Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Restoration of rivers, wetlands, watersheds and ecosystems are what we need -- not a cement underground freeway for water export. Absolutely clueless!

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Dr. Alice Welchert  
PO Box 6599  
Los Osos, CA 93412-6599

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Dear Sir, Please deny Alternative A Delta tunnels/"California Water Fix". It is in on way a "fix". In fact, such a plan would be ruinous for the ecosystems of both the Delta and the Bay. These ecosystems would suffer irreparable damages, with far reaching consequences fro both near by citizenry and for wildlife throughout the proposed affected areas, and far beyond. There are other alternatives available which are not destructive on a draconian level level as is the Delta tunnels proposal. by channeling funding towards local water sources and towards jobs, sustainability can become a reality. Also, very notably, beleaguered California tax payers/rate payers will benefit from the savings of billions of dollars.

I urge you to consider these factors and to deny Alternative A, the Delta tunnels/ "California Water Fix", the ruinously-planned plan...

Thank you for your perusal of my letter ...

N. Wisznia

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

The Delta Tunnels would take California 180 degrees from a sustainable solution. Our time, money and energy need to be directed to a complete overhaul of water-wasting agriculture. Here in Sonoma County the biggest culprit is Big Wine. Like almonds, pistachios and cattle, this product is NOT largely consumed here.

The end result of the Delta Tunnels will only be to destroy our environment in order to increase profitable exports in the short-term.

It will serve neither the long-term needs of the environment nor the people of California.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Absolutely, action needs to be taken. I sincerely do not feel this is the plan that would protect our Delta and provide water to our increasing population . Agriculture is California but they need to instigate changes and learn from other countries (New Zealand for example) on how they have dealt with long term drought.

Agriculture must partner with the state to make changes that benefit everyone.

Thank for your consideration of this  
vital issue that effects all of us worldwide, not just California.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Ms. Paula Black  
531 / 6th Ave  
San Francisco, CA 94118-3816

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Please don't destroy the region's ecology and endangered species by creating the 35 mile long underground water export tunnels through the Bay-Delta. We are all connected and when you destroy ecology and species it has a ripple effect which ultimately affects us all. Water intensive almond and pistachio agriculture needs to be scaled back during this drought. Please do the right thing, I implore you. Thank you.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Please focus on sustainable water solutions for California. We should not be diverting massive amounts of water for agriculture that cannot be sufficiently maintained by its local environment. Water is too valuable of a resource to squander on a few cash crops at the expense of everything else. We cannot afford to waste water to prop up an industry that clearly has no place continuing in a state with drought issues. Please vote no on the delta tunnels project.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

We need to stop stealing water from the Sacramento River Delta. This continued water grab by farmers and population centers in Southern CA is a consequence of growing crops and placing population in locations where adequate local water supplies can not keep up with demand. We need to put an end to this continued environmental disaster.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

As a Northern California native and resident for over 60 years, I unequivocally oppose The Delta Tunnels project. I say NO to this Delta Tunnels Project. The California Water Fix project--is just the opposite. This effort will not fix the California water shortage in the southern part of California. These proposed tunnels will divert extraordinary amount of water from the Sacramento River--the primary fresh water way for the San Joaquin Delta and San Francisco Bay. Most of this water is planned to be diverted for large scale agri-business, especially those large almond and pistachio orchards that require extensive water to survive. Again I say NO to this Delta Tunnels project--keep California's water safe for everyone, not just a few large mult-corporations who have extremely large pockets from which to lobby and put pressure on politicians. NO to the California Water Fix plan that will divert fresh water away from the Sacramento River, the San Joaquin Delta and the San Francisco bay. NO to the Tunnels Project.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Daniel Scott Witte  
6727 Sunnyslope Avenue  
Castro Valley, CA 94552

October 14, 2015

The Honorable Governor Brown  
Suite 1173  
State Capitol  
Sacramento California

Subject: Opposition to Delta Tunnels

Dear Governor Brown,

My name is Daniel Scott Witte and I am a sophomore at San Francisco State University intending to become a radio or television announcer. All my life, I have been a fisherman, nature lover, and boater. Given this, I am strongly opposed to the Water Fix Project or Delta Tunnels.

Installing the Delta Tunnels is simply moving water around. It does not address the need for more water because simply carrying water in a tunnel or canal doesn't produce more water than we already have. Instead it only moves it and destroys the environment.

The restoration plan for flooding existing farms for the fish such as salmon and delta smelt will not be very affective for their natural habitat. Salmon need to naturally migrate from fresh water to salt water to lay their eggs and live. If salmon are simply placed in a flooded farm, they are not able to naturally migrate from the California Delta to the ocean. As a result, the salmon population will drop. I understand that the habitat restoration plan has been removed from your plan to reduce the cost which is much worse for the environment. Not only are the salmon unable to migrate, but they cannot live without the water.

Putting the delta tunnels in place will cause many job losses. These jobs include commercial fishermen delta farmers and boat mechanics. If salmon are not in the ocean, there will be no fish for the commercial fishermen. In regards to boat mechanics, my cousin is a boat mechanic in Discovery Bay and he works out of his home on the water. If there was no water for the boats to travel in, fewer boats could get to get my cousin's house. If my cousin doesn't get boats to work on, then he would lose money. Lastly, the delta farmers who work in the delta are would lose money because they would have no water to o grow their crops. Their irrigation doesn't harm the delta because the water they use on their fields soaks into the ground and eventually goes back into the delta.

If water is removed above the Delta, it will increase the salinity in the Delta. To counteract the salinity increase, salinity gates are going to be put in place. These salinity gates will be placed at locations in the delta

such as Georgianna slough, Montezuma Slough and Old River. Unfortunately, this will block boat traffic requiring boaters to radio and request openings for the gates. By having to request openings, this slows the traffic down because they have to wait for the gates to open and close on either side of the locks. Not only will it make traffic slow down, it will also put more pollution in the water because the boats will be sitting at idle and waiting rather than cruising straight through.

I understand one reason for bypassing the delta is the condition of the levies in the event of an earthquake. These levees have been in place for many years and never has an earthquake caused a problem. Not only that, it would be much cheaper to maintain the levies annually to make sure there is not a problem. Not only will the tunnels not help this problem, but they will simply create more dangers. For example, if the gaskets in the tunnels begin leaking water will get into the ground and cause sink holes that could be dangerous to people and farming equipment.

One option that would actually produce more water we be Desalination. By taking the ocean water and desalinating it, more fresh water would be available than there is now. Not only would there be fresh water, but the salt could be used for other purposes such as seasoning food.

Over all, I hope you will consider these factors and stop any planning to install or build the Delta Tunnels. As a fishermen, boater, and nature lover, I would really hate to see our environment ruined.

Sincerely,

*Daniel Witte*

Please accept this e-mail as my strong objection to the idea of twin tunnels. This proposal is only to satisfy those who live in the Southern part of our state with more water. This idea shows no consideration of how it would affect the Delta, the fishing and the economy in our area. It is truly a horrible idea.

**Subject:** Twin Tunnels

Dept. Of Water Resources:

As a fourth generation resident of San Joaquin County I am keenly interested in preserving the Delta. From what I have read, I believe the twin tunnels project will degrade the Delta and seriously affect the livelihoods of numerous professions in our area. This does not include the unintended consequences sure to occur since the scientific studies are incomplete at best. As far as I can tell, the main beneficiaries of this project are the west side corporate farmers. It is outrageous to sacrifice a national treasure, our delta, for them.

Add my name to those strongly opposed to this project.

Peggy Traverso

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

As a Sacramento area citizen, I am absolutely opposed to the Delta tunnels project. Instead, make agricultural users responsible for managing their water resources efficiently, including setting up rainwater capture systems for their areas. Look at how Australian farmers have dealt with the same issue to ensure their survival and also improve profitability. Investment by agribusinesses now would solve immediate and long-term water needs in drought-prone California.

On the other hand, the Delta tunnels proposal would make these vital farmers dependent on political will, as well as cause a public backlash over environmental damage that could be avoided with more visionary solutions.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Mrs. Melinda Pyle

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

California water rights policy is madness. It's time to overhaul the allocation rights that were created without any understanding of how the states hydrologic cycles and sensitive ecosystems function. Jerry Brown is locked in a mindset of the past. We don't need more corporate mega projects and continued plundering of our precious estuarine environments. We need sane and sweeping changes to our existing water allocation policies and a reduction in corporate agribusiness giveaways that continue to degrade the ecology of the Delta while fostering unsustainable practices such as subsidizing the growing of nut tree crops in West Valley. No more!

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

**Subject:** Saving Water

Why is this wrong?

For long time water use California needs a Water Lock at the Carquinez Strait to Regulate the amount of Water that flows to the Bay / Ocean. Like regulating a Water Faucet.

Our Dams will not release large volumes of water. The Delta will stay full. Install a Fish access with water flowing constantly through the Fish Access like the Columbia River. Inside the Columbia River Lock, is a glass Window you can see the Fish migrate. Boat Traffic will be managed as well as keeping Salt water from entering the Delta. Years of heavy rain Fall, Open the Gates Wide.

We needs to save water for all of California.

Why is this wrong?

**Subject:** BDCP/WaterFix Comments

Greetings:

As a resident of San Joaquin County, a large and important agricultural area which delivers \$3 billion in annual agricultural production, I am opposed to the assault on our area that Governor Brown's proposed "WaterFix" presents. This plan steals water from us, trampling over prior rights dating over a century, and will inflict severe economic damage on us residents, farmers, and the state.

Rather than spending \$15 billion (plus overruns) of taxpayer funds on this scheme which develops no new water source whatsoever, it would be much more prudent to demand that such an expenditure not be used to divert water from one set of users to another, but instead be invested in developing new sources. Possibilities include new dam projects, new desalination facilities in Southern California, or other viable schemes including mediating and settling the dispute with British Columbia so California businesses could purchase water from them and bottle it for home delivery in Southern California. No doubt creative minds could find other new sources of water, something that merely diverting water will never do.

Regards,

Robert Beauchamp  
Manteca California

**Subject:** Bad idea

Taking enormous amounts of water from the Sacramento River is a bad plan. We need the water where it is, available to grow crops, and to keep thd Delta at least somewhat healthy.

My understanding is that there is no new water capturing/storage planned to compensate for the water that would be taken.

How about finding ways to capture and store more water first?

Thank you

Rick Hammarstrom

Dear sirs,

I have been strongly opposed to The Bay Delta Conservation Plan since the early scoping meetings began 7 years ago, and oppose the plan even more today under the California Waterfix. Nothing has changed in either of the plans merely the name. I need not list all of the comments in opposition to "The Tunnels" that have not already been expressed or documented since the early days of The Bay Area Delta Conservation Plan.

Hopefully, the comments will not fall on deaf ears as they seem to have in the past.

Thank you,

This is the most idiotic thing I have ever heard of. Why do the people in northern Calif have to subsidize an area that has their own water. I recently read on facebook of a mansion in So Cal that used over 1 mil gal of water and paid 90K for it. What a WASTE. Is this what we are being asked to subsidize.

Stop the potential rape of the northern half of California.

**Subject: Oppose the Delta Tunnels/California Water Fix (Alternative 4A)**

I am writing to express my strong opposition to the Delta Tunnels plan.

The Delta Reform Act of 2009, in which the California State Legislature committed to the "co-equal goals" of providing a more reliable water supply for California AND protecting and restoring the cultural, recreational, natural resource, and agricultural values of the Delta, cannot be upheld if the Delta Tunnels come to pass.

The California Water Fix does not meet the restoration goals of the Delta Reform Act; it is simply a plan to export more water out of the San Francisco Bay-Delta estuary. The Delta Tunnels will also fail to provide more reliable water because the Delta watershed is already oversubscribed by five times in normal water years.

**My objections to the tunnels are threefold:**

1. The California Water Fix does not address the environmental, public health or economic impacts of the proposed Delta tunnels project.
2. The plan ignores alternatives that would save California tax and ratepayers billions of dollars, while investing in the jobs and local water sources that build sustainability.
3. The plan will permanently destroy the delta landscape that rowers and motor boaters love.

**My environmental concerns with the plan are:**

- The impact on wildlife and plant species in the Delta that depend on freshwater include the Delta smelt, chinook salmon, steelhead, San Joaquin kit fox, and tricolored blackbird, protected species already on the brink that will face decimation due to a diminishing food-web.
- At sea, even the ESA-listed South Pacific Puget Sound Orca Whales depend on migrating Delta species that will be harmed by less water flowing through the Delta.
- The tunnels plan seems to ignore Section 7 of the Endangered Species Act which prohibits federal agency actions that are likely to jeopardize the continued existence of any endangered species or that "result in the destruction or adverse modification of important habitat of native species."

**My public health concerns with the plan are:**

- The tunnels will cause increased contamination of municipal water and wells for the millions of rural and urban residents living in the five Delta counties including San Joaquin County where I live.
- The tunnels plan fails to model for potential increases of carcinogens and other formation of byproducts that would cause cancer and other serious health effects.
- Environmental justice communities, who depend on subsistence fishing, will also face food and health insecurities as a result of increased contaminants, specifically mercury contamination, in fish and wildlife populations associated with reduced outflows that help with dilution.

**My economic concerns with the plan are:**

- For large metropolitan cities such as Los Angeles and San Jose that depend on export water, water rates and/or property taxes will go up, but they will get no additional water.
- No analysis has been done on how the lack of fresh water flows will impact San Francisco Bay tourism and recreation. These industries depend on Delta fresh water flows for their crab and salmon fisheries, wildlife sighting, boating, and their restaurant economy. This industry is worth billions annually.
- Salinity intrusion is already impacting the western Delta farms and removing Sacramento River freshwater from the system will make matters worse. Delta farmers cannot irrigate crops with salt water and they certainly cannot plant crops in contaminated soils. The Delta Ag economy, which consists of generations of family farms and farm workers, generates \$5.2 billion for the California economy, annually.
- California coastal fishing communities depend on thriving wildlife. This historic industry is worth billions annually, with the salmon industry worth \$1.5 billion annually alone. Thousands of jobs and livelihoods are tied to these industries.
- The operation and construction of the tunnels will obstruct and disable navigable waterways for boating, marinas and other types of leisure activities, in addition to creating conditions of low water flow that will foster invasive aquatic species, such as water hyacinth. Poor water quality also creates unsafe recreation. Recreation and tourism in the Delta generate \$750 million annually. Already, we are experiencing drought conditions in the Delta which will only worsen if the planned Delta Tunnels are constructed.

**Alternatives to Water Exports Ignored**

Less expensive and less environmentally destructive alternatives to the Delta Tunnels were largely ignored when the plan was finalized. The plan does not seriously consider any alternatives other than new, upstream conveyance. The decision-making process (from the outset) has tilted in favor of increasing water exports from the Delta.

Our tax and ratepayer dollars would be much better spent on:

- More aggressive water efficiency program statewide that would apply to both urban and agricultural users.
- Funding water recycling and groundwater recharging projects statewide that would be billions of dollars less expensive for rate payers than constructing a new version of the Peripheral Canal or major new surface storage dams. Meanwhile, these projects move communities towards water sustainability.
- Retiring thousands of acres of impaired and pollution generating farmlands in the southern San Joaquin Valley and using those lands for more sustainable and profitable uses, such as solar energy generation.
- Improving Delta levees in order to address potential earthquake, flooding, and future sea level rise concerns at a cost between \$2 to \$4 billion and is orders of-magnitude less expensive than

major conveyance projects that are currently being contemplated.

- Increasing freshwater flows through the Delta to reduce pollutants so ecosystems and wildlife can be restored.
- Installing fish screens at the south Delta pumps to reduce the current salvage of marine life.

### **In Summary**

The Delta has problems that need to be addressed, but the CA Water Fix tunnels are a 20th century idea that won't fix them. It won't produce more water, more reliable supplies, or improved conditions for the environment in the Delta.

The new EIR/EIS has not adequately addressed my above stated concerns. That is why I oppose the Delta Tunnels/California Water Fix (Alternative 4A).

Reclamation and DWR should prepare and circulate a new Draft EIR/EIS that will include alternatives that reduce water exports and increase Delta flows for consideration by the public and decision-makers. Such alternatives have a far better chance of complying with the Delta Reform Act and the federal Endangered Species and Clean Water Acts.

Thank you for your consideration.

**Subject:** NO Delta Tunnels

To Whom it May Concern,

California's agricultural abundance includes more than 400 commodities. The state produces nearly half of U.S.-grown fruits, nuts, and vegetables. Across the nation, U.S.consumers regularly purchase several crops produced solely in California. The Fruit Basket of California is the San Joaquin Valley. The Proposed "WaterFix" does not provide a single drop of NEW water and could in fact severely impact already drought stricken Delta and San Joaquin.

DO NOT WASTE OUR MONEY- \$15 Billion should better serve the people of California not hurt the Delta and San Joaquin Valley. Read the Statistics again....The crops are NOT grown in San Francisco or Los Angles. They are grown in CENTRAL CALIFORNIA and they provide nearly **50% of all US grown fruits, nuts and vegetable...those are the simple facts.**

I say NO to the Delta Tunnels.

**Subject:** Delta Tunnels

To whom it may concern,

The plan to built the Delta tunnels is a bad one. It would harm the delta environment and the livelihoods of many people. In my many years in health care and as a farm girl, I've seen that when people meddle too much with the natural order, they make things worse - whether it's treating every malady with another pill, performing procedures that don't enhance the quality of life, introducing "improvements" into an ecosystem that works with beauty and economy, or moving water from one end of the state to another. Why do we think we can do better than nature? Find a better solution than this. The delta tunnel plan is crazy and a bandaid to a bigger problem.

Most sincerely

**Subject:** BDCP/Water fix comments

To whom it may concern, I am very much against the plan to divert water from the tunnels project as it seems to have a very narrow focus on who it will benefit. As I understand it, will do more harm than good for the overall health of the Delta and related regions. As this project doesn't create any new water sources it will only reduce the amount of fresh water to the lower regions of the Delta. This project is fated for disaster and will only benefit those to the south at the expense of Jobs, quality of living and environmental health. Thank You.

**Subject:** I Oppose the Delta Tunnels!!!!

We have lived in Discovery Bay for 16 years now and enjoy the lifestyle it provides. We take our kids and grandkids out in our boat on the weekends and enjoy it immensely. I hope to be able to leave this wonderful lifestyle to our children and grandchildren. The tunnels will change all that.

I am writing to express my strong opposition to the the Delta Tunnels plan.

The Delta Reform Act of 2009, in which the California State Legislature committed to the “coequal goals” of providing a more reliable water supply for California AND protecting and restoring the cultural, recreational, natural resource, and agricultural values of the Delta, cannot be upheld if the Delta Tunnels come to pass.

The California Water Fix does not meet the restoration goals of the Delta Reform Act; it is simply a plan to export more water out of the San Francisco Bay-Delta estuary. The Delta Tunnels will also fail to provide more reliable water because the Delta watershed is already oversubscribed by five times in normal water years.

**My objections to the tunnels are threefold:**

The California Water Fix does not address the environmental, public health or economic impacts of the proposed Delta tunnels project. Also, the plan ignores alternatives that would save California tax and ratepayers billions of dollars, while investing in the jobs and local water sources that build sustainability.

**My environmental concerns with the plan are:**

- The impact on wildlife and plant species in the Delta that depend on freshwater include the Delta smelt, chinook salmon, steelhead, San Joaquin kit fox, and tricolored blackbird, protected species already on the brink that will face decimation due to a diminishing food-web.

- At sea, even the ESA-listed South Pacific Puget Sound Orca Whales depend on migrating Delta species that will be harmed by less water flowing through the Delta.
- The tunnels plan seems to ignore Section 7 of the Endangered Species Act which prohibits federal agency actions that are likely to jeopardize the continued existence of any endangered species or that “result in the destruction or adverse modification of [critical] habitat of [listed] species.”

My public health concerns with the plan are:

- The tunnels will cause increased contamination of municipal water and wells for the millions of rural and urban residents living in the five Delta counties.
- The tunnels plan fails to model for potential increases of carcinogens and other formation of byproducts that would cause cancer and other serious health effects.
- Environmental justice communities, who depend on subsistence fishing, will also face food and health insecurities as a result of increased contaminants, specifically mercury contamination, in fish and wildlife populations.

#### **My economic concerns with the plan are:**

- For large metropolitan cities such as Los Angeles and San Jose that depend on export water, water rates and/or property taxes will go up, but they will get no additional water.
- No analysis has been done on how the lack of fresh water flows will impact San Francisco Bay tourism and recreation. These industries depend on Delta fresh water flows for their crab and salmon fisheries, wildlife sighting, boating, and their restaurant economy. This industry is worth billions annually.
- Salinity intrusion is already impacting the western Delta farms and removing Sacramento River freshwater from the system will make matters worse. Delta farmers cannot irrigate crops with salt water and they certainly cannot plant crops in contaminated soils. The Delta Ag economy, which consists of generations of family farms and farm workers, generates \$5.2 billion for the California economy, annually.
- California coastal fishing communities depend on thriving wildlife. This historic industry is worth billions annually, with the salmon industry worth \$1.5 billion annually alone. Thousands of jobs and livelihoods are tied to these industries.
- The operation and construction of the tunnels will obstruct and disable navigable waterways for boating, marinas and other types of leisure activities, in addition to creating conditions of low water flow that will foster invasive aquatic species, such as water hyacinth. Poor water quality also creates unsafe recreation. Recreation and tourism in the Delta generate \$750 million annually.

#### **Alternatives to Water Exports Ignored**

Far far less expensive and less environmentally destructive alternatives to the Delta Tunnels were largely ignored. The plan does not seriously consider any alternatives other than new, upstream conveyance. The decision-making process (from the outset) has tilted in favor of increasing water exports from the Delta.

Our tax and ratepayer dollars would be much better spent on:

- More aggressive water efficiency program statewide that would apply to both urban and agricultural users.
- Funding water recycling and groundwater recharging projects statewide that would be billions of dollars less expensive for rate payers than constructing a new version of the Peripheral Canal or major new surface storage dams. Meanwhile, these projects move communities towards water sustainability.
- Retiring thousands of acres of impaired and pollution generating farmlands in the southern San Joaquin Valley and using those lands for more sustainable and profitable uses, such as solar energy generation.
- Improving Delta levees in order to address potential earthquake, flooding, and future sea level rise concerns at a cost between \$2 to \$4 billion and is orders of-magnitude less expensive than major conveyance projects that are currently being contemplated.
- Increasing freshwater flows through the Delta to reduce pollutants so ecosystems and wildlife can be restored.
- Installing fish screens at the south Delta pumps to reduce the current salvage of marine life.

### **In Summary**

The Delta has problems that need to be addressed, but the CA Water Fix tunnels are a 20th century idea that won't fix them. It won't produce more water, more reliable supplies, or improved conditions for the environment in the Delta.

The new EIR/EIS has not adequately addressed my above stated concerns. That is why I oppose the Delta Tunnels/California Water Fix (Alternative 4A).

Reclamation and DWR should prepare and circulate a new Draft EIR/EIS that will include alternatives that reduce water exports and increase Delta flows for consideration by the public and decision-makers. Such alternatives have a far better chance of complying with the Delta Reform Act and the federal Endangered Species and Clean Water Acts.

Kelley Chew  
Discovery Bay Resident

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

I do not think the special interests involved have a right to the commons, the eco system, the water that is intended to nourish all species. Do Not establish these tunnels.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Ms. Ruthanne Jahoda  
8235 Mount Vernon Rd  
Auburn, CA 95603-9754

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

Please reconsider. Don't kill off what little ecology and endangered species we have left. Our children will only read about salmon and other fish species in text books, never seeing them in person. How we children and adults learn to respect ecosystems and their inhabitants when the law makers (adults) are killing it in front of them?

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

I am strongly opposed to the Delta Tunnels Plan. This plan will cost billions, not adequately address our water problems, and will result in additional environmental damage to the Delta and Bay ecosystems.

In the Sacramento Valley landscape trees are dying and my neighbor's domestic wells are going dry. Billions will be spent to benefit only a few agricultural investors. Irrigating orchards year-around that are planted in what's technically is a desert is not good policy.

The Delta Tunnels are not a "California Water Fix." There are other alternatives that would be more cost effective, and result in sustainable solutions that would not further degrade the Delta and Bay ecosystems.

I strongly urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

I am writing to express my strong opposition to the Delta Tunnels Plan.

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

During a time of historic drought, we need sensible, locally-based actions to conserve and manage our precious water resources. Another giant infrastructure project in the middle of the already devastated Bay-Delta ecosystem, accompanied by enormous public debt, is not the answer for the State of California. Much as I support Gov. Brown's many laudable policies and positive actions on a number of important issues, this one is sheer folly. Please stand up and prevent this foolishness from going forward.

Thank you for considering my message.

I am writing to express my strong opposition to the Delta Tunnels Plan.

We need to protect the fish species in the Delta & the San Francisco Bay - it's important to all of us!

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Mrs. Ann Miners

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

NO Delta tunnels project!

It's bad for the region's ecology and endangered species. That comes before helping moneymaking goals.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Ms. Jean Rolf

Bay Delta Conservation Plan  
CA

Dear Conservation Plan,

I am very concerned about the devastating consequences to the environment if the Delta Tunnel Plan is approved.

I am writing to express my strong opposition to the Delta Tunnels Plan.

The deceptively named "California Water Fix" does not address the multitude of adverse environmental, public health, and economic impacts the proposed Delta tunnels project would cause. Further, the plan ignores alternatives that would save California tax- and ratepayers billions of dollars, while investing in jobs and local water sources that build sustainability, instead of severely damaging the Delta and Bay ecosystems.

I urge you not to permit the Delta Tunnels/California Water Fix (Alternative 4A) project to move forward.

Sincerely,

Mrs. Willetta Clark
