**Subject:** "Comment Letter - Proposed Underground Storage Tank Regulations."

What happened to 2643.1?

What became of Article 7 & 8? Why are some sections removed? No more closures?

There are no longer any specific requirements for repairing holes such as in 2661(d)

2643(b) references 2646, 2643.1 which are missing from draft.

There are no annual submittal requirements for SIR as in 2646.1.

2711(a)(13)(A) states permit application to be signed. Conflicts with CERS template. There is no upload for this form. Is submittal equating to signature, then state it in regulation. Sort of has been accepted that submittal of the form A is acknowledgement of signature.

Is the "draft" all there is or did you send out only the changed sections?

There have some changes unrelated to CERS. Why not change the definition of "repair" to match that of the feds?
