Re: Typographic error appearing on page 7 of
PCFFA's 'Delta Flow Criteria Informational
Proceeding' testimony of William M. Kier submitted
to the SWRCB on 15 February 2010

Dear Mr Crader

A careful re-reading of PCFFA's 'Delta Flow Criteria Informational Proceeding' testimony of William M. Kier, submitted to the SWRCB on 15 February 2010, has revealed an egregious typographic error on page 7 of that testimony. We would appreciate it a great deal if there were some way in which the Board staff might bring our correction of the typo to the attention of parties to the Proceedings who may be interested in, or plan to use our testimony.

On page 7 of our testimony, as submitted to the Board on the 15th of this month, in the second paragraph, in the underlined language that begins on line four of that paragraph, that which now reads in part '25,000 acre-feet of Sacramento River flow past all points of diversion', please be advised that that line of our testimony should read

'25,000 cubic feet per second of Sacramento River flow past all points of diversion'

Again, we would appreciate anything that the Board staff can do to bring our error, and our correction of it to the attention of the parties to the Proceedings.

Most sincerely,

William M. Kier
