DIV OF WATER RIGHTS  
SACRAMENTO

State Water Resources Control Board's

P.O. Box 100

Sacramento, Ca. 95812-0100

3-30-2016

We the people would like to know why your proposing to divert more water from local rivers. Is this in response to Governor Brown's two tunnels he is trying to get done. This would cut down the water going into the delta so of course you would need more river water. These tunnels are because LA water district has too much money and power and is going to put the tunnels in no matter what we say or do. They all ready have bought the Islands so they won't have a problem there. LA needs to desalinate more water to supply their needs instead of taking all our water from the north. You want food to eat but want to take more of the farmers water from them. I know this is falling on deaf ears because you have made up your mind all ready, why not let the voters vote on this water issue?.

When people get a government job, something seems to happen to them and they quit listing to the people and loose all common sense, this is why we the people are so mad at our government.

What is it going to take to get LA to desalinate the ocean water, instead of taking all our water? So with the two tunnels put in of course the salt ocean water will come up closer to Sacramento and other towns. So this is why you want to have our rivers dump more fresh water in so LA can put in the tunnels. The LA water district is to power full and will take whatever they want, this is why the northern part of California wants to break away.

Tell me what good reason do they have to put the two tunnels under the delta? Are they picking up more salt or fish? *Now*

I would like to talk to you about recharge down well's.

Kind regards

Neal Wilhite
