Subject: Ease of Fish Flow Restrictions

I am a citizen that lives in Copperopolis full time. Yesterday I got 126 Signatures to stop the Fish Flow in a drought. I will send these to Gov. Brown and Congressman McClintock.

I support the Environment, and I work as a Parrot Rescue Volunteer. We have Bald Eagles that live at Lake Tulloch and New Melones, what will happen to this Endangered Species if we waste water in this drought?

I urge you to stop the ESA Fish Flows until this drought ends, period. We can re-stock fish, we have done it before, but water for drinking and Agriculture are vital to the State of California. Please stand with OID & SSJID on the New Melones Release.

Respectfully,
Elaine St. John
