Subject: Come up with a new plan for Stanislaus River

Water board,

I use the Stanislaus River throughout the year for recreation like kayaking, fishing, swimming, etc. Also, I know a lot of farmers in the valley who depend on the water here for crops and jobs. Diverting water elsewhere is a horrible idea. Keep the water here and let the river flourish. It was extremely low this last summer. If more water is diverted ,it will disappear in some areas. Go back to the drawing board and come up with some new plans.

Respectfully,

Chance Clark
Oakdale
