

SWP Contract Amendments for the Proposed BDCP

Project Purpose

The Bay Delta Conservation Plan (BDCP) is a 50-year habitat conservation plan with the goals of restoring the Sacramento-San Joaquin Delta ecosystem and securing California water supplies. The California Department of Water Resources and State Water Project contractors intend to negotiate terms and conditions for developing proposed amendments to the SWP water supply contracts that would address allocation and payment of costs, as appropriate, for the proposed BDCP. The negotiation is focused only on those contractual aspects and is not a forum for making any other decisions regarding BDCP planning activities or approving the BDCP.
