Subject: Restore flows to San Francisco Bay to prevent species extinctions

Dear State Water Resources Control Board members,

Please do not let money interests over ride our San Francisco Bay Delta's life.

I am writing to urge you to reverse your decision to suspend the March requirements for inflows to San Francisco Bay, and to weaken limits on exports. The required flows are critical to the continued existence of Delta smelt, winter-run Chinook salmon and other species and must be provided for the rest of March and on through the ecologically important spring period. Please reject any request to suspend the flow requirements and export limits for April and May 2015, and give the endangered species of the Bay-Delta estuary their last, best chance for survival.

Patricia Nandananda Hamilton

Acquiring problems is a fundamental human need. It's as crucial to your well-being as getting food, air, water, sleep, and love. You define yourself -- indeed, you make yourself -- through the puzzling dilemmas you attract and solve. The most creative people on the planet are those who frame the biggest, hardest questions and then gather the resources necessary to find the answers.
