Subject: Thermal Curtain

As a summer resident of Lake Almanor, I wish to express my extreme concern relative to the proposed installation of a thermal curtain at Lake Almanor.

The information that I have seen suggests that the thermal curtain will not provide enough cold water to meet the temperature goals that have been set. The marginal benefit that may be accomplished is not in line with the ecological problems that will be created at Lake Almanor.

As a property owner at Lake Almanor since 1998, I have seen the algae flourish when there is warm lake water.

Also, as a PG&E customer already paying high utility bills on two homes, that PG&E customers will have to pay the cost for this ecological devastating thermal curtain, is reprehensible.

I request that this project be dropped.

Subject: Thermal Curtain

I have been a home owner in the Lake Almanor community for seventeen years. My family and I have enjoyed the Lake and all it's beauty for all of those years.

I am vehemently opposed to the thermal curtain proposal. It does not make sense to alter one ecosystem with unknown consequences to possibly enhance another. Any change in temperature to the Lake will have devastating results.

Please vote this proposal down.
