26 POINT PRESENTATION PREPARED
27 BY STEFFEN MEHL (EXHIBIT SCWA-
28 48)

I, Steffen Mehl, do hereby declare:

I discovered an error in one part of my written testimony marked for identification as Exhibit SCWA-50. I am correcting the paragraph that appears on Page 10, lines 11-20 by striking two sentences as set forth below, with my written testimony otherwise remaining unchanged:

The CVHM-D model was constructed to provide more refined representation of the delta region and used to assess impacts of the CWF construction and operation on groundwater. ~~In this model, the SFR package was modified to include the CWF diversion, but the North Delta Diversion Intakes were placed near the confluence of the Mokelumne and San Joaquin Rivers. (See Exhibit SWRCB-4,~~

~~DEIR/DEIS Fig. 7A-3.). As with the Petitioners modified CVHM model, the CVHM-D model overestimates the stream flows directly downstream of the actual diversion location. The focus of the CVHM-D model appears to have been on intake and tunnel construction and operations effects rather than addressing impacts of reduced stream flows directly downstream of the proposed diversions.~~

With this correction, I am also deleting a related slide in my Power Point presentation. Specifically, I am deleting slide 4 in SCWA-48, and posting a revised presentation as SCWA-48 errata.

Executed on the 24th day of October, 2016 in Chico, California.

Steffen Mehl
