Conservation of Water	
8. Are you now employing water conservation efforts?	Yes
Description of water conservation efforts	The District monitors and regulates the tail water leaving irrigated lands, according to The Bureau of Reclamation Settlement Contract No. 14-06-200-855A. As part of the water conservation and management project in 2011, the District completed the automation and remote operation of its 64.95 mile long canal, increasing the ability for the District to conserve more water. By monitoring and regulating the tail water leaving the District irrigated lands and automating the main canal, we will conserve roughly 8% of the total water diverted.
9. Amount of water conserved	594 Acre-Feet

Water Quality and Wastewater Reclamation	
10. During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?	No
