

STATEMENT OF QUALIFICATIONS

Jennifer Pierre

POSITION: Principal – ICF International; Consultant Deputy Program Manager, California WaterFix

EDUCATION: B.S., Environmental Biology and Management, University of California at Davis. June 2003

PROFESSIONAL EXPERIENCE:

Deputy Program Manager, California WaterFix (February 2015 to present)

- Project Manager for the Biological Assessment
Oversaw the development of the project description, including operational criteria and conservation measures, and the development of analyses for listed fish and wildlife species and their designated critical habitat
- Project Manager, EIR/EIS Chapter 11, Fish and Aquatic Resources
Oversaw the completion of the analysis for each EIR/EIS alternative, including response to comments and revisions to address comments and ensure consistency between Alternative 4A and Biological Assessment analyses
- Miscellaneous tasks related to requests from the SWRCB, Philip Williams and Associates and DWR; economic analysis; 2081 permit application; and program management coordination with DWR and the Bureau of Reclamation

Project Manager, Bay Delta Conservation Plan (February 2011 to December 2014)

Managed the development of the fish and wildlife effects analysis and operational criteria development and analysis for the Plan.

Project Manager, Suisun Marsh Management, Preservation, and Restoration Plan (November 2006 to February 2011)

Managed the development of the Suisun Marsh Plan and associated EIR/EIS and other permits, including facilitation of multi-agency meetings and coordination to complete planning activities consistent with the CALFED Environmental Restoration Program.

Project Manager, South Delta Improvements Program EIR/EIS and Action Specific Implementation Plan (June 2003 to December 2006)

Managed the development of the EIR/EIS and associated technical analyses associated with south Delta export operations, water supply, fish and wildlife resources, and barrier construction and operation.
