## State Water Resources Control Board

# UST CLEANUP FUND PROGRAM UPDATE

(February 4, 2013)

## REMINDER

### Process to Reopen Claims

If your claim was closed by the Fund and you have eligible unreimbursed costs or the regulatory agency has directed additional work, you can request the claim be reopened. You must meet the following requirements in order for your claim to be reviewed for reopening:

1. The total eligible costs previously reimbursed have not exceeded \$1.5 million, less the deductible, for the occurrence that is the subject of the claim. If you are requesting third party costs, the total eligible costs previously reimbursed cannot have exceeded \$1 million, less the deductible, for the occurrence that is the subject of the claim.
2. The directives from the regulatory agency are based on the occurrence that is the subject of the claim. The claim cannot be reopened for a new occurrence. In addition, all reopen requests must include the following documents. These items must be submitted before we can process another Reimbursement Request package. These documents are:
  - A completed [Request to Re-open form](#);
  - A **Reimbursement Request form**; and
  - The documentation required to support both forms.

After a determination that there are more eligible costs, the Reimbursement Request package will be processed in accordance with normal payment procedures.
