisher boat
Date (s) of Collection: September 5, 2007 (Trip 14)
Samplers: Dylan Service, Gary Ichikawa

Comments: The sampling vessel was launched from the bank. A sample of rainbow trout (10 fish) was collected using the electorfisher boat. No bottom species were collected.

## Back to Table

Latitude: 34.08616
Longitude: -117.80300
Collection Method: Electrofisher boat
Date (s) of Collection: June 6, 2007 (Trip 1)
Samplers: Billy Jakl, John Negrey

## Fish caught:

| Largemouth Bass |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 200 | 220 | 255 | 258 | 317 | 351 | 365 | 365 | 367 | 370 | 371 |
| Tag \# | 6528 | 6527 | 6526 | 6523 | 6519 | 6514 | 6511 | 6520 | 6516 | 6515 | 6518 |

| Largemouth Bass |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 375 | 385 | 387 | 432 | 598 |
| Tag \# | 6512 | 6513 | 6517 | 6521 | 6522 |

Comments: The sampling vessel was launched from the launch ramp at the park entrance. One species of fish was collected using the electorfisher boat. A sample of sixteen individual largemouth bass was collected. No bottom fish were found. Low in water vegetation may have contributed to the lack of bottom fish seen. Threadfin shad and bluegill were the only other fish seen.

| Location 2: Brown Bullhead |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 341 | 361 | 401 | 414 | 417 |
| Tag \# | 4895 | 4892 | 4896 | 4891 | 4893 |

Comments: The sampling vessel was launched from a concrete ramp at the entrance. Two locations were sampled using the electorfisher boat. A sample of largemouth bass (11 fish) and brown bullhead (5 fish) were collected at both locations. Channel catfish were the only other fish seen.

## Back to Table

Latitude: 33.07869
Longitude: -115.51261
Collection Method: Electrofisher boat
Date (s) of Collection: August 29, 2007 (Trip 13)
Samplers: Sean Mundell, Steve Martenuk

## Fish caught:

| Largemouth Bass |  |  |  |
| :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 333 | 340 | 525 |
| Tag \# | 09296 | 09297 | 09298 |

| Carp |  |
| :---: | :---: |
| TL <br> (mm) | 685 |
| Tag \# | 09299 |

Comments: The sampling vessel was launched from a concrete launch ramp. Two species of fish were collected using the electorfisher boat. A sample for both species was
collected: largemouth bass (3 fish) and carp (1 fish). Lots of bass and small carp, but the salinity of the water caused the electrofisher to fail. Brown bullheads were the only other fish seen. Site need to be revisited.

Collection Method: Gill Net
Date (s) of Collection: October 30, 2007 (Trip 21)
Samplers: Glen Sibald, Matt Rock

## Fish caught:

| Black Crappie |  |  |  |  |  |  |  |  |  |  |

| Tag \# | 7836 | 7834 | 7837 | 7835 | 7838 |

Comments: The sampling vessel was launched from a concrete launch ramp. Two locations were sampled using the electorfisher boat. A sample of largemouth bass (11 fish) and carp ( 5 fish) were collected at location one. At location two, a sample of largemouth bass (10 fish) and carp (5 fish) were collected. Bluegill was the only other fish seen.

## Back to Table

## 2007 BOG Uvas Reservoir (305PUR072)

Latitude: 37.07572
Longitude: -121.70306
Collection Method: Electrofisher boat
Date (s) of Collection: July 05, 2007 (Trip 5)
Samplers: Gary Ichikawa, Stacy Swenson, Cass Lamerdin

## Fish caught:

| Largemouth Bass |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 242 | 249 | 258 | 272 | 314 | 318 | 335 | 339 | 352 | 440 | 600 |  |  |
| Tag \# | 6729 | 6728 | 6730 | 6731 | 6732 | 6733 | 6735 | 6734 | 6736 | 6737 | 6738 |  |  |

Comments: The sampling vessel was launched from a concrete launch ramp at the park entrance. A sample for largemouth bass ( 11 fish) was collected using the electorfisher boat. No bottom species were collected. Lake level was really low (boat launch closed to public). Other fish seen were: Sacramento sucker, bluegill and threadfin shad.

## Back to Table

## 2007 BOG Virginia Lakes (630PVL031)

Latitude: 38.04681
Longitude: -119.26546
Collection Method: Gill Net
Date (s) of Collection: October 18-19, 2007 (Trip 19)
Samplers: Glen Sibald, Matt Rock

## Fish caught:

| Rainbow Trout |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 332 | 348 | 350 | 351 | 354 | 343 | 350 | 354 | 362 | 365 |
| Tag \# | 14017 | 14019 | 14018 | 14016 | 14015 | 14021 | 14022 | 14020 | 14024 | 14023 |

Comments: The sampling vessel (small "john boat") was launched from the bank. A sample of rainbow trout ( 10 fish) was collected using gill nets (1.5" at 50m). No other fish were present.

## Back to Table

Latitude: 33.04176
Longitude: -115.49021
Collection Method: Electrofisher boat
Date (s) of Collection: August 29, 2007 (Trip 13)
Samplers: Sean Mundell, Steve Martenuk
Fish caught: No fish were collected
Comments: The sampling vessel was launched from a concrete launch ramp. No fish were collected with the electrofisher. Bass and brown bullheads were present, but the salinity of the water caused the electrofisher to fail.
Collection Method: Gill Net
Date (s) of Collection: November 1-2, 2007 (Trip 21)
Samplers: Glen Siblald, Matt Rock
Fish caught:

| Black Crappie |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 282 | 288 | 325 | 326 | 331 | 335 |  |
| Tag \# | 14077 | 14081 | 14080 | 14076 | 14079 | 14078 |  |

| Channel Catfish |  |  |  |
| :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 491 | 512 | 570 |
| Tag \# | 14082 | 14083 | 14084 |

Comments: The sampling vessel was launched from a concrete launch ramp. Two species of fish were collected using gill nets (2" at 100m). A sample was collected for both species: black crappie ( 6 fish) and channel catfish ( 3 fish). The nets soaked for overnight and were retrieved on the 2nd.

## Back to Table

## 2007 BOG Wishon Reservoir (552PWS022)

Latitude: 37.00889
Longitude: -118.95979
Collection Method: Electrofisher boat
Date (s) of Collection: September 10, 2007 (Trip 15)
Samplers: Billy Jakl, Steve Martenuk
Fish caught: No fish were collected
Comments: The sampling vessel was launched from a dirt launch ramp. No fish were collected with the electrofisher. The water conductivity was too low. Site needed to be revisited.

Date (s) of Collection: October 29, 2007 (Trip 21)
Samplers: Dylan Service, John Negrey

## Fish caught:

| Rainbow Trout |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 303 | 306 | 327 | 333 | 337 | 340 | 342 | 342 | 347 | 396 |
| Tag \# | 8804 | 8803 | 8799 | 8800 | 8801 | 8802 | 8797 | 8798 | 8796 | 8795 |

Comments: The sampling vessel was launched from an unimproved ramp. A sample of rainbow trout (10 fish) was collected using the electorfisher boat. No bottom species were collected.

## 2007 BOG Lake Mathews (801TM0391)

Latitude: 33.83620
Longitude: -117.42284
Collection Method: Electrofisher boat

Date (s) of Collection: November 20, 2007 (Trip 24)
Samplers: Billy Jakl, Kyle Skaff
Fish caught:

| Location 1: Striped Bass |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 516 | 540 | 552 | 578 | 582 |
| Tag \# | 8994 | 8998 | 8996 | 8995 | 8997 |

| Location 2: Striped Bass |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> (mm) | 496 | 503 | 534 | 534 | 560 |
| Tag \# | 09602 | 09604 | 8999 | 9000 | 09603 |

| Location 3: Striped Bass |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> (mm) | 486 | 532 | 534 | 553 | 570 |
| Tag \# | 09605 | 09607 | 09608 | 09609 | 09606 |

Comments: The sampling vessel was launched from a concrete ramp. A sample of striped bass ( 5 fish) was collected at three locations using two electorfisher boats. Mike Gustis (DFG) helped with his electorfisher boat. A couple of blue catfish and largemouth bass were the only other fish present.

Back to Table

Latitude: 37.8035
Longitude: -122.25626
Collection Method: Electrofisher boat
Date (s) of Collection: July 5, 2007 (Trip 5)
Samplers: Bryan Frueh and John Negrey

## Fish caught: No fish Collected

Comments: The sampling vessel was launched from a concrete launch ramp. No fish were collected with the electrofisher boat. The electrofisher boat would not send out a charge because the water was brackish.

Comments: The sampling vessel was launched from the bank (no 4X4 needed). Two species of fish were collected using the electorfisher boat. A sample for both species was collected: largemouth bass (11 fish) and carp (10 fish). Other fish present were: white crappie, bluegill, goldfish and threadfin shad.

## 2007 BOG West Valley Reservoir (526TW0051)

Latitude: 41.19984
Longitude: -120.39926
Collection Method: Electrofisher boat
Date (s) of Collection: September 18, 2007 (Trip 16)
Samplers: Billy Jakl, Sean Mundell

## Fish caught:

| Sacramento Pikeminnow |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 365 | 401 | 410 | 416 | 420 |
| Tag \# | 8226 | 8224 | 8225 | 8222 | 8223 |

| Sacramento Sucker |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> $(\mathbf{m m})$ | 354 | 355 | 356 | 385 | 413 | 435 | 451 | 452 | 468 | 469 |  |  |  |

Comments: The sampling vessel was launched from the bank ( $4 \times 4$ needed). Two species of fish were collected using the electorfisher boat. A sample for both species was collected: Sacramento pikemiinnow ( 5 fish) and Sacramento sucker (10 fish). Warmouth and one brown bullhead were the only other fish present. Lake levels were too low to use the concrete ramp.

## 2007 BOG White Pines Lake (533TU0053)

Latitude: 38.26837
Longitude: -120.34173
Collection Method: Electrofisher boat
Date (s) of Collection: October 11, 2007 (Trip 18)
Samplers: Billy Jakl, Dylan Service

## Fish caught:

| Rainbow Trout |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| TL <br> (mm) | 249 | 256 | 281 | 282 | 287 | 289 | 297 | 298 | 300 | 316 |
| Tag \# | 8357 | 8353 | 8355 | 8356 | 8354 | 8350 | 8359 | 8358 | 8351 | 8352 |

Comments: The sampling vessel was launched from the bank. A sample of rainbow trout (10 fish) was collected using the electorfisher boat. No bottom species were collected. Largemouth bass and a couple brown bullheads were the only other fish seen after shocking the entire lake.

## Back to Table

## 2007 BOG Zyack Lake (516TU0173)

Latitude: 39.13563
Longitude: -121.13317
Collection Method: Electrofisher boat
Date (s) of Collection: September 5, 2007 (Trip 14)
Samplers: Gary Ichikawa, Dylan Service

## Fish caught:

| Largemouth Bass |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
