

Shallow water habitat downstream of Intake 5 from: Fregoso, T.A., R-F. T. Wang, E.S. Ateljevich, and B.E. Jaffe. 2017. A new seamless, high-resolution digital elevation model of the San Francisco Bay-Delta Estuary, California: U.S. Geological Survey Open-File Report 2017-1067, 27 p., <https://doi.org/10.3133/ofr20171067>.

Shallow water habitat upstream of intake 5 from: Wang, R. & Ateljevich, E. (2012). A Continuous Surface Elevation Map for Modeling (Chapter 6). In Methodology for Flow and Salinity Estimates in the Sacramento-San Joaquin Delta and Suisun Mars, 23rd Annual Progress Report to the State Water Resources Control Board. California Department of Water Resources, Bay-Delta Office, Delta Modeling Section.*

Hydrodynamic subregions adapted from: Stoms, D. M. 2010. Change in Urban Land Use and Associated Attributes in the Upper San Francisco Estuary, 1990-2006. San Francisco Estuary and Watershed Science 8(3).

*Estimates for I Street Bridge to Knights Landing were based on shallow water : open water ratio from Intake 5 to I Street Bridge.
