Water Transfers

8e. Water transfered	Yes
8f. Quantity transfered (Acre-Feet)	3200
8g. Dates which transfer occurred	7/19 to 9/26
8h. Transfer approved by	DWR

Water Supply Contracts

8i. Water supply contract	Yes
8j. Contract with	DWR
8k. Other provider	none
8l. Contract number	none
8m. Source from which contract water was diverted	Lake Oroville / Feather River
8n. Point of diversion same as identified water right	Yes
8o. Amount (Acre-Feet) authorized to divert under this contract	14000
8p. Amount (Acre-Feet) authorized to be diverted in 2014	14000
8q. Amount (Acre-Feet) projected for 2015	10000
8r. Exchange or settlement of prior rights	Yes
8s. All monthly reported diversion claimed under the prior rights	No
8t. Amount (Acre-Feet) of reported diversion solely under contract	4257

6. Maximum Rate of Diversion for each Month

Month	Maximum Rate of Diversion (CFS)
January	37.3
February	37.3
March	0
April	37.3
May	37.3
June	37.3
July	37.3
August	37.3
September	37.3
October	37.3
November	0
December	0

7. Storage

Reservoir name	Spilled this year	Feet below spillway at maximum storage	Completely emptied	Feet below spillway at minimum storage	Method used to measure water level

Conservation of Water

8. Are you now employing water conservation efforts?	Yes
Description of water conservation efforts	The Company utilizes company-owned and private deep wells to supply groundwater to portions of its Service Area. For 2014 the company delivered 6,918 acre-feet of groundwater from wells to lands within its boundaries to substitute for surface water. This 6,918 acre-feet should be added to the total amount of surface water diverted shown in this report. Use of groundwater is not only part of a conjunctive use program but also conserves water in that use of open ditches where water is subject to seepage and evaporation, is avoided. In addition landowners within the district have installed approximately 1700 acres of micro sprinkler and drip irrigation which provides additional conservation. It is estimated that conservation from well water use, micro sprinklers and drip irrigation provides a 40% savings from use. This calculates an estimated savings of 2,767 acre feet in 2014.
9. Amount of water conserved	2767 Acre-Feet

Water Quality and Wastewater Reclamation

10. During the period covered by this Report, did you use reclaimed water from a wastewater treatment facility, water from a desalination facility, or water polluted by waste to a degree which unreasonably affects the water for other beneficial uses?	No
11. Amount of reclaimed, desalinated, or polluted water used	

Conjunctive Use of Groundwater and Surface Water

12. During the period covered by this Report, were you using groundwater in lieu of available surface water authorized under your license?	Yes
13. Amounts of groundwater used	6918 Acre-Feet

Additional Remarks

The Company utilizes company-owned and private deep wells to supply groundwater to portions of its Service Area. For 2014 the company delivered 6,918 acre-feet of groundwater from wells to lands within its boundaries to substitute for surface water. This 6,918 acre-feet should be added to the total amount of surface water diverted shown in this report. In regard to items 8i through 8t, the Company holds a diversion agreement dated May 28, 1971, with the State of California acting by and through the Department of Water Resources. The diversion agreement acknowledges the Company's riparian rights and License 7296 (Appl. ID 480). It defines the Company's right to divert water annually in a "Drought" year (up to 10,000 acre-feet) and non-"Drought" years (up to 14,000 acre-feet). 2014 was not a "Drought" year under the terms of the diversion agreement. On May 27, 2015, the State Water Resources Control Board curtailed all post-1914 water rights, including the Company's License 7296. After that date and until the curtailment was lifted, the Company's diversions were conducted under its diversion agreement. 2015 is a "Drought" year under the diversion agreement and the Company's projected diversions in accordance with the diversion agreement will be up to 10,000 acre-feet. In regard to items 8e through 8h, the Company petitioned the State Water Resources Control Board for temporary changes to its License to allow the temporary transfer of surface water via groundwater substitution. That petition was denied because the right to divert under the License was curtailed due to dry conditions. However, the transfer proceeded in accordance with the Company's diversion agreement and under DWR's State Water Project water rights. In regard to item 5, the Company holds riparian water rights to the Feather River. These rights are recognized and quantified in the Company's diversion agreement.
