

4. PURPOSE OF USE, DIVERSION/STORAGE AMOUNT AND SEASON

a. PURPOSE OF USE (irrigation, domestic, etc.)	DIRECT DIVERSION				STORAGE		
	AMOUNT		SEASON OF DIVERSION		AMOUNT	SEASON OF COLLECTION	
	Rate (cfs or gpd)*	Acre-feet per annum	Beginning date (month & day)	Ending date (month & day)	Acre-feet per annum	Beginning date (month & day)	Ending date (month & day)
Irrigation	20.0*	4,500	3/1	11/15			
*see Atchmt 2							
	Total afa	4,500	Total afa				

See Attachment No. 2 * If rate is less than 0.025 cubic feet per second (cfs), use gallons per day (gpd).

- b. Total combined amount taken by direct diversion and storage during any one year will be 4,500 acre-feet.
- c. Reservoir storage is: onstream offstream underground (If underground storage, attach Underground Storage Form.)
- d. County in which diversion is located: San Joaquin County in which water will be used: San Joaquin

5. SOURCES AND POINTS OF DIVERSION/REDIVERSION

- a. Sources and Points of Diversion (POD)/Points of Rediversion (PORD):
- POD / PORD #1 Middle Branch San Joaquin River tributary to Sacramento / San Joaquin Delta thence Pacific Ocean
- POD / PORD #2 Middle Branch San Joaquin River tributary to Sacramento / San Joaquin Delta thence Pacific Ocean
- POD / PORD #1 Middle Branch San Joaquin River tributary to Sacramento / San Joaquin Delta thence Pacific Ocean
- POD / PORD # _____ tributary to _____ thence _____

If needed, attach additional pages, check box below and label attachment

See Attachment No. _____

- b. State Planar and Public Land Survey Coordinate Description:

POD/PORD #	CALIFORNIA COORDINATES (NAD 83)	ZONE	POINT IS WITHIN (40-acre subdivision)	SECTION	TOWNSHIP	RANGE	BASE AND MERIDIAN
1	N. 2,142,440' & E. 6,308,364	3	NE ¼ of SW ¼	1 (Proj)	1S	5E	MD
2	N. 2,142,511' & E. 6,308,282	3	NE ¼ of SW ¼	1 (Proj)	1S	5E	MD
3	N. 2,144,654' & E. 6,306,153	3	NW ¼ of NW ¼	1(Proj)	1S	5E	MD
			¼ of ¼				

If needed, attach additional pages, check box below and label attachment

See Attachment No. _____

- c. Name of the post office most often used by those living near the proposed point(s) of diversion: Stockton

6. WATER AVAILABILITY

- a. Have you attached a water availability analysis for this project? YES NO
 If NO, provide sufficient information to demonstrate that there is reasonable likelihood that unappropriated water is available for the proposed appropriation: If needed, attach additional pages, check box below and label attachment.

See Attachment No. 3

See Attachment No. 3

- b. Is your project located on a stream system declared to be fully appropriated by the State Water Resources Control Board (State Water Board) during your proposed season of diversion?
 YES NO
- c. In an average year, does the stream dry up at any point downstream of your project? YES NO
 If YES, during which months? Jan Feb Mar Apr May Jun Jul Aug Sep Oct Nov Dec
- d. What alternate sources of water are available if a portion of your requested diversion season must be excluded because water is not available for appropriation? (e.g., percolating groundwater, purchased water, etc.) If needed, attach additional pages, check box below and label attachment

See Attachment No. 4

7. PLACE OF USE

a.

USE IS WITHIN (40-acre subdivision)	SECTION*	TOWNSHIP	RANGE	BASE & MERIDIAN	IF IRRIGATED	
					Acres	Presently cultivated?
1/4 of 1/4						<input type="checkbox"/> YES <input type="checkbox"/> NO
1/4 of 1/4						<input type="checkbox"/> YES <input type="checkbox"/> NO

1/4 of 1/4						<input type="checkbox"/> YES <input type="checkbox"/> NO
1/4 of 1/4						<input type="checkbox"/> YES <input type="checkbox"/> NO
1/4 of 1/4						<input type="checkbox"/> YES <input type="checkbox"/> NO
1/4 of 1/4						<input type="checkbox"/> YES <input type="checkbox"/> NO
1/4 of 1/4						<input type="checkbox"/> YES <input type="checkbox"/> NO
Total Acres:						

*Please indicate if section is projected with a "(P)" following the section number.

See Attachment No. 5 Please provide the Assessor's Parcel Number(s) for the place of use:

8. PROJECT SCHEDULE

Project is: proposed, partially complete or complete (Year completed - early 1900's).

Extent of completion: _____

Estimated amount of time in years it will take for construction to be completed: _____

Estimated amount of time in years it will take for water to be put to full beneficial use: _____

Basis for determination of amount of water needed: _____

- i. MINING: Name of the claim: _____ Patented Unpatented
 Nature of the mine: _____ Mineral(s) to be mined: _____
 Type of milling or processing: _____
 After use, the water will be discharged into _____ (watercourse)
 in _____ 1/4 of _____ 1/4 of Section _____, T _____, R _____, _____ B. & M.
- j. POWER: Total head to be utilized: _____ feet
 Maximum flow through the penstock: _____ cfs Maximum theoretical horsepower capable of
 being generated by the works (cfs x fall ÷ 8.8): _____
 Electrical capacity (hp x 0.746 x efficiency): _____ kilowatts at: _____% efficiency
 After use, the water will be discharged into _____ (watercourse)
 in _____ 1/4 of _____ 1/4 of Section _____, T _____, R _____, _____ B&M. FERC No.: _____
- k. FISH AND WILDLIFE PRESERVATION AND/OR ENHANCEMENT: List specific species and
 habitat type that will be preserved or enhanced: _____
- l. OTHER: Describe use: _____
 Basis for determination of amount of water needed: _____

10. DIVERSION AND DISTRIBUTION METHOD

- a. Diversion will be by gravity by means of: _____
 (dam, pipe in unobstructed channel, pipe through dam, siphon, weir, gate, etc.)
- b. Diversion will be by pumping from: Middle Branch San Joaquin River Channel at Points of Diversion #1, #2 and #3
 (sump, offset well, channel, reservoir, etc)
 Pump discharge rate: See Atchmnt #6 cfs or gpd Horsepower: See Atchmnt #6
 Pump Efficiency: See Atchmnt #6

c. Conduit from diversion point to first lateral or to offstream storage reservoir:

CONDUIT (pipe or channel)	MATERIAL (type of pipe or channel lining; indicate if pipe is buried or not)	CROSS-SECTION (pipe diameter, or ditch depth and top and bottom width) (inches or feet)	LENGTH (feet)	TOTAL LIFT OR FALL		CAPACITY (cfs, gpd or gpm)
				feet	+ or -	

See Attachment No. _____

d. Storage reservoirs: (For underground storage, complete and attach underground storage form)

RESERVOIR NAME OR NUMBER	DAM				RESERVOIR		
	Vertical height from downstream toe of slope to spillway level (feet)	Construction material	Length (feet)	Freeboard: dam height above spillway crest (feet)	Surface area when full (acres)	Capacity (acre-feet)	Maximum water depth (feet)

See Attachment No. _____

e. Outlet pipe: Complete for storage reservoirs having a capacity of 10 acre-feet or more.

RESERVOIR NAME OR NUMBER	OUTLET PIPE				
	Diameter in inches	Length in feet	Fall: Vertical distance between entrance and exit of outlet pipe in feet	Head: Vertical distance from spillway to entrance of outlet pipe in feet	Dead Storage: Storage below entrance of outlet pipe in acre-feet

See Attachment No. ____

e. If water will be stored and the reservoir is not at the point of diversion, the maximum rate of diversion to off-stream storage will be _____ cfs. Diversion to offstream storage will be made by:
 Pumping Gravity

11. CONSERVATION AND MONITORING

a. What methods will you use to conserve water? Explain.
 Drip irrigation is used on various crops.

b. How will you monitor your diversion to be sure you are within the limits of your water right and you are not wasting water? Weir Meter Periodic sampling Other (describe)
 In accordance with Water Right Order 2011-005, Applicant is working with SWRCB staff to develop a monitoring and reporting program which will include installation of flow meters on the pumps at the three points of diversion.

12. RIGHT OF ACCESS

a. Does the applicant own all the land where the water will be diverted, transported and used?
 YES NO

If NO, I do do not have a recorded easement or written authorization allowing me access.

b. List the names and mailing addresses of all affected landowners and state what steps are being taken to obtain access:

Landowners are all shareholders of Woods Irrigation Company,

See Attachment No. ____

13. EXISTING WATER RIGHTS AND RELATED FILINGS

a. Do you claim an existing right for the use of all or part of the water sought by this application?
 YES NO

If YES, please specify: Riparian Pre-1914 Registration Permit License
 Percolating groundwater Adjudicated Other (specify) See Attachment 6

b. For each existing right claimed, state the source, year of first use, purpose, season and location of the point of diversion (to within quarter-quarter section). Include number of registration, permit, license, or statement of water diversion and use, if applicable.

See Attachment No. 7

c. List any related applications, registrations, permits, or licenses located in the proposed place of use or that utilize the same point(s) of diversion.

See Attachment No. ____

14. OTHER SOURCES OF WATER

Are you presently using, or do you intend to use, purchased water or water supplied by contract in connection with this project? Yes No If yes, please explain: Applicant is investigating options for purchasing water through transfers and/or contracts with the SWP and/or CVP in the event this application is not approved in full.

15. MAP REQUIREMENTS

The Division cannot process your application without accurate information showing the source of water and location of water use. You must include a map with this application form that clearly indicates the quarter/quarter, section, township, range, and meridian of (1) the proposed points of diversion and (2) the place of use. A copy of a U.S.G.S. quadrangle/topographic map of your project area is preferred, and can be obtained from sporting goods stores or through the Internet at <http://topomaps.usgs.gov>. A certified engineering map is required when (1) appropriating more than three cubic feet per second by direct diversion, (2) constructing a dam which will be under the jurisdiction of the Division of Safety of Dams, (3) creating a reservoir with a surface area in excess of ten acres or (4) appropriating more than 1,000 acre-feet per annum by underground storage. See the instruction booklet for more information.

See Attachment No. 8

ENVIRONMENTAL INFORMATION

Note: Before a water right permit may be issued for your project, the State Water Board must consider the information contained in an environmental document prepared in compliance with the California Environmental Quality Act (CEQA). This form is not a CEQA document. If a CEQA document has not yet been prepared for your project, a determination must be made of who is responsible for its preparation. If the State Water Board is determined to be responsible for preparing the CEQA document, the applicant will be required to pay all costs associated with the environmental evaluation and preparation of the required documents. Please answer the following questions to the best of your ability and submit with this application any studies that have been conducted regarding the environmental evaluation of your project.

16. COUNTY PERMITS

a. Contact your county planning or public works department and provide the following information:

Person contacted: _____ Date of contact: _____
 Department: _____ Telephone: (_____) _____
 County Zoning Designation:
 See Attachment 9

Are any county permits required for your project? YES NO If YES, check appropriate box below:

Grading permit Use permit Watercourse Obstruction permit Change of zoning
 General plan change Other (explain):
 Project is complete.

b. Have you obtained any of the required permits described above? YES NO

If YES, provide a complete copy of each permit obtained.

See Attachment No. ____

17. STATE/FEDERAL PERMITS AND REQUIREMENTS

- a. Check any additional state or federal permits required for your project:
 Federal Energy Regulatory Commission U.S. Forest Service U.S. Bureau of Land Management U.S. Corps of Engineers U.S. Natural Res. Conservation Service Calif. Dept. of Fish and Game State Lands Commission Calif. Dept. of Water Resources (Div. of Safety of Dams) Calif. Coastal Commission State Reclamation Board Other (specify) _____

b. For each agency from which a permit is required, provide the following information:

AGENCY	PERMIT TYPE	PERSON(S) CONTACTED	CONTACT DATE	TELEPHONE NO.

See Attachment No. ____

- c. Does your proposed project involve any construction or grading-related activity that has significantly altered or would significantly alter the bed, bank, or riparian habitat of any stream or lake? YES NO

If YES, explain:

See Attachment No. ____

- b. Have you contacted the California Department of Fish and Game concerning your project? YES NO If YES, name, telephone number and date of contact:

18. ENVIRONMENTAL DOCUMENT

- a. Has any California public agency prepared an environmental document for your project? YES NO
- b. If YES, submit a copy of the latest environmental document(s) prepared, including a copy of the notice of determination adopted by the California public agency. Public agency: _____

- c. If NO, check the appropriate box and explain below, if necessary:
- The applicant is a California public agency and will be preparing the environmental document.*
 - I expect that the State Water Board will be preparing the environmental document.**
 - I expect that a California public agency other than the State Water Board will be preparing the environmental document.* Public agency: _____
 - See Attachment No. 10

* **Note:** When completed, submit a copy of the final environmental document (including notice of determination) or notice of exemption to the State Water Board, Division of Water Rights and proof of payment of the State Clearinghouse filing fee. Processing of your application cannot be completed until these documents are submitted.

** **Note:** CEQA requires that the State Water Board, as Lead Agency, prepare the environmental document. The information contained in the environmental document must be developed by the applicant and at the applicant's expense under the direction of the State Water Board, Division of Water Rights.

19. WASTE/WASTEWATER

- a. Will your project, during construction or operation, (1) generate waste or wastewater containing such things as sewage, industrial chemicals, metals, or agricultural chemicals, or (2) cause erosion, turbidity or sedimentation? YES NO

If YES, or you are unsure of your answer, explain below and contact your local Regional Water Quality Control Board for the following information (See instruction booklet for address and telephone no.):

See Attachment No. ____

- b. Will a waste discharge permit be required for your project? YES NO
 Person contacted: _____ Date of contact: _____

- c. What method of treatment and disposal will be used? _____

See Attachment No. ____

20. ARCHEOLOGY

- a. Have any archeological reports been prepared on this project? YES NO
- b. Will you be preparing an archeological report to satisfy another public agency? YES NO
- c. Do you know of any archeological or historic sites located within the general project area?
 YES NO If YES, explain:

See Attachment No. ____

21. ENVIRONMENTAL SETTING

Attach **two complete sets of color photographs**, clearly dated and labeled, showing the vegetation that exists at the following three locations:

- Along the stream channel immediately downstream from the proposed point(s) of diversion.
- Along the stream channel immediately upstream from the proposed point(s) of diversion.
- At the place(s) where the water is to be used.
- See Attachment No. 11

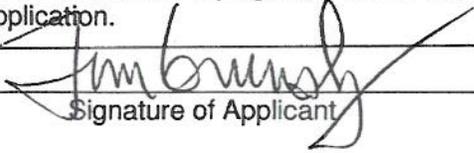

SUBMITTAL FEES

Calculate your application filing fee using the "Water Right Fee Schedule Summary" that was enclosed in the application packet. The "Water Right Fee Schedule Summary" can also be viewed at the Division of Water Rights' website (www.waterrights.ca.gov).

A check for the application filing fee, payable to the "Division of Water Rights" and an \$850 check for the Streamflow Protection Standards review fee [Pub. Resources Code § 10005(a)], payable to the "California Department of Fish and Game," must accompany this application. All applicable fees are required at the time of filing. If the application fees are not received, your application will not be accepted and will be returned to you. Please check the fee schedule for any fee changes prior to submitting the application.

DECLARATION AND SIGNATURE

I declare under penalty of perjury that all information provided is true and correct to the best of my knowledge and belief. I authorize my agent, if I have designated one above, to act on my behalf regarding this water right application.

	<p align="center"><i>President</i></p>	<p align="center"><i>3-24-11</i></p>
Signature of Applicant	Title or Relationship	Date

Signature of Co-Applicant (if any)	Title or Relationship	Date
------------------------------------	-----------------------	------

Applications that are not completely filled out and/or do not have the appropriate fees will not be accepted. In the event that the Division has to return the application because it is incomplete, a portion of the application submittal fee will be charged for the initial review.

“APPLICATION TO APPROPRIATE WATER” CHECKLIST

Before you submit your application, be sure to:

- Answer each question completely.**
- Number, label and include all necessary attachments.**
- Include a legible map that meets the requirements discussed in the instruction booklet.**
- Include the Water Availability Analysis or sufficient information to demonstrate that there is reasonable likelihood that unappropriated water is available for the proposed appropriation.**
- Include two complete sets of color photographs of the project site.**
- Enclose a check for the required fee, payable to the Division of Water Rights.**
- Enclose an \$850 check for the Streamflow Protection Standards review fee, payable to the Department of Fish and Game.**
- Sign and date the application.**

Send the original and one copy of the entire application to:

**State Water Resources Control Board
 Division of Water Rights
 P.O. Box 2000
 Sacramento, CA 95812-2000**

Woods Irrigation Company
Water Right Application

7Attachment #1

3. Project Description

~~This application is specifically filed under claimed area of origin rights pursuant to Water Code sections 10505, 11460 et seq. and 12200 et seq.~~

The Woods Irrigation Company (the "Company") was founded in 1909 and began operations using an existing diversion and delivery system to irrigate approximately 8,000 acres on Roberts Island in San Joaquin County. Today the Company's diversion and distribution system irrigates approximately 6,500 acres within the Place of Use shown on the Map to Accompany the Application (Attachment 8). The Company directly diverts water at three pump stations on the Middle Branch of the San Joaquin River during the period March 1 through November 15. Water is delivered to the place of use via open channel distribution canals (see locations on Attachment 8).

The system has remained in substantially the same configuration for one hundred years. The Company and its shareholders (who are the landowners that receive the water) have always believed that the water was diverted under the individual riparian water rights of the shareholders and the pre-1914 appropriative rights of the shareholders and/or Woods Irrigation Company. However, in February 2011 the State Water Board issued a Cease and Desist Order finding that the Company had only shown evidence sufficient to indicate a pre-1914 appropriative right of 77.7 cubic feet per second, which the State Water Board believes to be less than the historic diversion level. (Order WR 2011-0005).

The purpose of this Application is to secure an appropriative permit to cover the portion of the diversion rate that exceeds 77.7 cubic feet per second for diversions made during the period March 1 through November 15. While the Company maintains that all of its historic diversions are proper under claimed pre-1914 appropriative and riparian rights, it is filing this Application to ensure that its diversions are acceptable to the State Water Board. The filing of this Application is not a waiver of any of the Company's or its landowners' legal arguments regarding the validity of pre-1914 appropriative or riparian water rights.

A secondary purpose of this Application is to obtain an area of origin ruling from the State Water Board for the purpose of obtaining a contract to purchase water (stored and/or natural flow) from the State Water Project and/or Central Valley Project with area of origin priority. The Company does not believe that this is legally required, however, the Department of Water Resources has taken the position of late that it is. Again, the filing of this Application should not be viewed as a waiver of the Company's rights or legal arguments, but rather, as a means to resolve any dispute over the matter should it continue to be an issue.

As stated above, the project proposed under this Application involves no changes to existing facilities and no changes in water use relative to historical conditions for this project. Accordingly, this Application qualifies for a Categorical Exemption under Title 14, California Code of Regulations, Section 15301, Existing Facilities, which states the following:

Attachments
Woods Irrigation Company
Water Right Application

“Class 1 consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination.”

Based on the foregoing, we are requesting that the State Water Board grant a Categorical Exemption to this Application and proceed with further processing as necessary for permit issuance.

Attachment #2

4. Purpose of Use, Diversion/Storage Amount and Season

This Application requests a maximum diversion rate of 20.0 cubic feet per second (cfs) to be diverted from the Middle Branch of the San Joaquin River from March 1 through November 15. As stated herein, the State Water Board made a finding that the Applicant has shown evidence sufficient to indicate a pre-1914 appropriative right of 77.7 cfs. This Application is to provide for the difference between historic diversions and the 77.7 cfs pre-1914 right as delineated by the State Water Board. There is no intent to expand water use.

Historic diversions have not been measured. However, the Company conservatively estimates that they have been between 90 and 100 cfs over a thirty-day average. During certain days in July and August, the instantaneous rate of diversion may approach 130 cfs. However, as provided for in CCR Section 697(a)(2), the average diversion rate during any 30-day period would not exceed 100 cfs under the combined appropriative rights.

The Company is installing measurement devices and will be tracking actual diversion rates while this Application is being processed. If data from the monitoring program or additional investigation suggests that the Company has over-estimated historic maximum diversion levels, the Company will amend its Application and subsequent permit to reduce the rate of diversion so that it is no greater than historic diversion levels.

Attachment #3

6. Water Availability

The Application proposes to directly divert 20.0 cfs from the Middle Branch of the San Joaquin River for irrigation of approximately 6,500 acres on Roberts Island in San Joaquin County. Applicant believes there is sufficient information to conclude that there is a reasonable likelihood of water available for the water sought in this Application based on findings from the “1956 Cooperative Study Program” referenced in State Water Rights Board Decision D-990, and from subsequent State Water Rights Board Decision D-1291.

Attachments
Woods Irrigation Company
Water Right Application

The 1956 Cooperative Study Program (the "Program") was developed during negotiations to resolve the nature of the water rights of the Central Valley Project and the rights of the prior or potential diverters of water from the Sacramento River and Delta. The parties to the Program determined that it was reasonable for purposes of the study to assume that all lands within the area described as the Delta Lowlands were riparian to the channels of the Delta, the Sacramento River, and other tributaries to the Delta. The lands of Woods Irrigation Company are entirely within the Delta Lowlands. The Program studies showed that there was some unappropriated water available at various points along the Sacramento River and in the Delta on a year-around basis *after* satisfaction of *all* riparian and water quality demands along the Sacramento River, the Delta Uplands and the Delta Lowlands. Accordingly, the diversions made by Woods Irrigation Company were included in the calculation of the existing water demands of the Delta Lowlands.

D-990 found that the return flows from applied Central Valley Project water resulted in unappropriated water available in various reaches of the Sacramento River and in the Delta on a year-round basis and granted a year-round direct diversion to the Bureau. The year around diversion was upheld in D-1291, approving the State Water Project facilities. Since Woods Irrigation Company's Application is being filed under a claim of area of origin, which would be senior in priority to the Central Valley Project and State Water Project, the Applicant concludes that there is a reasonable likelihood of water available for that sought in this Application.

Attachment #4

6.d. Alternative Sources of Water

The Applicant is exploring other alternative sources including percolating groundwater and purchased surface water through transfers and/or contracts with the State Water Project or Central Valley Project, but does not have confirmation of availability of these options at this time. For the past several years, South Delta Water Agency has requested that both DWR and USBR respond with information about contracts. To date, South Delta Water Agency has not received a substantive response from either DWR or USBR.

10.b. Diversion and Distribution Method

~~Diversion will be by pumping from the Middle Branch of the San Joaquin River at Points of Diversion #1, #2 and #3.~~

Point of Diversion #1 (East Pump Station) - Consists of three electric vertical pumps that divert water to the East Main Canal.

Point of Diversion #2 (West Pump Station) – Consists of three electric vertical pumps that divert water to the East Main or West Main Canals.

Point of Diversion #3 (Stark Road Pump Station) – Consists of a single electric vertical pump that diverts water to the Stark Road lateral canal.

Following are the specifications for each Point of Diversion:

<u>Point of Diversion</u>	<u>Pump Station</u>	<u>Estimated Maximum Discharge Rate (cfs)¹</u>	<u>Horsepower</u>	<u>Estimated Pump Efficiency²</u>
#1	East Pump 1	30	20	49%
	East Pump 2	29	20	31%
	East Pump 3	38	40	50%
#2	West Pump 1	35	40	49%
	West Pump 2	23	20	39%
	West Pump 3	24	30	49%
#3	Stark Road Pump	16	30	41%

¹ Based on short-duration flow measurements collected from individual pump discharges, rounded.

² Overall efficiency including pump and motor based on recent short-duration test conducted on each pump, rounded.

Attachment #7

13. Existing Water Rights and Related Filings

b. The Applicant claims area of origin rights as set forth in the Project Description Section. The Applicant also claims pre-1914 appropriative rights for its entire historic use. However, in Water Right Order WR 2011-0005, the State Water Board found that evidence supported a pre-1914 appropriative right of only 77.7 cfs. The Applicant is appealing this decision. The source,

Attachments
Woods Irrigation Company
Water Right Application

points of diversion, place of use and purpose of use for the Applicant's claimed right is the same as that set forth in this Application. The date of first use is estimated at 1895.

The Applicant also diverts and delivers water pursuant to the claimed pre-1914 ~~appropriative and riparian rights of its landowner shareholders. Woods Irrigation Company does~~ not have detailed information about each of these claimed rights at this time other than that they share the same points of diversion with the Applicant and the water is used to serve smaller places of use.
