Subject: RE: DWR WaterFix modeling for BiOps

Richard, that data has been posted on the SWRCB ftp site at: [https://ftp.waterboards.ca.gov/?u=water fix download&p=waterfix123](https://ftp.waterboards.ca.gov/?u=water%20fix%20download&p=waterfix123) under the "+subpoena documents" folder. Its not a full run but instead just sensitivity information.

Subject: DWR WaterFix modeling for BiOps

BG,

As part of the preparation of the WaterFix Biological Assessment, detailed modeling studies were performed. Those modeling data were made available to the public.

However, as part of the final consultation process that led to the USFWS and NOAA Fisheries biological opinions (released in June 2017) small changes appear to have been made to WaterFix project operations.

Were additional modeling studies performed for the new project operations under these biological opinions?

If so, can you please make those modeling studies available to me?

As in the past, I would like the full CALSIM II and DSM2 input and output data. Thank you.
Richard
