Subject: Approval of Water Flow Agreement!
Importance: High

Attention Members of the State Water Quality Control Board:

As homeowners and invested citizens in Copperopolis, we urge you to support the BEST interests of the many foothills communities that are DIRECTLY and CATASTROPHICALLY impacted by a rejection of this agreement to address the pulse flows that will effectively drain Lake Tulloch. We ask you to consider a pursuit of your organization's objectives in a manner that does not destroy the ecology and economy of our region. This agreement takes a balanced approach to meet the many competing needs for the underlying water. Again, we URGE you to please approve the agreement.

Respectfully,
Benjamin & Robyn Jennings
Copperopolis, CA
