RE: PROPOSED RECYCLED WATER POLICY

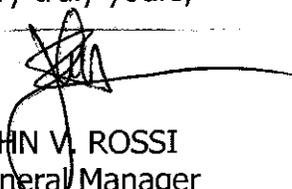

Dear Chair Doduc:

The Western Municipal Water District (Western) is please to provide the following comments on the proposed recycled water policy currently under consideration by the State Water Resources Control Board (SWRCB).

Western applauds the SWRCB for its efforts to promote the safe use of recycled water in California. Recycled water is an important resource for California and Western supports the SWRCB's proposal to streamline the use of recycled water. While we support the goal of the SWRCB's proposed policy, we believe that there are a number of issues with the proposed policy that need further refinement. To that end, we join the comments of the Association of California Water Agencies.

Once again, Western strongly supports the use of recycled water in a way that provides a clean, reliable and safe water supply for California. If you or your staff has any questions, please feel free to contact me at (951) 789-5024.

Very truly yours,

JOHN V. ROSSI
General Manager
