Conservation of Water		
8. Are you now employing water conservation efforts?	Yes	
of water conservation efforts	The total quantity of water conserved during each year is variable and depends upon numerous factors, including but not limited to climatic conditions, hydrologic conditions, District operational practices, and on-farm operational practices. Differentiating and measuring or quantifying conserved water for some efforts is not possible or feasible due to the complexity of the multiple variables involved. Therefore, the annual quantity of water conserved is estimated based on the difference between the Districts 2011 diversions from the Sacramento River and the maximum quantity under License 3165.	
9. Amount of water conserved	10310 Acre-Feet	

Water Quality and Wastewater Reclamation	
10. During the period covered by this Report, did you use reclaimed water from a wastewater treatment
