Subject: Save delta species

I am writing to ask you to reverse your decision to suspend the D-1641 March requirements for inflows to San Francisco Bay and ensure that these flows critical to the continued existence of Delta smelt, winter-run Chinook salmon, and other species are actually provided for through the ecologically important spring period.

I also ask that you reverse your decision to partly suspend the D-1641 limits on export pumping, in order to prevent devastating impacts on the last remaining Delta smelt and winter-run salmon.

Finally, please reject any new petitions to suspend the flow requirements and export limits for April and May 2015, and give the endangered species of the Bay-Delta estuary their last, best chance for survival.
