**Subject:** Objection to 36% cut

As a resident of Rolling Hills, I object to the 36% cut in water usage that has been mandated. As a city, we have done nothing to warrant any kind of a reduction larger than any other city. I agree that we need to reduce consumption but 36% is insane. We have no car washes, no agriculture, no businesses that are heavy users of water, so the reduction impacts residential users only. Completely unfair!
