

RULE 161 - STAGE 1 WATER CONSERVATION

- A. Stage 1 Water Conservation is defined as the first stage in the District's Expanded Water Conservation and Standby Rationing Plan that takes action to maintain California American Water derived from the MPWRS below regulatory constraints by increasing conservation activities and preparing for further stages of conservation and rationing. During Stage 1 Water Conservation, California American Water shall have the goal of maintaining its annual (October 1 through September 30) water production from the Carmel Valley below 11,285 Acre-Feet. This quantity may be modified by the SWRCB. Assuming a maximum annual production of 4,000 Acre-Feet from the Seaside Coastal Basin, this equates to a California American Water system production limit of 15,285 Acre-Feet. Each Water User deriving water from the California American Water system that derives its Source of Supply from the MPWRS shall comply with District Water Waste and Non-Essential Water Use prohibitions and shall participate to the extent possible in voluntarily reducing water use.
- B. All Water Users with the Monterey Peninsula Water Management District shall comply with Water Waste and Non-Essential Water Use prohibitions.

Rule added by Ordinance No. 92 (1/29/99)
