

salton sea , I am a resident of Imperial County the state of California does not care about its residents ,I have a suggestion on the water transferred to other populated areas including and not limited to M.W.D. ,San Diego county, Riverside County. This is only a suggestion, can Imperial County Collect its original water allocation, run that thru Imperial County. Then after the open canal water is ran thru the south end of the Salton Sea ,It will be collected from the North end of the Salton Sea where it can be collected and distributed, pumped or transferred to the other parties of the Q.S.A. I do not believe the state of California will hold up to any past, present or future agreements.
