Subject:

Water board members,

I am opposed on any increase of unimpaired flows on the Stanislaus River because in this state of emergency with all the fires burning in Calaveras, Stanislaus, and Tuolumne counties, water needs to be maintained in the reservoirs for fighting these fires and in case of any others that may occur. There should be no releases during a state of emergency. Before any more water is released, many issues need to be addressed for the safety and well being of the citizens in these areas.

Respectfully,

Victoria Gaffney
Copperopolis
