ORDER

Treated Wastewater Change Petition WW-20

**ORDER APPROVING CHANGE IN PLACE OF USE AND
PURPOSE OF USE OF TREATED WASTEWATER**

WHEREAS:

1. Treated Wastewater change petition WW-20 was filed by the El Dorado Irrigation District (EID) on September 14, 1992 pursuant to Sections 1210 and 1211 of the California Water Code.
2. The change petition was filed with the State Water Resources Control Board (SWRCB) to obtain approval under Sections 1211 and 1700 of the California Water code to change the Place of Use and Purpose of Use of treated wastewater discharged to Deer Creek in El Dorado County.
3. The SWRCB has determined that good cause for the changes has been shown.
4. The SWRCB has determined that the changes do not constitute the initiation of a new right nor operate to the injury of any other lawful user of water.

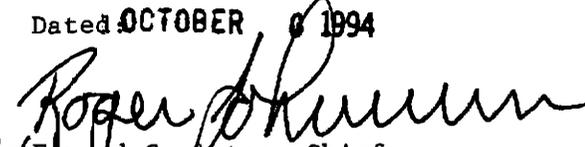

NOW, THEREFORE, IT IS ORDERED THAT:

1. The source of treated wastewater shall be from the Deer Creek Wastewater Treatment Plant; within Section 15, T9N, R9E, MDB&M:

California Coordinate System: Zone 2, North 353,200, East 2,290,750. (0000001)
(0000002)
2. The Purpose of Use shall be irrigation. (0000003)
3. The Place of Use shall be within the El Dorado Hills Development, north of Highway 50 near Cameron Park, as shown on a map on file with the SWRCB. (0000004)

4. In accordance with Sections 1601, 1603, and/or Section 6100 of the Fish and Game Code, no work shall be started on the measuring device until EID has entered into a stream or lake alteration agreement with the California Department of Fish and Game and/or the Department has determined that measures to protect fishlife have been incorporated into the plans for construction of such measuring device. Construction, operation, and maintenance costs of any required facility are the responsibility of the EID. (000063)
5. EID shall install a continuous recording device in accordance with the September 20, 1994 submittal entitled "Stream Flow Measurement for Deer Creek Water Reclamation Facilities." Said measuring device shall be installed and operational no later than May 1, 1995, and shall be properly maintained thereafter. The measuring device shall be monitored on a weekly basis from May 1 through October 31. A record of the measurements shall be maintained by EID and made available for inspection by interested parties upon reasonable request. A copy of the records shall be submitted annually to the SWRCB. Construction, operation, and maintenance costs of the measuring device are the responsibility of EID. (0080117)
6. EID shall, during the period from January 1 through December 31 discharge up to 0.5 million gallons per day of supplemental wastewater into Deer Creek to provide a minimum instream flow of 0.775 cubic foot per second (or the total wastewater inflow into the Deer Creek Wastewater Treatment Plant, whichever is less) as measured at the downstream measuring device. EID shall continue such supplemental discharge so long as the California Regional Water Quality Control Board Central Valley Region permits discharge in accordance with its rules and regulations. (0140060)
7. To the extent practical, after conferring and consulting with the SWRCB, EID shall make its best good faith effort to locate and move as many pond turtles as is feasible which may be impacted by the project to newly created aquatic habitat in the area to be served by the reclaimed water. EID's requirement to comply with this condition shall be conditioned upon receipt of any permit which may be required from the Department of Fish and Game. (0400500)
8. The SWRCB reserves jurisdiction in the public interest to modify the terms and conditions of this order, including imposition of requirements to alter project facilities or operations and to modify instream flow releases, in the event of unforeseen adverse impacts to fish and wildlife. SWRCB action will be taken only after notice to interested parties and opportunity for hearing. (0400600)

Dated OCTOBER 6 1994
