Subject: Lake Tulloch Water
Importance: High

Dear Members of the California State Water Board,

As homeowners in Copperopolis, we are in total support of the tentative agreement of the Irrigation Districts (OID & SSJID) and the Bureau of Reclamation (New Melones). We are asking you to please support this approval for the sake of our community, our agriculture, our economy, and our ecology. Don't let another community become a ghost town due to this drought. This agreement will allow you to continue the programs you have in place without destroying the economy and ecology of the Sierra Foothills. Lake Tulloch was built with funds from the backs of our farmers. Help people, not fish. Please approve the tentative plan.

Thank you,

Ron and Donna Steger
