Hi Pat,

I spoke with Ramesh at lengths regarding this site awhile back. I do not have any objections and as long as Exxon is aware that you guys are planning on closing the MacHill case and ok with the well transfer.

Julie

As you know we at the Fund have been tasked with reviewing a number of Sites statewide using the Low Threat Closure Policy. The subject site is currently under review and initially appears to meet the criteria in the Policy. If our completed review finds the Site meets the Policy criteria we will advance the Site through the closure procedure.

It appears that ExxonMobil would like to keep the single well MW-50 as part of their monitoring program. This is acceptable to the Fund because the County permitted the well and that permit could be transferred to ExxonMobil using whatever County procedure necessary to do so.

If you have any concerns regarding the Site please feel free to forward them to us.

Pat G. Cullen
