Subject: No to higher flows and Delta tunnels

Members of the state water board,

Please do not increase unimpaired flows on the Stanislaus River. We (the people of this valley) need this water for replenishing our ground water, irrigating our crops that feed the rest of the nation and the whole world, and helping us get through droughts. Actually droughts are normal for this valley and if you don't allow us to STORE water, both above and underground, this will once again become a desert.

SAVE OUR VALLEY

No tunnels. Period.

Only dams to store water for drought and summer.
