Subject: Put people first

Water board,

I do not support increasing unimpaired flows on the Stanislaus River. We need the water for us in California. People need water ... animals need the water ... fish need the water ... farmers need the water so do businesses. If we don't save it and and we go through another few drought years, we are screwed big time.

I say forget the salmon and save the Stanislaus River. We need to manage our water ways evenly to keep the Delta salinity down. Maybe it's not that easy, but someone with that power can manage the water much better. We can all live without a few salmon, but we can't live without water!

Thank you.

Tony Goff
