State Water Resources Control Board
PO Box 100
Sacramento, CA 95812-0100

Board Members,

The enclosed flyer was sent to my address regarding your proposal concerning water utilization. The Assembly Member is asking for my thoughts on the matter. My thoughts are these: In recent years, corporate farming interests have descended on California like an infestation of locusts. Locusts eat and destroy all in their path. In my opinion, the fish and wildlife that depend on our natural water resources were here first and it should not be up to a few wipe them off the face of the earth. It is unfortunate that profit is such a driving force that causes such contention. If the Water Board gives way, those locusts will use up the available supply of water and still want more. The next target of the over users would probably be the Air Pollution Control District in order to increase the number of burn days for firewood marketing purposes.

Hold fast!

Thank You,

R. Gary Vaccaro
