

Dear Ms. Townsend, I am writing to express my support for Imperial Irrigation District's petition regarding the Salton Sea. This is an extremely important and urgent issue. The survival of the Salton Sea not only affects the residents here but the businesses and industries in surrounding areas.

This is an issue that cannot be ignored. With the water transfer to San Diego due to begin in 2017 the decline of the Salton Sea will happen much more rapidly. This will result in toxic dust clouds that will be blown far and wide due to the winds we experience here. For the welfare of all concerned please participate and support the commitment to save the Salton Sea.

Sincerely,  
Peggy Davis
