Subject: Please rethink unimpaired flows

Water board members,

I am opposed to increasing unimpaired flows on the Stanislaus and other rivers. You are talking about destroying something to "fix" another problem. Let's be real. This is not the only solution. I'm sure our tax dollars can be used better. Hire someone who can find a solution that doesn't hurt hundreds of thousands of people, animals, families, farmers, and take away their "life fluid." Who are you to decide who gets to live and who dies? Water is life for us. Let's work smarter people. What are we to tell our children? We stood by and did nothing? Please reconsider. This is my opinion.

Thank you.

Julia DeWeese
