NOTICE OF APPLICATION TO APPROPRIATE WATER BY PERMIT

APPLICATION: 31251

DATE FILED: November 29, 2001

Notice is hereby given that Lake County Flood Control and Water Conservation District has filed an application for a water right permit for diversion of water from Highland Creek tributary to Adobe Creek thence Clear Lake thence Cache Creek thence Yolo Bypass thence Sacramento River in Lake County. The State Water Resources Control Board (SWRCB) will determine whether a water right permit should be issued for the application and, if so, whether conditions should be included in the permit to protect the environment and other downstream water users. This notice provides a description of the proposed project and also describes the procedure and time frame for submittal of a protest against the application. This notice and future notices of applications to appropriate water by permit, may be viewed and printed from the Division of Water Rights (Division) web-site at www.waterrights.ca.gov. Any correspondence to the applicant shall be mailed to:

Lake County Flood Control and Water Conservation District
c/o Thomas R. Smythe
Lake County Department of Public Works
255 N. Forbes Street
Lakeport, CA 95453

DESCRIPTION OF THE PROJECT

The applicant proposes to store additional surface water of 1,100 acre-feet in Highland Springs Reservoir by retrofitting seven hydraulically operated sluice gates to the existing Principal Spillway. The applicant currently holds License 7786 (Application 18667) which authorizes recreational use only for the collection of 1,000 acre-feet per year to storage from October 1 to July 1. The Highland Springs Reservoir is a flood control reservoir with a capacity of 3,500 acre-feet. The proposed project involves modifying reservoir operations to provide for storage of a portion of winter inflow. The stored water would be released during spring, summer and fall into the streambeds of lower Highland and Adobe Creeks to recharge the groundwater. The water collected to storage is used for the purposes listed below.

According to Water Code section 1348, a minor project diverts less than or equal to 3 cubic feet per second (cfs) by direct diversion or 200 acre-feet (af) per year by storage. A major project diverts greater than 3 cfs by direct diversion or 200 af per year by storage.

"The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>."
Additional copies of this form and water right information can be obtained at www.waterrights.ca.gov.

This is a "major" project (greater than 3 cfs by direct diversion or 200 af per year by storage) as defined by section 1348 of the Water Code.

APPLICATION INFORMATION

The applicant proposes to divert water from Highland Creek tributary to Adobe Creek thence Clear Lake thence Cache Creek thence Yolo Bypass thence Sacramento River.

The Point of Diversion is located within the SE ¼ of NW ¼ of Section 30, T13N, R9W, MDB&M.

The diversion and place of use are located within the County of Lake.

Amount of water applied for: 1,100 af per year (Storage).

Water will be used for: Irrigation, Domestic, Municipal, and Fish and Wildlife Enhancement.

The applicant has requested to divert water from: November 1 to April 14.

Place of Use is described as follows:

Use Within	Section	Township	Range	B & M
The service boundaries of the Lake County Flood Control and Water Conservation District	31, 32, 33	14N	9W	MD
	4, 5, 8, 9, 16, 17, 18, 19, 20, 21, 29, 30	13N	9W	MD

ENVIRONMENTAL INFORMATION

According to the California Environmental Quality Act (CEQA) and its guidelines, Lake County Flood Control and Water Conservation District is the lead agency and will be responsible for preparation of appropriate environmental documents for the project and for determining whether or not the project will cause a significant effect on the environment. If you are not filing a protest, but wish to submit information which indicates that the project may cause a significant effect on the environment, please send this information to the lead agency immediately and also to Mr. Mike Falkenstein, SWRCB, Division of Water Rights, P.O. Box 2000 Sacramento, CA 95812-2000. This information will be reviewed in accordance with CEQA.

PROCEDURE FOR SUBMITTING PROTESTS

Any person may file a protest against the application. Protests should be submitted on standard protest forms available from the Division's web-site at www.waterrights.ca.gov/forms/, but can be submitted in letter form. A pamphlet that provides additional information relating to water rights and the procedure for filing protests can be obtained from the contact person listed below.

The protest should be submitted to:

Yoko Mooring
State Water Resources Control Board
Division of Water Rights
P.O. Box 2000
Sacramento, CA 95812-2000

In addition, the protestant must send a copy of the protest to the applicant.

Protests filed in response to this notice must either be postmarked, or received in the office of the SWRCB's Division of Water Rights (1001 "I" Street, 14th Floor, Sacramento, CA) **by 4:00 p.m.** on the **60th day** after the date of this notice. Due to the constraints of the noticing period, protests may be filed by FAX at (916) 341-5400. However, an original copy of all materials must be received for the SWRCB to consider your protest. For good cause, the SWRCB may grant an extension of time to file a protest. It is the protestant's responsibility to contact the engineer listed below and receives an extension of time to submit the protest prior to the final filing date and time. The SWRCB will respond to all protests within 60 days of the final day to file a protest.

PROTEST REQUIREMENTS

Parties may file protests based on any of the following factors:

- Injury to existing water rights.
- Adverse environmental impact.
- Not in the public interest.
- Contrary to law.
- Not within the jurisdiction of the SWRCB.

All protests must clearly describe the objections to approval of the application and the factual basis for those objections. If the objection is based on injury to existing water rights, the protest must describe the specific injury to the existing water right that would result from approval of the application. In addition, the party claiming injury to prior water rights must provide specific information that describes the basis of the existing right, the date the use began, the quantity of water used, the purpose of use and the place of use. Please note that any water right permit

issued by the SWRCB is subject to and includes conditions to protect vested water rights. If the protest is based on environmental grounds, or other factors listed above, the protest must be accompanied by a statement of facts supporting the basis of the protest. The protest shall include a description of any measures that could be taken to resolve the protest, including modification of the application (i.e., amount, season of diversion, etc.) or conditions (i.e., fish bypass flow, measuring device, etc.) that could be included in the water right permit. If sufficient information is not submitted, the SWRCB may reject the protest or request that the protestant submit additional information.

RESOLUTION OF PROTESTS

The protestant(s) and the applicant are encouraged to discuss methods that could be used to resolve the protest. If the protest(s) can not be resolved, the SWRCB may conduct a field investigation for minor projects, or hold a water right hearing for major projects.

CONTACT PERSON

To obtain additional information regarding this project, or to obtain copies of the protest forms or pamphlet, please contact Yoko Mooring by phone at (916) 341-5362. Protest forms may also be obtained from the Division's web-site at www.waterrights.ca.gov/forms/.
