Subject: relaxing Bay inflows in March could mean extinction for some of our native species.

Hello Rich Satkowski,

Please do the following:

1. Reverse its decision to relax the D-1641 March requirements for inflows to San Francisco Bay and ensure that these flows critical to the continued existence of Delta smelt, winter-run Chinook salmon and other species are actually provided.
2. Continue to deny the request to relax the D-1641 limits on export pumping, in order to prevent devastating impacts on the last remaining Delta smelt and winter-run salmon.

Thank you,

--
